## Special Announcements

### **NJ ACTS Pilot Grants Program 2019 Request for Applications and Application Instructions**

**Application Forms and Information Package is available on**  
<https://drive.google.com/drive/folders/1a5a-PXOIbJBdWDxOj49fkIWOtLYcxAAf>

The New Jersey Alliance for Clinical and Translational Science (NJ ACTS) is delighted to announce its **Pilot Grants Program**, supported by a grant from the National Institutes of Health/National Center for Advancing Translational Sciences.

For some programs, we are seeking proposals involving faculty from **at least two** NJ ACTS institutions (Rutgers, Princeton and NJIT) that, when completed, will form the basis for applications for funding from federal and other sources. For Valued Partner and Hub Evaluation/Benchmark, other CTSA Hubs or other NJ ACTS partners are required.

We are seeking proposals for 5 categories of pilots (for more details, see attached):

- Translational and Clinical Sciences Award
- Methodological and Infrastructure Awards
- Propel Awards
- Valued Partnership Awards
- Novel Approaches to Evaluation and Benchmarks of CTSA Hubs

## Eligibilities

- (Co-)PIs must be faculty at Rutgers, Princeton or NJIT. Each project **must** have at least **2 Co-PIs**, representing **different NJ ACTS institutions** or for Valued Partners and Hub Evaluation/Benchmark pilots, a partner institution or other CTSA Hub is required.
- Faculty members with all ranks are eligible to apply. Junior faculty members are especially encouraged to apply.
- Clinical studies beyond Phase IIB are not allowed.
- Applicants may submit multiple applications for different pilot grant mechanisms provided that each project is different. Applicants may not submit identical projects to multiple pilot funding mechanisms.

## Application Process:

A **Complete Application** comprises: **Pilot Program Common Application Form** (a fillable pdf) and **Proposal Materials** as a second pdf document. If you are interested, please contact Yi Chen at [yi.chen@njit.edu](mailto:yi.chen@njit.edu) for additional information and application forms.

Applications are due **July 15, 2019, 3 pm**. Decisions are expected by **August 15, 2019**.

All Pilot Grants must receive **prior approval from NCATS**. **Accordingly, we cannot specify an earliest start-date**. Projects involving human subjects and/or vertebrate animals are urged to seek IRB/IACUC approval **concurrent** with the pilot grant application.

For more information about the program, contact [NJACTS@rbhs.rutgers.edu](mailto:NJACTS@rbhs.rutgers.edu).

---

## Faculty Seed Grant (FSG) Awards

**July 1, 2019 – June 30, 2020**

### FSGs for MTSM/Leir

Principal Investigator: Dantong Wu and Xinyue Ye

Department: MTSM and INF

Project Title: Interactive Q/A Framework and Knowledge Discovery Across Dynamic and Heterogeneous Databases

Principal Investigator: Yi Chen

Department: MTSM

Project Title: Using AI-Powered Technologies to Improve Patient Intervention and Engagement

Principal Investigator: Zhipeng Yan and Xinyuan Tao

Department: MTSM

Project Title: What ADRs can tell us risk management around the world: from the perspective of international information environment

Principal Investigator: Yao Shen and Zhipeng Yan  
Department: CS and MTSM  
Project Title: A data driven approach to systematically model transporter-mediated cancer drug resistance

Principal Investigator: Pius Egbelu and Jim Shi  
Department: MTSM  
Project Title: Travel Behavior Study for Resilient Transportation Network

---

## **Federal Requirement on Certification of Time and Effort Charged to Grants Fall 2018 Certifications**

The Office of Research has been continuously updating research services protocols for online implementation to enhance faculty research support. Consistent with 2020 Vision plan to manage proposal submission and post-award grant management through online systems in a paperless manner, One of the recent initiatives is the implementation of the Time and Effort Certification process in a paperless manner. While considering online certification options, we started doing Time and Effort Certification (TEC) through emails instead of paper-based forms. TEC forms for Fall 2018 have been sent to PIs as email attachments. The process of opening up the PDF form, signing it for certification and sending it back by the due date is included in the personalized email to faculty and staff researchers.

This is an important federal requirement for certify Time and Efforts charged to each grant to be in compliance with federal code of regulation 2CFR 200. Information about the TEC process is provided below.

If you have not already returned your certifications, please respond to reminders being sent to you and your department chair with copy to college dean. Please sign and return them as soon as possible.

### **Time and Effort Certification (TEC) Process for Fall 2018**

#### What is time and effort certification?

Time and effort certification is required by regulation (Uniform Guidance 2 CFR 200 Subpart E formerly known as Federal OMB Circular A-21) to enable NJIT to receive grant funds.

#### What is on the certificate and how should I review it?

The time and effort report provides each employee's percentage of effort based on the actual payroll charged to their grant during the certification period. This percentage is calculated based on the employee's total salary distribution by funding source during this period.

PI's may update the actual effort dedicated to grants in the last column. Please note that:

- The total in this column must equal 100% across all funding sources
- The salary charge percentage cannot exceed the effort percentage

PIs must fill out the last column of the certification only if it is different from what is printed on the certificate. As a friendly reminder, timely review and correction of errors in personnel charges to a grant (prior to time and effort certification at the end of the semester) should be done on a regular basis. If you need assistance with correction of errors in charging personnel to grants please contact your grant accountant.

### How will I receive the certificate?

The certificate are sent from the time and effort email ID via email. Faculty and staff should receive the certificates for themselves and should certify for themselves. For students and part time employees, the PI on the grant will receive the certificate and can certify on their behalf.

### How should I open the certificate and sign it ?

- The time and effort certificate are password protected, to view the certificate please enter the password which will be communicated in the email.
- If the PI/individual is unable to sign digitally, they may also print, sign and scan back the certificate to [timeandeffort-group@njit.edu](mailto:timeandeffort-group@njit.edu)

### By when is the certification due?

The deadline is included in the email.

If you have any other questions, feel free to reach out to [timeandeffort-group@njit.edu](mailto:timeandeffort-group@njit.edu)

---

## **Grant Opportunity Alerts**

Keywords and Areas Included in the Grant Opportunity Alert Section Below

**NSF:** Advanced Computing Systems & Services; International Research Experiences for Students (IRES); Opportunities for Promoting Understanding through Synthesis (OPUS); NSF Convergence Accelerator; Innovative Technology Experiences for Students and Teachers (ITEST); Research Experiences for Undergraduates (REU); Computer and Information Science and Engineering (CISE) Research Initiation Initiative (CRII); Physics Frontiers Centers (PFC); Division of Chemistry: Disciplinary Research Programs (CHE-DRP), Centers for Chemical Innovation (CCI), Methodology, Measurement, and Statistics (MMS); Secure and Trustworthy Cyberspace Frontiers (SaTC Frontiers)

**NIH:** Bridges to the Doctorate Research Training Program (T32); Mechanistic Basis of Diffuse White Matter Disease in Vascular Contributions to Cognitive Impairment and Dementia (VCID)(R01); Non-Invasive Neurostimulation in AD/ADRD (R01); Research to Understand and Inform Interventions (R01); NIAID New Innovators Awards (DP2); Brain Initiative: Research to Develop and Validate Advanced Human Cell-Based Assays To Model Brain Structure and Function (R01); Research Program Award (R35); Postdoctoral Research Associate Training (PRAT) Program (Fi2)

**Department of Transportation:** Grants or Research Fellowship (GRF); Advanced Transportation and Congestion Management Technologies Deployment Initiative; National Infrastructure Investments

**Department of Defense/US Army/DARPA/ONR:** Office of Naval Research (ONR) Young Investigator; DSO Office-wide Broad Agency Announcement; Program Announcement for Disruptioneering; Materials Science in Extreme Environments University Research Alliance (MSEE-URA); DoD Psychological Health and Traumatic Brain Injury, Federal Interagency Traumatic Brain Injury Research Analysis Award; DoD Vision, Investigator- Initiated Research Award; DoD Duchenne Muscular Dystrophy, Idea Development Award;

**EPA:** Green Infrastructure to Reduce Stormwater Runoff; Chemical Mechanisms to Address New Challenges in Air Quality Modeling; 2019 Healthy Communities Grant Program; A National Student Design Competition Focusing on People, Prosperity and the Planet - Safe and Sustainable Water Resources

**Department of Energy:** Electric Grid of Things; Request for Information (RFI): Marine Sciences Laboratory; Low Cost, Efficient Treatment Technologies For Produced Water; Buildings Energy Efficiency Frontiers & Innovation Technologies (BENEFIT) – 2019  
**NASA:** ROSES 2019: Living With a Star Science; University Leadership Initiative (ULI2); ROSES 2019: B.7 Space Weather Science Applications Operations 2 Research; Heliophysics Theory, Modeling, and Simulations; Astrophysics Research and Analysis; Heliophysics Data Environment Emphasis  
**National Endowment of Humanities:** Summer Stipends; Fellowship Programs at Independent Research Institutions; Digital Humanities Advancement Grants; Research and Development Program  
**Robert Wood Johnson Foundation:** Equity-Focused Policy Research  
**Simon Foundation:** Autism Research  
**Mozilla:** Mozilla Open Source Support (MOSS) Awards  
**John D. And Catherine T. MacArthur Foundation:** 2020 Scientific Innovation Award

---

### **Recent Research Grant and Contract Awards**

Congratulations to faculty and staff on receiving research grant and contract awards!

**PI:** John Federici (PI)

**Department:** Physics

**Grant/Contract Project Title:** NJSGC Summer Bridge Programs - Research in Physics at NJIT - 2019

**Funding Agency:** NASA

**Duration:** 05/01/19-03/14/20

**PI:** Alexander Kosovichev (PI)

**Department:** Center for Heliophysics

**Grant/Contract Project Title:** Collaborative Research: Energy Release and Transport in Impulsive Phase of Solar Flares

**Funding Agency:** NSF

**Duration:** 06/01/19-05/31/22

**PI:** Wenda Cao (PI)

**Department:** Center for Solar Terrestrial Research

**Grant/Contract Project Title:** Synoptic Investigations of the Sun Using SOLIS of NSO

**Funding Agency:** NSF

**Duration:** 10/01/17-09/30/21

**PI:** Linda Cummings (PI) and Richard Moore (Co-PI)

**Department:** Mathematical Sciences

**Grant/Contract Project Title:** Collaborative Research: A Two-Week Mentored Program to Prepare Graduate Students for Industrial Careers

**Funding Agency:** NSF

**Duration:** 07/01/19-06/30/20

**PI:** Wenda Cao (PI) and Philip Goode (Co-PI)

**Department:** Center for Solar Terrestrial Research

**Grant/Contract Project Title:** Collaborative Research in Solar Physics between KASI, SNU, and BBSO

**Funding Agency:** KSI

**Duration:** 06/01/19-05/31/24

**PI:** Hao Chen (PI)

**Department:** Chemistry and Environmental Sciences

**Grant/Contract Project Title:** Developing a high-throughput analytical tool for plant cell wall genomics

**Funding Agency:** U.S. Department of Agriculture (USDA)

**Duration:** 06/15/19-06/14/20

---

### **In the News...**

(National and Federal News Related to Research Funding and Grant Opportunities)

**House Appropriations on R&D:** University priorities fared well in the nearly trillion-dollar bill "minibus" that cleared House Wednesday on a party-line 226-203 vote. The measure funds departments of Defense, Health and Human Services (including the National Institutes of Health), Education, and Energy. In total, the package provides:

- \$645.1 billion in base defense funding;
- \$261.7 billion in base nondefense funding;
- \$68.1 billion for defense Overseas Contingency Operations (OCO); and
- \$8 billion for nondefense OCO.

At the Pentagon, the bill supports Army Defense Research Sciences, Army and Air Force University Research Initiatives, Navy Multidisciplinary University Research Initiative (MURI), the Defense University Research Instrumentation Program (DURIP), Defense-wide Minerva Research Initiative, Defense Established Program to Stimulate Competitive Research (DEPSCOR), and the National Defense Education Program, as well as programs to increase the participation of women and minorities in science, technology, engineering and math (STEM). Applied research in the bill advances unmanned systems, autonomy, propulsion, materials, manufacturing, digital security, energetics, and hypersonics.

Energy funding in the bill includes increases for the Office of Science, ARPA-E, Energy Efficiency and Renewable Energy, cybersecurity, and next-generation nuclear reactors. At Health and Human Services, it provides a \$2 billion increase for the NIH, including money for the BRAIN initiative, Cancer Moonshot, research centers in minority institutions, and, in a 20-year first, firearm injury and mortality prevention research. The full House has begun debate on a second minibus funding the National Science Foundation, National Institute of Standards and Technology, and other science agencies. A summary is posted on the website <https://appropriations.house.gov/sites/democrats.appropriations.house.gov/files/H.R.%202740%20division-by-division%20summary.pdf>

AI, HYPERSONICS, QUANTUM, CYBER, SPACE, AND BIOTECH are top priorities in the Senate Armed Services' version of the FY 2020 National Defense Authorization Act. (See a [summary](#) and a [press release](#)). The bill ensures that "our military is not fighting tomorrow's wars with yesterday's weapons and equipment," the committee says. The new Space Force "will focus on cultivating a space warfighting ethos, unify command of space operations and activities, and improve acquisition policies for space programs and systems." Among other provisions, the bill lets the Pentagon pursue the capability to produce rare earth elements from coal ash. China currently dominates the rare-earth market.

**Air-Breathing Weapons:** One aspect of hypersonic weapons has the Armed Services Committee concerned: "a lack of focus on air-launched and air-breathing hypersonic capability." So the panel

recommends an increase of \$75 million "for the continued development and transition of the Hypersonic Air Breathing Weapons Concept."

**More Public-Private Partnerships:** The landscape for AI R&D is becoming increasingly complex, due to the significant investments that are being made by industry, academia, and nonprofit organizations. Additionally, AI advancements are progressing rapidly. The Federal Government must therefore continually reevaluate its priorities for AI R&D investments, to ensure that investments continue to advance the cutting edge of the field and are not unnecessarily duplicative of industry investments.

A new [White House artificial intelligence strategic plan](#) keeps much of the 2016 Obama administration while giving "greater attention to making AI trustworthy" and partnering with the private sector. The first seven strategies continue from the 2016 Plan, reflecting the reaffirmation of the importance of these strategies by multiple respondents from the public and government, with no calls to remove any of the strategies. The eighth strategy is new and focuses on the increasing importance of effective partnerships between the Federal Government and academia, industry, other non-Federal entities, and international allies to generate technological breakthroughs in AI and to rapidly transition those breakthroughs into capabilities. The strategic puts forward eight strategic priorities:

1. Long-term investments in AI research.
2. Develop effective methods for human-AI collaboration.
3. Understand and address the ethical, legal, and societal implications of AI.
4. Ensure the safety and security of AI systems.
5. Develop shared public datasets and environments for AI training and testing.
6. Measure and evaluate AI technologies through standards and benchmarks.
7. Better understand the national AI R&D workforce needs.
8. Expand public-private partnerships to accelerate advances in AI.

**Training for STEM Faculty New to Teaching Ethics Workshop:** The National Academy of Engineering Online Ethics Center (OEC) of the Center for Engineering Ethics and Society will hold a 1½-day workshop on *Training STEM Faculty New to Teaching Ethics*. Applications are invited from STEM faculty who wish to identify opportunities to integrate ethics and responsible conduct of research (RCR) guidance in their courses and research environments. Workshop presenters and participants will explore a variety of hands-on tools and approaches, both formal and ad hoc, including the use of the OEC as both a teaching tool and resource for materials. Participants will consider their own classes and research projects as well as the approaches and materials presented to create or enhance a learning activity, such as a class plan, course syllabus, or laboratory practice. This workshop is designed to help faculty and others seeking to fulfill (a) NSF and NIH requirements for providing RCR instruction and (b) ABET ethics education expectations.

The OEC is looking for STEM faculty, researchers, and/or administrators who are eager to develop strategies and plans for incorporating ethics in their courses or research environments. Some spots will be reserved for individual attendees. Applicants are sought who will broadly represent a range of STEM disciplines, including the social sciences; graduate and undergraduate instructors; and a variety of academic institutions (e.g., liberal arts colleges, large public universities, institutions serving underrepresented populations, private research institutions).

The workshop will be held October 22–23, 2019, at the National Academies' Keck Building in Washington, DC. There is no fee for workshop registration. Participants are expected to cover their travel costs. Limited funds are available for travel assistance in cases of financial need.

**Application Deadline: July 15, 2019**

**An AI Education Strategy:** The Emerging Threats subcommittee wants the Pentagon to identify "the key aspects, applications, and challenges associated with artificial intelligence that can be developed into

an educational curriculum for military service members who utilize the technology" and develop "an implementation plan" for the curriculum. The panel calls for "a plan to diversify and strengthen the Department's science, technology, research, and engineering workforce," and a master plan "to modernize the workforce and capabilities of its science and technology reinvention laboratories. It also says a senior official should be given responsibility for "the direction of research and development of next generation software and software intensive systems." A report by the Subcommittee on Intelligence and Emerging Threats and Capabilities is posted on the website <https://docs.house.gov/meetings/AS/AS26/20190604/109542/BILLS-116HR2500ih-IETC.pdf>

**COST-SHARING WAIVED:** The Department of Energy's applied energy offices recently released over \$200 million in funding for research and development.

[FY19 Bioenergy Technologies Office Multi-Topic Funding Opportunity Announcement](#)

The U.S. Department of Energy announced more than \$79 million in funding for bioenergy research and development including biofuels, bioproducts, and biopower. This funding supports the Energy Department's goal of providing consumers and businesses with a range of domestic energy options that are affordable, reliable, and secure. The FOA will advance DOE's Bioenergy Technology Office's objectives to reduce the price of drop-in biofuels, lower the cost of biopower, and enable high-value products from biomass or waste resources.

- \$33.5 million for [Advanced Building Construction with Energy Efficient Technologies and Practices](#);
- [\\$89 million from the Advanced Manufacturing Office](#).

These solicitations "include new focus areas or increased participation for universities and are some of the last major FY 2019 DOE funding opportunities." They are also "the first to apply the cost-share waiver for universities and non-profit organizations" enacted last year. "The purpose of this new policy is to allow institutions and organizations that have innovative research and technology ideas but have not been able to meet the cost-share requirements to apply for applied energy funding opportunities. However, Lewis-Burke recommends that universities still provide as close to 20 percent cost-share as possible to increase the likelihood of success."

---

## **Webinar and Events**

**Event: Senior Bringing Your Big Idea to Life: What You Need to Know About Launching a Startup**

**Sponsor: IEEE On Demand**

**When: June 18, 2019; 2.00 PM eastern time**

**Website:**

[https://event.on24.com/eventRegistration/EventLobbyServlet?target=reg20.jsp&partnerref=Email2&et\\_rid=2035965180&et\\_mid=83891512&eventid=2008254&sessionid=1&key=422C2A1ACE74E2FC86E819CB16832018&regTag=&sourcepage=register](https://event.on24.com/eventRegistration/EventLobbyServlet?target=reg20.jsp&partnerref=Email2&et_rid=2035965180&et_mid=83891512&eventid=2008254&sessionid=1&key=422C2A1ACE74E2FC86E819CB16832018&regTag=&sourcepage=register)

**Brief Description:** Have you always thought about launching a company? Start-ups are risky. If they weren't, anyone could be a successful entrepreneur. According to October 2017 data from Statista, Uber, Xiaomi, SpaceX, Pinterest, and Airbnb were among the highest valued startup companies in the world. Uber was valued at about \$68 billion by venture-capital firms. The performance of companies like Uber and AirBnb supports the frequency of startups that look to gain profit from the global sharing economy. By 2020, the number of sharing economy users in the United States is poised to increase to 40 million. A key success factor for startups will be their ability to gain customers from different age groups. They'll also need to convince people to abandon a traditional market model, which can be challenging, but as AirBnb proved, very beneficial.

But there's always a chance your startup will fail, and nobody wants to see that happen. That's why we're offering this webinar.

Join us as we explore various start-up companies and provide you with knowledge and background to get into the game. We'll look at start-ups like Apple, PayPal, Jawbone, and Space-X, as well as the dot.com fiasco, to see what went right or what was disastrous. We'll focus on considerations such as the impact of the management team, product/market fit and scarce funding. After, we'll open the webinar up to the experts: people who are heavily involved in technology start-up companies. You'll have the opportunity to ask them anything and benefit from their experiences!

**To Join the Webinar:** Please register at the above website

**Event: Webinar: What Happens When Wind and Solar Win on Price?**

**Sponsor: Advanced Energy Economy**

**When: June 25, 2019; 2.00 PM – 3.00 PM**

**Website:** [https://info.aee.net/wind-and-solar-win-on-price-webinar?utm\\_campaign=Webinars&utm\\_medium=email&hsenc=p2ANqtz--juMK1H53ljedWsojNENIOLjBhSgsP44thc9xgtdQxuQi5044TZQI3aomuIqkJps3lfnK1EtWVym3MtSpw9bQsBYptmQ&hsmi=73560997&utm\\_content=73560997&utm\\_source=hs\\_email&hsCtaTracking=e49209d0-5c12-464f-9807-262328b6021e%7C74a69edd-d3c5-433a-a1f7-77e628856c7c](https://info.aee.net/wind-and-solar-win-on-price-webinar?utm_campaign=Webinars&utm_medium=email&hsenc=p2ANqtz--juMK1H53ljedWsojNENIOLjBhSgsP44thc9xgtdQxuQi5044TZQI3aomuIqkJps3lfnK1EtWVym3MtSpw9bQsBYptmQ&hsmi=73560997&utm_content=73560997&utm_source=hs_email&hsCtaTracking=e49209d0-5c12-464f-9807-262328b6021e%7C74a69edd-d3c5-433a-a1f7-77e628856c7c)

**Description:** Due to rapidly declining wind and solar costs, renewables are increasingly becoming the cheapest long-term option for energy supply across the country. How are utilities changing their resource planning to account for these trends? What do regulators need to know to oversee a more renewables-heavy power system? What are the opportunities and challenges for renewable energy developers as wind and solar become the primary sources of power? In this webinar, we'll discuss the changing economics of energy, and what the changing resource landscape means for utilities, regulators, and developers.

**Panelists:**

- **Mike Hooper**, Senior Vice President, Regulatory Affairs, Legislative Affairs and Strategy, Northern Indiana Public Service Co. (NIPSCO)
- **Matt Langley**, Vice President of Origination and Market Intelligence, Pattern Energy
- **Ron Lehr**, former Chairman, Colorado Public Utilities Commission
- **Mike O'Boyle**, Director of Electricity Policy, Energy Innovation
- **Hannah Polikov**, Managing Director, AEE (moderator)

**To Join the Webinar:** Please register at the above website

**Event: Presidential Awards for Excellence in Mathematics and Science Teaching - National Selection Committee**

**Sponsor: NSF**

**When: Various (see below); 9.00 AM – 5.00 PM**

**Website:** [https://www.nsf.gov/events/event\\_summ.jsp?cntn\\_id=298140&org=NSF](https://www.nsf.gov/events/event_summ.jsp?cntn_id=298140&org=NSF)

**Description:** The 2019 National Selection Committee (NSC) for the Presidential Awards for Excellence in Mathematics and Science Teaching (PAEMST; [www.paemst.org](http://www.paemst.org)) will be taking place during the months of July and August.

NSC panels reflect a wide range of panelists, including K-12 teachers and administrators; science, mathematics, and STEM education researchers; university professors; and others with the expertise to distinguish exceptional teaching.

Individuals interested in serving as an NSC panelist for any of the below panels, please complete the [NSC Reviewer Interest Form](#).

The dates for the panels are as follows:

- Thursday and Friday, July 25-26
- Monday and Tuesday, July 29-30
- Thursday and Friday, August 1-2

- Monday and Tuesday, August 5-6
- Thursday and Friday, August 8-9

NSF manages PAEMST on behalf of the White House Office of Science and Technology Policy.

---

## **Grant Opportunities**

### **National Science Foundation**

#### **Grant Program: Advanced Computing Systems & Services: Adapting to the Rapid Evolution of Science and Engineering Research**

**Agency: National Science Foundation NSF 19-587**

**RFP Website:** <https://www.nsf.gov/pubs/2019/nsf19587/nsf19587.htm>

**Brief Description:** The intent of this solicitation is to request proposals from organizations willing to serve as service providers (SPs) within the NSF Innovative High-Performance Computing (HPC) program to provide advanced cyberinfrastructure (CI) capabilities and/or services in production operations to support the full range of computational- and data-intensive research across all of science and engineering (S&E). The current solicitation is intended to complement previous NSF investments in advanced computational infrastructure by provisioning resources, broadly defined in this solicitation to include systems and/or services, in two categories:

- Category I, Capacity Systems: production computational resources maximizing the capacity provided to support the broad range of computation and data analytics needs in S&E research; and
- Category II, Innovative Prototypes/Testbeds: innovative forward-looking capabilities deploying novel technologies, architectures, usage modes, etc., and exploring new target applications, methods, and paradigms for S&E discoveries.

Resources supported through awards from this solicitation will be incorporated into and allocated as part of NSF's Innovative HPC program. This program complements investments in [leadership-class computing](#) and funds a federation of nationally-available HPC resources that are technically diverse and intended to enable discoveries at a computational scale beyond the research of individual or regional academic institutions. NSF anticipates that at least 90% of the provisioned system or services will be available to the S&E community through an open peer-reviewed national allocation process and be supported by community and other support services [such as those currently supported through eXtreme Science and Engineering Discovery Environment (XSEDE) 2.0 project-managed allocations recommended by the XSEDE Resource Allocation Committee (XRAC), and other activities intended to foster efficient coordination across resources], or an NSF-approved alternative that may emerge. If this is not feasible for the proposed system/services, proposers must clearly explain in detail why this is the case and how they intend to make the proposed system/services available to the national S&E community.

**Awards:** Cooperative Agreements. Anticipated funding available: \$5,000,000 to \$10,000,000 per award. A total of \$30,000,000 is available for this solicitation, subject to the availability of funds. It is anticipated that 1-2 awards will be made in Category I at up to \$10,000,000 per award for up to five years and up to 1-2 awards in Category II at up to \$5,000,000 per award for up to five years.

**Letter of Intent:** Not Required

**Limit on Number of Proposals per Organization: 1**

**Proposal Submission Deadline:** November 05, 2019

**Contacts:** Robert Chaddock, Program Director, CISE/OAC, telephone: (703) 292-8970, email: [rchadduc@nsf.gov](mailto:rchadduc@nsf.gov)

- Alejandro M. Suarez, Assistant Program Director, CISE/OAC, telephone: (703) 292-7092, email: [alsuarez@nsf.gov](mailto:alsuarez@nsf.gov)

- Edward Walker, Program Director, CISE/OAC, telephone: (703) 292-4863, email: [edwalker@nsf.gov](mailto:edwalker@nsf.gov)

## **Grant Program: International Research Experiences for Students (IRES)**

**Agency: National Science Foundation NSF 19-585**

**RFP Website:** <https://www.nsf.gov/pubs/2019/nsf19585/nsf19585.htm>

**Brief Description:** The International Research Experiences for Students (IRES) program supports international research and research-related activities for U.S. science and engineering students. The IRES program contributes to development of a diverse, globally-engaged workforce with world-class skills. IRES focuses on active research participation by undergraduate or graduate students in high quality international research, education and professional development experiences in NSF-funded research areas.

The overarching, long-term goal of the IRES program is to enhance U.S. leadership in research and education and to strengthen economic competitiveness through training the next generation of research leaders.

This solicitation features three mechanisms; proposers are required to select one of the following tracks to submit their proposal.

Track I focuses on the development of world-class research skills in international cohort experiences. Track II is dedicated to targeted, intensive learning and training opportunities that leverage international knowledge at the frontiers of research. Track III supports U.S. institutional collaborations to develop, implement and evaluate innovative models for high-impact, large-scale international research and professional development experiences for U.S. graduate students.

Student participants supported by IRES funds must be citizens, nationals, or permanent residents of the United States.

Students do not apply directly to NSF to participate in IRES activities. Students apply to NSF-funded investigators who receive IRES awards. To identify appropriate IRES projects, students should consult the directory of active [IRES awards](#).

All PIs, co-PIs and Senior Personnel on IRES proposals must be from U.S. based institutions.

1. **IRES - Track I: *IRES Sites (IS)*** projects engage a group of undergraduate and/or graduate students in active high-quality collaborative research at an international site with mentorship from researchers at a host lab. IRES Sites must be organized around a coherent intellectual theme that may involve a single discipline or multiple disciplines funded by NSF.
2. **IRES - Track II: *Advanced Studies Institutes (ASI)*** are intensive short courses with related activities that engage advanced graduate students in active learning and research at the frontiers of knowledge. ASIs typically range in length from ten to twenty-one days and must be held outside the United States. ASIs must have a compelling rationale for their international location and should involve distinguished active researchers in the target field from the U.S. and abroad. ASIs should enable students to develop skills and broaden professional networks, leveraging international participation and complementary resources (expertise, facilities, data, field site, etc.) for mutual benefit.
3. **IRES - Track III: *New Concepts in International Graduate Experience (IGE)*** The IGE IRES track invites teams of PIs to propose, implement, evaluate and disseminate innovative large-scale programs (models) for providing high-quality international research and research-related professional development experiences to U.S. graduate students. The PIs should explain how their innovative program (model) could potentially be adaptable beyond the immediate disciplinary fields involved in their proposal. The proposals should be designed from the viewpoint of graduate-level STEM research/training, and globally engaged STEM workforce development. The

proposals should be grounded in relevant literature on graduate STEM research/training, education, and graduate level international experiences.

U.S. graduate students recruited from a broad, diverse applicant pool should travel to non-U.S. locations for periods of several weeks to a semester for immersive experiences under the mentorship of appropriate collaborators. The proposed international graduate research experience model may focus on research and research-related activities in any NSF-funded area(s). Proposals that utilize, leverage and expand existing global networks and infrastructure are strongly encouraged.

**Awards:** Standard Grant or Continuing Grant

**Estimated Number of Awards:**

30 to 35

**Track- I: IRES Sites.** Approximately 20-25 awards will be made in FY 2020, pending quality of proposals and availability of funds.

**Track- II: Advanced Studies Institutes.** Approximately 5-7 awards will be made in FY 2020 pending quality of proposals and availability of funds.

**Track- III: New Concepts in International Graduate Experience.** Approximately 3-5 awards will be made in FY 2020, pending quality of proposals and availability of funds.

**Anticipated Funding Amount:** \$13,000,000 in FY 2020, pending availability of funds.

**Track- I: IRES Sites.** Up to \$300,000 per award. For exceptionally creative proposals, awards up to \$400,000 will be considered.

**Track- II: Advanced Studies Institutes.** Typically, an average ASI budget is \$150,000 for each institute. Proposals involving a series of institutes are permitted when well-justified. The overall total budget for Track II proposals should not exceed \$400,000.

**Track- III: New Concepts in International Graduate Experience.** Up to \$1,000,000 per award. Smaller budgets (\$400,000 - \$600,000) appropriate for highly innovative models that may serve as pilots.

**Letter of Intent:** Not Required

**Proposal Submission Deadline:**

September 10, 2019

Second Tuesday in September, Annually Thereafter

Track - I: IRES Sites

September 17, 2019

Third Tuesday in September, Annually Thereafter

Track-II: Advanced Studies Institutes

September 24, 2019

Fourth Tuesday in September, Annually Thereafter

Track - III: New Concepts in International Graduate Experience

**Contacts:** Maija M. Kukla, telephone: (703) 292-4940, email: [mkukla@nsf.gov](mailto:mkukla@nsf.gov)

**Grant Program: Opportunities for Promoting Understanding through Synthesis (OPUS)**

**Agency: National Science Foundation NSF 19-584**

**RFP Website:** <https://www.nsf.gov/pubs/2019/nsf19584/nsf19584.htm>

**Brief Description:** The OPUS program seeks to provide opportunities for mid- to later-career investigators to develop new understanding of science in the fields supported by the Division of Environmental Biology (DEB) through two tracks of synthesis activities.

**OPUS: Mid-Career Synthesis.** This track aims to provide a mid-career researcher, defined as a candidate at the associate professor rank (or equivalent), with new capabilities to enhance their productivity, improve their retention as a scientist, and ensure a diverse scientific workforce that remains engaged in active research (including more women and minorities at high academic ranks). This track provides an

opportunity for the mid-career scientist to enable a new synthesis of their ongoing research. Synthesis is achieved by developing new research capabilities through collaboration with a mentor to enable new understanding of the research system and questions of interest.

**OPUS: Core Research Synthesis.** This track provides an opportunity for an individual or a group of investigators to revisit and synthesize a significant body of their prior research in a way that will enable new understanding of their research system and questions of interest. This track would also be appropriate early enough in a career to produce unique, integrated insight useful both to the scientific community and to the development of the investigator's future career.

All four clusters within the Division of Environmental Biology (Ecosystem Science, Evolutionary Processes, Population and Community Ecology, and Systematics and Biodiversity Science) encourage the submission of these proposals enabling researchers to expand understanding and develop new insights in their research.

**Awards:** Standard Grants. Annually. Anticipated award size is \$175,000-\$350,000

**Letter of Intent:** Not Required

**Proposal Submission Deadline:** August 28, 2019

**Contacts:** George W. Gilchrist, telephone: (703) 292-7138, email: [ggilchri@nsf.gov](mailto:ggilchri@nsf.gov)

### **Grant Program: NSF Convergence Accelerator**

**Agency: National Science Foundation NSF PD 19-095Y**

**RFP Website:**

[https://www.nsf.gov/funding/pgm\\_summ.jsp?pims\\_id=505665&org=NSF&sel\\_org=NSF&from=fund](https://www.nsf.gov/funding/pgm_summ.jsp?pims_id=505665&org=NSF&sel_org=NSF&from=fund)

**Brief Description:** With the NSF Convergence Accelerator, NSF's goals are: (i) to pilot a new NSF capability to accelerate use-inspired convergence research in areas of national importance, and (ii) to initiate convergence team-building capacity around exploratory, potentially high-risk proposals in specific convergence topics (tracks). The NSF Convergence Accelerator supports use-inspired, goal-oriented, basic research, encouraging rapid advances through partnerships that include multiple stakeholders (e.g., industry, academic, not-for-profits, government entities, and others). The NSF Convergence Accelerator brings teams together in a cohort that are all focused on a common research goal of national importance, but which may be pursuing many different approaches.

As a funder of research and education across all fields of science and engineering and with relationships with universities and funding agencies around the world, NSF is uniquely positioned to pilot this approach to accelerate discovery and innovation. Teams supported by the NSF Convergence Accelerator will focus on grand challenges that require a convergence approach. The teams are multidisciplinary and leverage partnerships; tracks within the NSF Convergence Accelerator relate to a grand challenge problem and have a high probability of resulting in deliverables that will benefit society within a fixed term. The NSF Convergence Accelerator is modeled on acceleration and innovation activities from the most forward-looking companies and universities.

Specific funding opportunities will be announced through Dear Colleague Letters, program announcements, and/or solicitations. For more information see the NSF Convergence Accelerator website: <https://www.nsf.gov/od/oia/convergence-accelerator/index.jsp>

**Awards:** Standard Grants.

**Letter of Intent:** Not Required

**Proposal Submission Deadline:** Accepted anytime

**Contacts:** Douglas Maughan [dmaughan@nsf.gov](mailto:dmaughan@nsf.gov) 703-292-2497

Lara A. Campbell [lcampbel@nsf.gov](mailto:lcampbel@nsf.gov) (703) 292-7049

**Grant Program: Innovative Technology Experiences for Students and Teachers (ITEST)**

**Agency: National Science Foundation NSF 19-583**

**RFP Website:** <https://www.nsf.gov/pubs/2019/nsf19583/nsf19583.htm>

**Brief Description:** ITEST is an applied research and development (R&D) program providing direct student learning opportunities in pre-kindergarten through high school (PreK-12). The learning opportunities are based on innovative use of technology to strengthen knowledge and interest in science, technology, engineering, and mathematics (STEM) and information and communication technology (ICT) careers. To achieve this purpose, ITEST supports projects that engage students in technology-rich experiences that: (1) increase awareness and interest of STEM and ICT occupations; (2) motivate students to pursue appropriate education pathways to those occupations; and (3) develop STEM-specific disciplinary content knowledge and practices that promote critical thinking, reasoning, and communication skills needed for entering the STEM and ICT workforce of the future.

ITEST seeks proposals that pursue innovative instructional approaches and practices in formal and informal learning environments, in close collaboration with strategic partnerships. ITEST proposals should broaden participation of all students, particularly those in underrepresented and underserved groups in STEM fields and related education and workforce domains. ITEST supports three types of projects: (1) Exploring Theory and Design Principles (ETD); (2) Developing and Testing Innovations (DTI); and (3) Scaling, Expanding, and Iterating Innovations (SEI). ITEST also supports Synthesis and Conference proposals.

**Awards:** Standard Grants.

**Anticipated Funding Amount:** \$25,000,000

**Letter of Intent:** Not Required

**Proposal Submission Deadline:** August 19, 2019

**Contacts:** Address questions to the Program, telephone: (703) 292-8620, email: [DRLITEST@nsf.gov](mailto:DRLITEST@nsf.gov)

---

**Grant Program: Research Experiences for Undergraduates (REU) Sites and Supplements**

**Agency: National Science Foundation NSF 19-582**

**RFP Website:** <https://www.nsf.gov/pubs/2019/nsf19582/nsf19582.htm>

**Brief Description:** The Research Experiences for Undergraduates (REU) program supports active research participation by undergraduate students in any of the areas of research funded by the National Science Foundation. REU projects involve students in meaningful ways in ongoing research programs or in research projects specifically designed for the REU program. This solicitation features two mechanisms for support of student research: (1) *REU Sites* are based on independent proposals to initiate and conduct projects that engage a number of students in research. REU Sites may be based in a single discipline or academic department or may offer interdisciplinary or multi-department research opportunities with a coherent intellectual theme. Proposals with an international dimension are welcome. (2) *REU Supplements* may be included as a component of proposals for new or renewal NSF grants or cooperative agreements or may be requested for ongoing NSF-funded research projects.

Undergraduate student participants in either REU Sites or REU Supplements must be U.S. citizens, U.S. nationals, or permanent residents of the United States.

Students do not apply to NSF to participate in REU activities. Students apply directly to REU Sites or to NSF-funded investigators who receive REU Supplements. To identify appropriate REU Sites, students should consult the directory of active REU Sites on the Web

at [https://www.nsf.gov/crssprgm/reu/reu\\_search.cfm](https://www.nsf.gov/crssprgm/reu/reu_search.cfm).

**Awards:** Standard Grants. **Estimated Number of Awards:** 1,750 to 1,800

This estimate includes approximately 180 new Site awards and 1,600 new Supplement awards each year.

**Anticipated Funding Amount:** \$76,370,000  
**Letter of Intent:** Not Required  
**Proposal Submission Deadline:** August 28, 2019  
**Contacts:** [NSF REU Site Contacts](#)

---

**Grant Program: Computer and Information Science and Engineering (CISE) Research Initiation Initiative (CRII)**

**Agency:** National Science Foundation NSF 19-579

**RFP Website:** <https://www.nsf.gov/pubs/2019/nsf19579/nsf19579.htm>

**Brief Description:** The NSF Directorate for Computer and Information Science and Engineering (CISE) seeks to award grants intended to support research independence among early-career academicians who specifically lack access to adequate organizational or other resources. It is expected that funds obtained through this program will be used to support untenured faculty or research scientists (or equivalent) in their first three years in a primary academic position after the PhD, but not more than five years after completion of their PhD. Applicants for this program may not yet have received any other grants or contracts in the PI role from any department, agency, or institution of the federal government, including from the CAREER program or any other program, post-PhD, regardless of the size of the grant or contract, with certain exceptions as noted below. Serving as co-PI, Senior Personnel, Postdoctoral Fellow, or other Fellow does not count against this eligibility rule.

Importantly, the CRII program seeks to provide essential resources to enable early-career PIs to launch their research careers. For the purposes of this program, CISE defines “essential resources” as those that (a) the PI does not otherwise have, including through organizational or other funding and (b) are critical for the PI to conduct early-career research that will enable research independence. In particular, this program is not appropriate for PIs who already have access to resources to conduct any early-career research.

It is expected that these funds will allow the new CRII PI to support one or more graduate students for up to two years. Faculty at undergraduate and two-year institutions may use funds to support undergraduate students, and may use the additional RUI designation (which requires inclusion of a RUI Impact Statement) -- see [https://www.nsf.gov/funding/pgm\\_summ.jsp?pims\\_id=5518](https://www.nsf.gov/funding/pgm_summ.jsp?pims_id=5518) for additional information. In addition, submissions from all institutions may use funds for postdoctoral scholars, travel, and/or research equipment.

**Awards:** Standard Grant. Each award will be up to \$175,000 for a period of 24 months. Anticipated Funding: \$10,000,000.

**Letter of Intent:** Not Required

**Proposal Submission Deadline:** August 14, 2019

**Contacts:** Almadena Y. Chtchelkanova, Program Director, CCF, telephone: (703) 292-8910, email: [achtchel@nsf.gov](mailto:achtchel@nsf.gov)

**Grant Program: Physics Frontiers Centers (PFC)**

**Agency:** National Science Foundation NSF 19-578

**RFP Website:** <https://www.nsf.gov/pubs/2019/nsf19578/nsf19578.htm>

**Brief Description:** The Physics Frontiers Centers (PFC) program supports university-based centers and institutes where the collective efforts of a larger group of individuals can enable transformational advances in the most promising research areas. The program is designed to foster major breakthroughs at

the intellectual frontiers of physics by providing needed resources such as combinations of talents, skills, disciplines, and/or specialized infrastructure, not usually available to individual investigators or small groups, in an environment in which the collective efforts of the larger group can be shown to be seminal to promoting significant progress in the science and the education of students. Activities supported through the program are in all sub-fields of physics within the purview of the Division of Physics: atomic, molecular, optical, plasma, elementary particle, nuclear, particle astro-, gravitational, and biological physics. Interdisciplinary projects at the interface between these physics areas and other disciplines and physics sub-fields may also be considered, although the bulk of the effort must fall within one of those areas within the purview of the Division of Physics. The successful PFC activity will demonstrate: (1) the potential for a profound advance in physics; (2) creative, substantive activities aimed at enhancing education, diversity, and public outreach; (3) potential for broader impacts, e.g., impacts on other field(s) and benefits to society; (4) a synergy or value-added rationale that justifies a center- or institute-like approach.

**Awards:** Cooperative Agreement. Anticipated Funding: \$8,000,000. Individual PFC awards are expected to range in size between \$1.0 million/year and \$5.0 million/year. The number of awards in FY 2020 is expected to be in the range 3-5, depending upon the availability of funds and the quality of proposals received. Awards will be made for five years, with an option for a one-year extension.

**Letter of Intent:** Not Required

**Limit on Number of Proposals per Organization:** 2; No more than two preliminary proposals may be submitted by any one institution. The same limitation applies to full proposals.

**Preliminary Proposal Due Date(s) (required) (due by 5 p.m. submitter's local time):** August 01, 2019

**Full Proposal Deadline(s) (due by 5 p.m. submitter's local time):** January 30, 2020; by invitation only.

**Contacts:** Jean Cottam Allen, Program Director, telephone: (703) 292-8783, email: [jcallen@nsf.gov](mailto:jcallen@nsf.gov)

- Kathleen McCloud, Program Director, telephone: (703) 292-8236, email: [kmcccloud@nsf.gov](mailto:kmcccloud@nsf.gov)

### **Grant Program: Division of Chemistry: Disciplinary Research Programs (CHE-DRP)**

**Agency:** National Science Foundation NSF 19-577

**RFP Website:** <https://www.nsf.gov/pubs/2019/nsf19577/nsf19577.htm>

**Brief Description:** This solicitation applies to nine CHE Disciplinary Chemistry Research Programs: Chemical Catalysis (CAT); Chemical Measurement and Imaging (CMI); Chemical Structure, Dynamics and Mechanisms-A (CSDM-A); Chemical Structure Dynamics and Mechanisms-B (CSDM-B); Chemical Synthesis (SYN); Chemical Theory, Models and Computational Methods (CTMC); Chemistry of Life Processes (CLP); Environmental Chemical Sciences (ECS); and Macromolecular, Supramolecular and Nanochemistry (MSN).

All proposals submitted to these nine CHE Disciplinary Research Programs (other than the following exceptions) must be submitted through this solicitation, otherwise they will be returned without review.

Exceptions:

- Faculty Early Career Development Program (CAREER) proposals should be submitted through the CAREER solicitation ([https://www.nsf.gov/funding/pgm\\_summ.jsp?pims\\_id=503214](https://www.nsf.gov/funding/pgm_summ.jsp?pims_id=503214)) by the CAREER deadline date specified.
- Facilitating Research at Primarily Undergraduate Institutions: Research in Undergraduate Institutions (RUI) and Research Opportunity Awards (ROA) proposals should be submitted through the RUI/ROA solicitation ([https://www.nsf.gov/funding/pgm\\_summ.jsp?pims\\_id=5518](https://www.nsf.gov/funding/pgm_summ.jsp?pims_id=5518)) during the window for the appropriate CHE Disciplinary Research Program. In addition to the requirements of the RUI program, proposals should follow the guidance in this solicitation.
- Proposals for Early-concept Grants for Exploratory Research (EAGER), Grants for Rapid Response Research (RAPID), Research Advanced by Interdisciplinary Science and Engineering

(RAISE), and conferences can be submitted anytime after consultation with the cognizant NSF Program Officer.

- Supplemental funding requests to existing grants can be submitted anytime after consultation with the cognizant NSF Program Officer.

**Awards:** Standard Grant. Anticipated Funding: \$150,000,000.

**Letter of Intent:** Not Required

**Proposal Submission Deadline:** September 01, 2019 - September 30, 2019

**Contacts:** For CTMC: Evelyn Goldfield, telephone: (703) 292-2173, email: [egoldfie@nsf.gov](mailto:egoldfie@nsf.gov)

- For CLP: Catalina Achim, telephone: (703) 292-2048, email: [cachim@nsf.gov](mailto:cachim@nsf.gov)
- For CSDM-A: Colby A. Foss, telephone: (703) 292-5327, email: [cfoss@nsf.gov](mailto:cfoss@nsf.gov)
- For CMI: Kelsey D. Cook, telephone: (703) 292-7490, email: [kcook@nsf.gov](mailto:kcook@nsf.gov)
- For CSDM-B: Tingyu Li, telephone: (703) 292-4949, email: [tli@nsf.gov](mailto:tli@nsf.gov)

## **Grant Program: Centers for Chemical Innovation (CCI): Phase I Awards and New/Renewal Phase II Centers**

**Agency:** National Science Foundation NSF 19-576

**RFP Website:** <https://www.nsf.gov/pubs/2019/nsf19576/nsf19576.htm>

**Brief Description:** The Centers for Chemical Innovation (CCI) Program supports research centers focused on major, long-term fundamental chemical research challenges. CCIs that address these challenges will produce transformative research, lead to innovation, and attract broad scientific and public interest. CCIs are agile structures that can respond rapidly to emerging opportunities through enhanced collaborations. CCIs integrate research, innovation, education, broadening participation, and informal science communication.

The CCI Program is a two-phase program. Both phases are described in this solicitation. Phase I CCIs receive significant resources to develop the science, management and broader impacts of a major research center before requesting Phase II funding. Satisfactory progress in Phase I is required for Phase II applications; Phase I proposals funded in FY 2020 will seek Phase II funding in FY 2023. The FY 2020 Phase I CCI competition is open to projects in all fields supported by the Division of Chemistry, and must have scientific focus and the potential for transformative impact in chemistry. *NSF Chemistry particularly encourages fundamental chemistry projects related to one or more of NSF's [10 Big Ideas](#).*

The FY 2020 Phase II CCI competition is open to projects funded as Phase I awards in FY 2017 and the renewal of the Center for Sustainable Nanotechnology.

**Awards:** Standard Grant. Anticipated Funding: \$17,400,000.

**Letter of Intent:** Not Required

**Preliminary Proposal Due Date(s) (required) (due by 5 p.m. submitter's local time):**

August 13, 2019: Phase I Preliminary Proposals

**Full Proposal Deadline(s) (due by 5 p.m. submitter's local time):**

October 16, 2019: Phase II Full Proposals, New and Renewal

February 19, 2020: Phase I Full Proposals, by invitation only

**Contacts:** Michelle M. Bushey, telephone: (703) 292-4938, email: [mbushey@nsf.gov](mailto:mbushey@nsf.gov)

- Katharine J. Covert, telephone: (703) 292-4950, email: [kcovert@nsf.gov](mailto:kcovert@nsf.gov)

## **Grant Program: Methodology, Measurement, and Statistics (MMS)**

**Agency:** National Science Foundation NSF 19-575

**RFP Website:** <https://www.nsf.gov/pubs/2019/nsf19575/nsf19575.htm>

**Brief Description:** The Methodology, Measurement, and Statistics (MMS) Program is an interdisciplinary program in the Directorate for Social, Behavioral, and Economic Sciences that supports the development of innovative analytical and statistical methods and models for those sciences. MMS seeks proposals that are methodologically innovative, grounded in theory, and have potential utility for multiple fields within the social, behavioral, and economic sciences. As part of its larger portfolio, the MMS Program partners with a consortium of federal statistical agencies to support research proposals that further the production and use of official statistics.

The MMS Program provides support through a number of different funding mechanisms. The following mechanisms are addressed in this solicitation:

- Regular Research Awards
- Awards for conferences and community-development activities
- Doctoral Dissertation Research Improvement (DDRI) Grants
- Research Experience for Undergraduates (REU) Supplements

MMS also supports Faculty Early Career Development (CAREER) awards. Please see the [CAREER Program Web Site](#) for more information about this activity.

**Awards:** Standard Grant. Anticipated Funding: \$3,760,000.

**Letter of Intent:** Not Required

**Proposal Submission Deadline:** August 29, 2019

**Contacts:** Cheryl L. Eavey - Program Director, telephone: (703) 292-7269, email: [ceavey@nsf.gov](mailto:ceavey@nsf.gov)

- Liana A. Denola - Social Scientist, telephone: (703) 292-2675, email: [ldenola@nsf.gov](mailto:ldenola@nsf.gov)
- Robbie W. Brown - Program Specialist, telephone: (703) 292-7264, email: [rbrown@nsf.gov](mailto:rbrown@nsf.gov)

## **Grant Program: Secure and Trustworthy Cyberspace Frontiers (SaTC Frontiers)**

**Agency: National Science Foundation NSF 19-572**

**RFP Website:** <https://www.nsf.gov/pubs/2019/nsf19572/nsf19572.htm>

**Brief Description:** In today's increasingly networked, distributed, and asynchronous world, cybersecurity involves hardware, software, networks, data, people, and integration with the physical world. Society's overwhelming reliance on this complex cyberspace, however, has exposed its fragility and vulnerabilities that defy existing cyber-defense measures; corporations, agencies, national infrastructure and individuals continue to suffer cyber-attacks. Achieving a truly secure cyberspace requires addressing both challenging scientific and engineering problems involving many components of a system, and vulnerabilities that stem from human behaviors and choices. Examining the fundamentals of security and privacy as a multidisciplinary subject can lead to fundamentally new ways to design, build and operate cyber systems, protect existing infrastructure, and motivate and educate individuals about cybersecurity. The Secure and Trustworthy Cyberspace (SaTC) program welcomes proposals that address cybersecurity and privacy, and draw on expertise in one or more of these areas: computing, communication and information sciences; engineering; economics; education; mathematics; statistics; and social and behavioral sciences. Proposals that advance the field of cybersecurity and privacy within a single discipline or interdisciplinary efforts that span multiple disciplines are both encouraged.

Through this solicitation—under the SaTC umbrella—NSF specifically seeks ambitious and potentially transformative **center-scale projects** in the area of security and privacy that (1) catalyze far-reaching research explorations motivated by deep scientific questions or hard problems and/or by compelling applications and novel technologies that promise significant scientific and/or societal benefits, and (2) stimulate significant research and education outcomes that, through effective knowledge transfer mechanisms, promise scientific, economic and/or other societal benefits. The goal of the SaTC Frontiers program is to advance the frontiers of cybersecurity and privacy, and the areas listed in the [SaTC program solicitation](#) are meant to be illustrative but not exhaustive.

**Awards:** Continuing Grant. The SaTC Frontiers program will support proposals from \$5,000,000 to \$10,000,000 in total budget, with durations of up to five years. Anticipated Funding: \$15,000,000.

**Letter of Intent:** July 05, 2019

**Proposal Submission Deadline:** September 30, 2019

**Contacts:** Nina Amla, Program Director, CISE/CCF, telephone: (703) 292-7991, email: [namla@nsf.gov](mailto:namla@nsf.gov)

- Shannon I. Beck, Associate Program Director, CISE/CNS, (703) 292-2487, email: [sbeck@nsf.gov](mailto:sbeck@nsf.gov)

## **National Institutes of Health**

**Grant Program: Bridges to the Doctorate Research Training Program (T32)**

**Agency: National Institutes of Health PAR-19-300**

**RFP Website:** <https://grants.nih.gov/grants/guide/pa-files/PAR-19-300.html>

**Brief Description:** The **Overarching Objective** of this Bridges to the Doctorate Research Training program is to develop a diverse pool of well-trained Ph.D. biomedical scientists, who have the following technical, operational, and professional skills:

- A broad understanding across biomedical disciplines and the skills to independently acquire the knowledge needed to advance their chosen fields;
- The ability to think critically and independently, and to identify important biomedical research questions and approaches that push forward the boundaries of their areas of study;
- A strong foundation in scientific reasoning, rigorous research design, experimental methods, quantitative and computational approaches, and data analysis and interpretation;
- A commitment to approaching and conducting biomedical research responsibly, ethically, and with integrity;
- Experience initiating, conducting, interpreting, and presenting rigorous and reproducible biomedical research with increasing self-direction;
- The ability to work effectively in teams with colleagues from a variety of cultural and scientific backgrounds, and to promote inclusive and supportive scientific research environments;
- The skills to teach and communicate scientific research methodologies and findings to a wide variety of audiences (e.g., discipline-specific, across disciplines, and the public); and
- The knowledge, professional skills and experiences required to identify and transition into careers in the biomedical research workforce (i.e., the breadth of careers that sustain biomedical research in areas that are relevant to the NIH mission).

Diversity at all levels—from the kinds of science to the regions in which it is conducted to the backgrounds of the people conducting it—contributes to excellence in research training environments and strengthens the research enterprise. This FOA is intended to support outstanding research training programs that will enhance diversity at all levels. As part of a larger initiative to enhance diversity, the Bridges to the Doctorate Research Training program will support trainees enrolled full-time at institutions with terminal master's degrees in the biomedical sciences to transition into and complete biomedically relevant Ph.D. programs within partnering research-intensive institutions.

**Award:** Application budgets are not limited but need to reflect the actual needs of the proposed project. NIGMS expects to fund programs at or below 15 trainees, as appropriate to the institutional capabilities.

**Letter of Intent:** Not required

**Deadline:** September 25, 2019; September 25, 2020; September 27, 2021, by 5:00 PM local time of applicant organization. All [types of non-AIDS applications](#) allowed for this funding opportunity announcement are due on these dates.

Applicants are encouraged to apply early to allow adequate time to make any corrections to errors found in the application during the submission process by the due date.

---

**Grant Program: Mechanistic Basis of Diffuse White Matter Disease in Vascular Contributions to Cognitive Impairment and Dementia (VCID)(R01 Clinical Trial Not Allowed)**

**Agency: National Institutes of Health RFA-NS-19-039**

**RFP Website:** <https://grants.nih.gov/grants/guide/rfa-files/RFA-NS-19-039.html>

**Brief Description:** Projects that elucidate cellular and molecular causes, progression and neural consequences of diffuse white matter disease including deep, small vessel cerebrovascular disease such as multifocal, small, silent brain infarcts frequently associated with VCID are within the scope of this FOA. Diffuse white matter disease preferentially affects deep brain regions, and as such has been more difficult to study than cortical based vascular or tissue pathology. Applications may focus on diffuse white matter disease extending out from the periventricular surfaces, diffuse white matter disease in subcortical white matter, or diffuse white matter disease that is accompanied by arteriosclerosis in deep penetrating arteries and with multiple infarcts in the basal ganglia, brainstem or cerebellum. This FOA specifically promotes research utilizing methods that can address mechanisms of pathological events in vessels and tissue that were previously poorly accessible and therefore may not have been as well studied, such as periventricular white matter, basal ganglia, brainstem, deep cerebellum or subcortical white matter. Applications may use (or further develop) state of the art and emergent technologies that are poised to advance mechanistic understanding of diffuse white matter disease in VCID. Accordingly, new tools, some developed as part of the [BRAIN Initiative](#), may be useful to approach the scientific questions posed by this FOA.

Proposed research may be performed using model systems, including in vivo and ex vivo models, as well as models established using cells, including but not limited to human cells.

Human subjects research may be proposed only if it further informs cellular and molecular mechanistic studies that are the main focus here.

Cognitive assessments (in humans and animals) as they relate to disease mechanisms and progression are within the scope of this FOA; however, molecular, cellular, tissue mechanisms and the consequences of diffuse white matter disease on neural circuit function are the main foci of interest. Cognitive assessments are not a requirement to be responsive.

Studies that investigate the interplay of vascular mechanisms as well as co-morbidities with diffuse white matter cerebrovascular disease may be of interest, including, for example: hypertension, diabetes and other metabolic disorders, Alzheimer's type dementia, cerebral amyloid angiopathy, inflammation, dyslipidemia, and other known risk factors in cerebro- and cardiovascular disease.

The physiological consequences of diffuse white matter disease on local axon and neural circuit function are almost completely unknown, and are within the scope of this FOA.

**Award:** Application budgets are not limited but need to reflect the actual needs of the proposed project.

**Letter of Intent:** July 14, 2019

**Deadline:** August 14, 2019, by 5:00 PM local time of applicant organization. All [types of non-AIDS applications](#) allowed for this funding opportunity announcement are due on these dates.

Applicants are encouraged to apply early to allow adequate time to make any corrections to errors found in the application during the submission process by the due date.

---

**Grant Program: Non-Invasive Neurostimulation in AD/ABR (R01 Clinical Trial Optional)**

**Agency: National Institutes of Health PAR-19-298**

**RFP Website:** <https://grants.nih.gov/grants/guide/pa-files/PAR-19-298.html>

**Brief Description:** This FOA encourages applications that provide studies of initial efficacy of non-invasive neurostimulation, such as TMS, transcranial direct current stimulation (tDCS), transcranial alternating current stimulation (tACS), or transcutaneous vagal nerve stimulation (tVNS).

Applications that use realistic head modeling, provide individualized targeting based on unique anatomical features of participants, and evaluate target engagement are of particular interest.

Topics of interest for this FOA include, but are not limited to, the following:

- Studies to rigorously evaluate initial efficacy of the intervention(s).
- Multi-modal or combinations therapies with other pharmacological or non-pharmacological interventions.
- Studies to refine intervention strategy. These studies could determine appropriate dosage of stimulation (e.g., amplitude or duration), brain region to be targeted, or whether stimulation in general or in combination with training for a cognitive task is most beneficial (i.e., “online” or “offline” stimulation).
- Studies to define and refine the target population.

Examples of studies that are outside of the scope of this FOA include the following:

- Development of neurostimulation devices, or refinement of the devices themselves.
- Use of invasive neurostimulation devices.

The National Institute of Mental Health (NIMH) is particularly interested in pilot clinical trials addressing non-invasive neurostimulation in the treatment of the neuropsychiatric symptoms (NPS) or behavioral and psychological symptoms of dementia of AD/ADRD (i.e., aggression, psychosis, anxiety, apathy, depression, agitation, sleep disturbances, and wandering). NIMH is particularly interested in studies that use neurostimulation techniques as adjunctive treatments to behavioral or pharmacologic treatments for NPS symptoms.

**Award:** Application budgets are not limited but need to reflect the actual needs of the proposed project.

**Letter of Intent:** 30 days prior to the application due date

**Deadline:** [Standard dates](#) apply by 5:00 PM local time of applicant organization. All [types of non-AIDS applications](#) allowed for this funding opportunity announcement are due on these dates. The first due date for this FOA is October 5, 2019.

Applicants are encouraged to apply early to allow adequate time to make any corrections to errors found in the application during the submission process by the due date.

---

## **Grant Program: Research to Understand and Inform Interventions that Promote the Research Careers of Individuals in the Biomedical Sciences (R01 - Clinical Trial Not Allowed)**

**Agency:** National Institutes of Health PAR-19-295

**RFP Website:** <https://grants.nih.gov/grants/guide/pa-files/PAR-19-295.html>

**Brief Description:** NIGMS supports a variety of training programs designed to develop a diverse pool of scientists with the skills and motivation to transition into the biomedical research workforce. NIGMS encourages the use of evidence-based practices and recognizes that there is need for more hypothesis-driven research to test biomedical training, mentoring and networking interventions for efficacy and replicability across career stages and at a range of institution types and to provide insights into the factors contributing to success. Through this funding announcement, NIGMS intends to enhance the evidence base for effective, high-impact, scalable interventions, and to improve our understanding of the factors contributing to success, including the social and behavioral factors involved in the advancement of individuals pursuing independent academic biomedical research careers.

### **Program Considerations**

Projects are expected to include the use of robust experimental designs, including randomized control trial approaches, case controls, matched pair design or other rigorous designs appropriate to the research questions. The research results are expected to move beyond participant satisfaction, self-reporting of

perceived skills gained, or self-reporting of effectiveness. Accordingly, the training, mentoring, and networking interventions are to be centered not only on psychosocial factors, but also on outcomes so that the results will inform the biomedical community regarding the factors and mechanisms that are most likely to influence and foster a sustained career in the biomedical research workforce.

As appropriate, the proposed studies should inform the field about the effectiveness of the duration, frequency, and intensity of the intervention and whether those effects can be enhanced by reinforcement sessions. The proposed projects should provide the scientific community with sound evidence of short, medium, and long-term effects of the intervention's efficacy. The interventions should be cost-effective, practical, realistic, scalable and sustainable at a broad range of institutions. A primary goal of the FOA is to identify principles that would inform practice, in or outside the classroom, laboratory and institution.

**Award:** Application budgets are limited to \$250,000 direct costs per year.

**Letter of Intent:** 30 days prior to the application due date

**Deadline:** [Standard dates](#) apply by 5:00 PM local time of applicant organization. All [types of non-AIDS applications](#) allowed for this funding opportunity announcement are due on these dates. The first due date for this FOA is October 5, 2019.

Applicants are encouraged to apply early to allow adequate time to make any corrections to errors found in the application during the submission process by the due date.

---

### **Grant Program: NIAID New Innovators Awards (DP2 Clinical Trial Not Allowed)**

**Agency:** National Institutes of Health PAR-19-296

**RFP Website:** <https://grants.nih.gov/grants/guide/pa-files/PA-19-296.html>

**Brief Description:** In 2007, the NIH developed a new program using the DP2 mechanism to support highly innovative research from promising [Early Stage Investigators](#) (defined as those within 10 years of completing their terminal research degree or postgraduate clinical training and who have not yet received substantial NIH support). With this mechanism, no detailed experimental plan or preliminary data were required. From this concept, the NIH launched the NIH Director's New Innovator Award as part of the Common Fund's [High-Risk, High-Reward Research program](#), which was created to accelerate the pace of biomedical discoveries by supporting exceptionally creative scientists with highly innovative research. The program sought to identify scientists with high-impact ideas that may be risky or at a stage too early to fare well in the traditional peer review process. The program encourages creative, outside-the-box thinkers to pursue exciting and innovative ideas.

The purpose of this new NIAID program is to expand on the successful NIH DP2 program, funding applications proposing bold new ideas from those currently in their post-doctoral training years. Through this program, NIAID wants to encourage shorter post-doctoral fellowships and provide the opportunity for creative scientists with little to no preliminary data to start their independent careers earlier.

As part of NIAID's commitment to increase opportunities for post-doctoral fellows, NIAID plans to support exceptionally creative postdoctoral investigators who propose highly innovative research projects with the potential for unusually high impact in the mission of NIAID. The NIAID DP2 program is available to both U.S. and non-U.S. citizen postdoctoral investigators, and the award will only be activated once the applicant has obtained a U.S. faculty position. Applicants for this award must have a research or clinical doctorate (including PhD, MD, DO, DC, ND, DDS, DVM, ScD, DNS, PharmD, or equivalent doctoral degree), or a combined research and clinical doctoral degree. In addition, NIAID will fund its DP2 recipients with \$300K in direct costs per year for up to five years. The NIAID DP2 award is not renewable.

**Award:** Application budgets are limited to \$300K direct costs per year and need to reflect the actual needs of the proposed project.

**Letter of Intent:** 30 days prior to the application due date

**Deadline:** October 10, 2019, October 14, 2020, October 13, 2021, by 5:00 PM local time of applicant organization. All [types of non-AIDS applications](#) allowed for this funding opportunity announcement are due on these dates.

Applicants are encouraged to apply early to allow adequate time to make any corrections to errors found in the application during the submission process by the due date.

---

**Grant Program: Brain Initiative: Research to Develop and Validate Advanced Human Cell-Based Assays To Model Brain Structure and Function (R01 Clinical Trial Not Allowed)**

**Agency: National Institutes of Health RFA-MH-20-140**

**RFP Website:** <https://grants.nih.gov/grants/guide/rfa-files/RFA-MH-20-140.html>

**Brief Description:** The purpose of this FOA is to stimulate basic research to develop next-generation human cell-derived assays with improved fidelity to complex human brain, spinal cord, and/or sensory end organ circuit physiology, which will ultimately facilitate analysis of higher order functional deficits relevant to complex nervous system diseases. This FOA is distinct from others that focus on optimization and scalability of assays for compound screening, although projects could, in principle, have utility for late stage evaluation of drug efficacy and toxicity.

This FOA encourages innovative approaches that are first-in-class, those that propose to substantially exceed the state of the art in tissue organization and function, and/or those that aim to improve robustness and reproducibility of physiologically-relevant circuit or supportive systems-level measures. High risk, high impact approaches are encouraged. The applications should define the current state of technology as a benchmark against which the new assay system(s) will be developed and measured.

Example approaches include, but are not limited to:

- Utilization of novel materials, substrates or synthesis technologies (e.g., 3D printing, bioreactors, microfluidic platforms) to promote anatomically and physiologically relevant tissue organization and/or maturation.
- Integration of defined cell types consistent with relevant nervous system anatomy (e.g., excitatory, inhibitory & modulatory neurons, astrocytes, oligodendrocytes, microglia, pericytes, endothelial cells) into functional units (assembloids) that may include multipartite synapses, vascularization-perfusion, blood-brain barrier, glymphatic system and/or cerebrospinal fluid flow.
- Novel strategies to faithfully reproduce relevant regional cellular organization (e.g., dorsoventral, rostrocaudal, laminar, columnar or nuclei structure), with both short- and long-range anatomical connectivity (e.g., local inhibitory-excitatory and/or modulatory connections, projections to distant lamina or nuclei).
- Novel strategies to promote maturation of metabolism, signaling, synaptic activity, and connectivity in the cell-based assay.
- Development of human cell-based assays with complex functional features potentially relevant to complex nervous system disorders and diseases (e.g., intrinsic and/or dynamical network properties of cell assemblies such as neural oscillatory activity, activity-dependent plasticity).
- Inclusion of conditional or intersectional strategies that allow temporally and/or spatially cell-selective monitoring or manipulation of gene expression/function or of live cell activity and function.
- Inclusion of innovative approaches to distinguish or deconvolute heterogeneous cell phenotypes in these assays (e.g., multi-parameter single cell analysis), including those that are minimally perturbing.
- Evaluation of how data obtained from the proposed assay compares with human anatomical, histological or systems-level data, or data from other physiologically relevant paradigms, to facilitate assay validation. Investigators are encouraged to explore data and tools being

developed under the [NIH BRAIN Initiative](#), [BrainSpan](#), [PsychENCODE Human Brain Development Atlas](#), [Human Connectome Project](#), [AMP-AD](#), or related efforts which if utilized could further the authentication of human brain cell-derived assays.

**Award:** Application budgets are limited to \$500,000 in direct costs in any project year and need to reflect the actual needs of the proposed project.

**Letter of Intent:** October 1, 2019

**Deadline:** November 1, 2019 by 5:00 PM local time of applicant organization. All [types of non-AIDS applications](#) allowed for this funding opportunity announcement are due on these dates.

No late applications will be accepted for this Funding Opportunity Announcement.

Applicants are encouraged to apply early to allow adequate time to make any corrections to errors found in the application during the submission process by the due date.

---

### **Grant Program: Research Program Award (R35 Clinical Trial Optional)**

**Agency:** National Institutes of Health [R35 Outstanding Investigator Award RFA-NS-19-037](#)

**RFP Website:** <https://grants.nih.gov/grants/guide/rfa-files/RFA-NS-19-037.html>

**Brief Description:** The purpose of the NINDS Research Program Award (RPA) is to provide longer-term support and increased flexibility to Program Directors (PDs) /Principal Investigators (PIs) whose records of research achievement demonstrate their ability to make major contributions to neuroscience. RPAs will support the overall research programs of NINDS-funded investigators for up to 8 years, at a level commensurate with a PD/PI's recent NINDS support (Part 2, Section II) This greater funding stability will provide eligible investigators at nearly all career stages increased freedom and flexibility, allowing them to be more adventurous in their research, take greater risks, embark upon research that breaks new ground, undertake research projects that require a longer timeframe, and/or extend previous discoveries in new directions. Research supported through the RPA must be within the scope of the NINDS mission ([http://www.ninds.nih.gov/about\\_ninds/mission.htm](http://www.ninds.nih.gov/about_ninds/mission.htm)). Research activities outside of the NINDS mission, or traditionally supported by another NIH Institute or Center will not be considered through this program.

Other anticipated benefits of the RPA include:

- A more stable funding environment, facilitating the pursuit of longer-term research goals;
- Flexible funding, enabling investigators to pursue research opportunities as they arise, not tied to specific aims;
- Reduced time spent writing grant applications and managing multiple grant awards, thereby allowing investigators to spend more time conducting and overseeing research; and
- More time for PDs/PIs to mentor junior scientists.

Eligibility to apply through this FOA is limited to PDs/PIs who have had at least one of the following types of active NINDS grants in each of the past 5 years (that is FY15-19), with no more than one of those years in a no cost extension: R00, R01, R37, R56, DP1, DP2.

**Award:** NINDS intends to commit \$20 million in FY 2020 to fund up to 30 awards. NINDS will seek to ensure that RPA awards are diverse not only with respect to scientific approach and area of study, but also with respect to investigator background and career stage.

**Letter of Intent:** June 30, 2019

**Deadline:** July 30, 2019, by 5:00 PM local time of applicant organization. All [types of non-AIDS applications](#) allowed for this funding opportunity announcement are due on these dates.

No late applications will be accepted for this Funding Opportunity Announcement.

Applicants are encouraged to apply early to allow adequate time to make any corrections to errors found in the application during the submission process by the due date.

---

**Grant Program: Postdoctoral Research Associate Training (PRAT) Program (Fi2)**

**Agency: National Institutes of Health PAR-19-286**

**RFP Website:** <https://grants.nih.gov/grants/guide/pa-files/PAR-19-286.html>

**Brief Description:** PRAT fellows conduct research in laboratories in the [NIH Intramural Research Program](#) in basic biomedical research areas that are within the [NIGMS mission](#). These areas include but are not limited to biological chemistry, biophysics, bioinformatics, cellular and molecular biology, computational biosciences, developmental biology, genetics, immunology, neuroscience, pharmacology, physiology, and technology development. Fellows conduct their work with sponsors who have relevant experience in these areas of research in any of the NIH Institutes or Centers with an Intramural Research Program. Because the PRAT program regularly brings fellows together to participate in seminars and other activities, this arrangement allows fellows from a wide array of scientific disciplines to interact on a regular basis and to exchange ideas.

**Award:** Fellowship budgets are composed of stipends and travel and training allowance up to 3 years.

**Letter of Intent:** 30 days prior to the application due date

**Deadline:** October 2, 2019; October 2, 2020; October 4, 2021, by 5:00 PM local time of applicant organization. All [types of applications](#) allowed for this funding opportunity announcement are due on these dates. Applicants are encouraged to apply early to allow adequate time to make any corrections to errors found in the application during the submission process by the due date.

**Department of Transportation**

**Grant Program: Dwight David Eisenhower Transportation Fellowship Program (DDETFP)**

**Grants or Research Fellowship (GRF)**

**Agency: Department of Transportation 693JJ318NF5229-2019**

**Website:**

[https://www.fhwa.dot.gov/innovativeprograms/centers/workforce\\_dev/post\\_secondary\\_education.aspx](https://www.fhwa.dot.gov/innovativeprograms/centers/workforce_dev/post_secondary_education.aspx)

**Brief Description:** The Dwight David Eisenhower Transportation Fellowship Program (DDETFP) awards fellowships to students pursuing degrees in transportation-related disciplines ([PDF](#) or [HTML](#)). This program advances the transportation workforce by helping to attract the nation's brightest minds to the field of transportation, encouraging future transportation professionals to seek advanced degrees, and helping to retain top talent in the U.S. transportation industry. This funding opportunity is open to students that are U.S. citizens and non-U.S. citizens. The students must be enrolled in an IHE which must be accredited by a federally-recognized accrediting agency<sup>1</sup> and must be located within the United States or its territories, both administratively as well as the campus the student is attending.

**Awards:** The anticipated stipends for the DDETFP GRF are based on academic level and shall be calculated as follows:

Monthly Stipend

Master's Level	Up to \$1,700
Doctoral Level	Up to \$2,000

**Proposal Deadline:** July 25, 2019 at 3:00pm Eastern Time.

**Contact Information:** Ewa Flom Program Manager Phone 703-235-0532 [ewa.flom@dot.gov](mailto:ewa.flom@dot.gov)

<sup>1</sup> The U.S. Department of Education publishes a list of nationally recognized accrediting agencies on <https://www.ed.gov/accreditation>

## **Grant Program: Advanced Transportation and Congestion Management Technologies Deployment Initiative**

**Agency: Department of Transportation 693JJ319NF00003**

**Website:** <https://www.fhwa.dot.gov/fastact/factsheets/advtranscongmtfs.cfm>

**Brief Description:** The DOT hereby requests applications to result in awards to eligible entities to develop model deployment sites for large scale installation and operation of advanced transportation technologies to improve safety, efficiency, system performance, and infrastructure return on investment. Grant recipients may use funds under this program to deploy advanced transportation and congestion management technologies, including—

- advanced traveler information systems;
- advanced transportation management technologies;
- infrastructure maintenance, monitoring, and condition assessment;
- advanced public transportation systems;
- transportation system performance data collection, analysis, and dissemination systems;
- advanced safety systems, including vehicle-to-vehicle and vehicle-to-infrastructure communications;
- technologies associated with autonomous vehicles, and other collision avoidance technologies, including systems using cellular technology;
- integration of intelligent transportation systems with the Smart Grid and other energy distribution and charging systems;
- electronic pricing and payment systems; or
- advanced mobility and access technologies, such as dynamic ridesharing and information systems to support human services for elderly and disabled individuals. [23.U.S.C. 503(c)(4)(E)]

**Awards:** Up to \$60 million in Federal funding to provide grants to eligible entities to develop model deployment sites for large scale installation and operation of advanced transportation technologies to improve safety, efficiency, system performance, and infrastructure return on investment

**Proposal Deadline:** July 19, 2019

**Contact Information:** Submit Questions to: [ATCMTD@dot.gov](mailto:ATCMTD@dot.gov)

---

## **Grant Program: FY 2019 National Infrastructure Investments**

**Agency: Department of Transportation DTOS59-19-RA-BUILD**

**Website:** <https://www.transportation.gov/buildgrants/build-nofo>

**Brief Description:** The Consolidated Appropriations Act, 2019 (Pub. L. 116-6, February 15, 2019) (“FY 2019 Appropriations Act”) appropriated \$900 million to be awarded by the Department of Transportation (“DOT”) for National Infrastructure Investments. This appropriation stems from the program funded and implemented pursuant to the American Recovery and Reinvestment Act of 2009 (the “Recovery Act”) and is known as the Better Utilizing Investments to Leverage Development, or “BUILD Transportation grants,” program. Funds for the FY 2019 BUILD Transportation grants program are to be awarded on a competitive basis for surface transportation infrastructure projects that will have a significant local or regional impact. The purpose of this notice is to solicit applications for BUILD Transportation grants.

The FY 2019 BUILD Transportation grant program will make awards to surface transportation infrastructure projects that will have a significant impact throughout the country. Each section of this notice contains information and instructions relevant to the application process for these BUILD Transportation grants, and all applicants should read this notice in its entirety so that they have the information they need to submit eligible and competitive applications. For this round of BUILD Transportation grants, the maximum grant award is \$25 million, and no more than \$90 million can be awarded to a single State, as specified in the FY 2019 Appropriations Act. Per statute, the FY 2019 selection criteria are the same as under the FY 2017 TIGER program, although the description for each

criterion has been updated. For FY 2019 BUILD Transportation grants, the definitions of urban and rural areas differ from previous rounds. Additionally, not more than 50 percent of funds will be awarded to projects located in urban and rural areas, respectively.

**Awards:** The FY 2019 Appropriations Act specifies that BUILD Transportation grants may not be less than \$5 million and not greater than \$25 million, except that for projects located in rural areas (as defined in Section C.3.ii.) the award size is \$1 million. There is no minimum award size, regardless of location, for BUILD Transportation planning grants.

**Proposal Deadline:** July 15, 2019

**Contact Information:** Program staff will address questions to [BUILDgrants@dot.gov](mailto:BUILDgrants@dot.gov) throughout the application period.

---

## **Department of Defense/US Army/DARPA/ONR/AFOSR**

**Grant Program: FY2020 Office of Naval Research (ONR) Young Investigator**

**Agency: Department of Defense Office of Naval Research N00014-19-S-F008**

**Website:** <https://www.onr.navy.mil/en/work-with-us/funding-opportunities>

**Brief Description:** Investigator Program (YIP). ONR's Young Investigator Program seeks to identify and support academic scientists and engineers who are in their first or second full-time tenure-track or tenure-track-equivalent academic appointment, who have received their PhD or equivalent degree on or after 01 January 2012, and who show exceptional promise for doing creative research. The objectives of this program are to attract outstanding faculty members of Institutions of Higher Education (hereafter also called "universities") to the Department of the Navy's Science and Technology (S&T) research program, to support their research, and to encourage their teaching and research careers. Individuals who are holding U.S. non-profit equivalent positions are encouraged to apply.

Proposals addressing research areas (as described in the ONR Science and Technology Department section of ONR's website at [www.onr.navy.mil](http://www.onr.navy.mil)) which are of interest to ONR program officers will be considered. Contact information for each division (a subgroup of an S&T Department) is also listed within the S&T section of the website.

Applicants are STRONGLY ENCOURAGED to contact the appropriate Program Officer who is the point of contact for a specific technical area to discuss their research ideas. A list of most Program Officers and their contact information can be found at: <https://www.onr.navy.mil/our-research/technology-areas> or at: <https://www.onr.navy.mil/our-research/our-program-managers>

**Awards:** Various

**Proposal Deadline:** August 16, 2019

**Grant Program: DSO Office-wide Broad Agency Announcement**

**Agency: Department of Defense DARPA HR001119S0071**

**Website:** <https://www.darpa.mil/work-with-us/opportunities?tFilter=&oFilter=2&sort=date>  
[https://www.fbo.gov/index?s=opportunity&mode=form&id=22a346a8b55f0a7040d57a8fbc19e644&tab=core&\\_cview=1](https://www.fbo.gov/index?s=opportunity&mode=form&id=22a346a8b55f0a7040d57a8fbc19e644&tab=core&_cview=1)

**Brief Description:** The mission of the Defense Advanced Research Projects Agency (DARPA) Defense Sciences Office (DSO) is to identify and create the next generation of scientific discovery by pursuing high-risk, high-payoff research initiatives across a broad spectrum of science and engineering disciplines and transforming these initiatives into disruptive technologies for U.S. national security. In support of this mission, the DSO Office-wide BAA invites proposers to submit innovative basic or applied research

concepts that address one or more of the following technical domains: (1) Frontiers in Math, Computation and Design, (2) Limits of Sensing and Sensors, (3) Complex Social Systems, and (4) Anticipating Surprise. Each of these domains is described below and includes a list of example research topics that highlight several (but not all) potential areas of interest. Proposals must investigate innovative approaches that enable revolutionary advances. DSO is explicitly not interested in approaches or technologies that primarily result in evolutionary improvements to the existing state of practice.

**Awards:** The total award value for the combined Phase 1 base and Phase 2 option is limited to \$1,000,000. This total award value includes Government funding and performer cost share (if required).

**Proposal Deadline:** Executive Summary Due Date: June 12, 2020, 4:00 p.m. o Abstract Due Date: June 12, 2020, 4:00 p.m. o FAQ Submission Deadline: June 2, 2020, 4:00 p.m. See Section VIII.A. o Full Proposal Due Date: June 12, 2020, 4:00 p.m.

**Contact Information:** BAA Email: [HR001119S0071@darpa.mil](mailto:HR001119S0071@darpa.mil)

### **Grant Program: Program Announcement for Disruptioneering; Disruptive Capabilities for Future Warfare**

**Agency:** Department of Defense DARPA DARPA-PA-19-02 and HR001119S0054

**Website:**

[https://www.fbo.gov/index?s=opportunity&mode=form&id=890c20829acd406c338ac6287403f970&tab=core&\\_cvview=0](https://www.fbo.gov/index?s=opportunity&mode=form&id=890c20829acd406c338ac6287403f970&tab=core&_cvview=0)

[https://www.fbo.gov/index?s=opportunity&mode=form&id=e7248da47889d975d0ccb0261d002a9a&tab=core&\\_cvview=1](https://www.fbo.gov/index?s=opportunity&mode=form&id=e7248da47889d975d0ccb0261d002a9a&tab=core&_cvview=1)

**Brief Description:** The mission of the Defense Advanced Research Projects Agency is to make strategic, early investments in science and technology that will have long-term positive impact on our nation's national security. As part of this mission, DARPA makes high-risk, high-reward investments in science and technology that have the potential to disrupt current understanding and/or approaches. The pace of discovery in both science and technology is accelerating worldwide, resulting in new fields of study and the identification of scientific areas ripe for disruption. While DARPA's existing investment strategy continues to yield success, in order to capitalize on these new opportunities, its approach to investing must include faster responses with more small, targeted investments. This new approach is called Disruptioneering. Disruptioneering will enable DARPA to initiate a new investment in less than 90 days from idea inception.

**HR001119S0054:** The Tactical Technology Office of the Defense Advanced Research Projects Agency is soliciting executive summaries, proposal abstracts and proposals for applied research, advanced technology development, and platform demonstrations that aim to enable disruptive capabilities for future warfare.

**Awards:** The total award value for the combined Phase 1 base and Phase 2 option is limited to \$1,000,000. This total award value includes Government funding and performer cost share (if required).

**Proposal Deadline:** RFP is open until March 18, 2020

HR001119S0054: June 11, 2020

**Contact Information:** BAA Coordinator [DARPA-PA-19-02@darpa.mil](mailto:DARPA-PA-19-02@darpa.mil)

### **Grant Program: Materials Science in Extreme Environments University Research Alliance (MSEE-URA)**

**Agency:** Department of Defense Defense Threat Reduction Agency HDTRA1-19-S-0003-MSEE-URA

**Website:** <https://www.grants.gov/>

**Brief Description:** DTRA is seeking to develop the capability to understand material properties and associated mechanisms in various extreme environments that may lead to future exploitation. The approach is to realize a materials and properties capability by establishing a new University Research Alliance (URA) focused on Materials Science in Extreme Environments (MSEE). The focus of the MSEE-URA will be to advance the fundamental understanding of various material properties and mechanisms in non-equilibrium high pressure, high temperature, and high photon number regimes. The foundational problem to be addressed by the MSEE-URA is the lack of knowledge and predictive modeling capability for various material classes and their associated formation/decomposition mechanisms within harsh Weapons of Mass Destruction (WMD)- related environments. That lack of knowledge poses a challenge in the ability to control and exploit future material-WMD interactions. To address this problem, the MSEE-URA seeks proposals focusing on understanding, controlling, characterizing, and predicting interactions of materials in extreme pressure, temperature, and optical environments. A wide range of WMD-relevant environments are of interest including: conventional fireballs, nuclear fireballs, photon-induced blow-off, plasmas, and warm dense matter. These environments are challenging not only due to the temperatures, pressures, and energies involved, but also the rapid evolution of the environments and the need to model across multiple time, energy, and physical time scales. Limited experimental testing opportunities and diagnostics adds to the challenge of understanding material responses in these extreme environments. A comprehensive integrated and collaborative approach is required to make progress on these challenges.

The four research areas for the MSEE-URA are as follows and include possible desired research outcomes within those four research areas. • Material Properties and Failure – (a) Produce materials constitutive models and failure models applicable at fast rates ( $10^2 - 10^6 \text{ s}^{-1}$ ) for hard rock and cementitious materials,; (b) Experimentally identify material properties contributing to sensitivity of energetics and composite materials (including reactives and additively manufactured materials); (c) Identify material property/numerical sources of uncertainty and sensitivities for nuclear models. • Materials Development and Manufacturing for Synergistic Effects - (a) Develop structure-function-property relationships of additively manufactured reactive materials, additive manufacturing of multifunctional nanocomposites, ignition/combustion, dynamic imaging of post combustion fields; (b) Fabricate multifunctional shielding materials that incorporate electromagnetic pulse (EMP) shielding while maintaining other requirements such as weight, cost, ballistic protection, ionizing radiation protection; (c) Identify combinations of energetics/non-energetic materials that produce synergistic effects and/or identify material properties that may lend well to tailored performance. • Chemistry in Extreme Environments - (a) Construct validation models that predict nuclear fireball behavior in complex urban environments and identify fundamental experimental measurements that could improve models. (b) Develop high temperature/high heating rate chemical mechanisms and associated Arrhenius kinetic models for low vapor pressure organophosphorous species. • Photon-Material Interactions - (a) Improve understanding and predictive models of X-ray energy deposition, material blow-off, and plasma generation and evolution for ensuring the survivability of space solar arrays and strategic systems; (b) Improve models, materials, and approaches for utilizing direct laser impulse testing to simulate blow-off impulse of strategic systems.

**Awards:** The CA may range from \$5M to \$7M annually (total, including both direct and indirect costs) depending on the nature and the scope of work.

**Proposal Deadline:** Applicants must submit a Letter of Intent (LoI) no later than 21 June 2019 to be considered eligible to submit a Phase I pre-proposal. Phase I pre-proposal submissions are due on 17 July 2019

**Contact Information:** Questions regarding the content of this BAA must be addressed to the following email address: [DTRA-URA-Program@mail.mil](mailto:DTRA-URA-Program@mail.mil)

**Grant Program: DoD Psychological Health and Traumatic Brain Injury, Federal Interagency Traumatic Brain Injury Research Analysis Award**

**Agency: Department of Defense Dept. of the Army – USAMRAA W81XWH-19-PHTBIRP-FITBIRA**

**Website:** <https://ebrap.org/eBRAP/public/index.htm>

**Brief Description:** FITBIR is an informatics system created through a collaborative effort between the USAMRMC and the National Institute of Neurological Disorders and Stroke (NINDS) of the National Institutes of Health (NIH). Based on the award-winning Biomedical Research Informatics Computing System (BRICS) platform, FITBIR serves as the premier platform to share human subject data across the TBI field. The goal of FITBIR is to accelerate research progress by allowing for re-analysis, aggregation, and rigorous comparison of deidentified data to facilitate new insights in the understanding, diagnosis, and treatment of TBI. FITBIR's usefulness is facilitated by the use of Global Unique Identifiers (GUIDs) and common data elements (CDEs). GUIDs are unique alpha-numeric identifiers for study participants that facilitate deidentified data sharing and tracking across multiple research sites and studies. A GUID is generated from a subject's personally identifiable information (PII) using a complex algorithm; the PII cannot be reverse engineered from the GUID. Only a subject's GUID is shared with FITBIR and the subject's PII remains protected. CDEs, developed as part of an initiative led by NINDS, are a set of data collection standards within the neuroscience research community. CDEs are identified and defined by subject matter experts. CDE development is an ongoing process that evolves with the needs of the field. Currently, FITBIR contains over 3.7 million (M) data records for over 70,000 subjects from studies funded by the DoD and NINDS. This comprehensive dataset includes demographics, outcome assessments, imaging, and biomarkers. During an award's period of performance, the study data are in a sequestered state. However, after the period of performance ends, the data are shared publicly to all researchers with active FITBIR data access accounts. As of May 2019, data from 15 completed studies and over 4,500 research subjects are shared publicly. Please visit the FITBIR website at <https://fitbir.nih.gov/> for more information on FITBIR, currently available data, and policies for accessing shared data.

Proposed research must analyze existing FITBIR data. Funding from the FITBIR Analysis Award will not support animal research or prospective (active) enrollment of human subjects. Applications may supplement FITBIR data with other public or private data sources. Applicants are expected to demonstrate access to shared data or restricted data within FITBIR at the time of application submission. Proof of an approved FITBIR Data Access Request is required at the time of application submission (Attachment 7). The FITBIR Data Access Request form can be found at <https://fitbir.nih.gov/content/get-account>.

**Awards:** The anticipated total costs budgeted for the entire period of performance for an FY19 JPC-6/CCCRP PH/TBI FITBIR Analysis Award will not exceed \$750,000.

**Proposal Deadline:** Pre-Application Submission Deadline: 5:00 p.m. Eastern time (ET), July 10, 2019 • Application Submission Deadline: 11:59 p.m. ET, August 1, 2019

**Contact Information:** CDMRP Help Desk Phone: 301-682-5507 Email: [help@eBRAP.org](mailto:help@eBRAP.org)

**Grant Program: DoD Vision, Investigator- Initiated Research Award**

**Agency: Department of Defense Dept. of the Army – USAMRAA W81XWJ-19-VRP-IIRA W81XWH-19-VRP-TRA : DoD Vision, Translational Research Award**

**Website:** <https://ebrap.org/eBRAP/public/index.htm>

**Brief Description:** To meet the intent of the award mechanism, applications to the FY19 VRP Investigator-Initiated Research Award (IIRA) must address research in one or more of the following Focus Areas: • Eye injury or visual dysfunction as related to a military-relevant traumatic event. Examples of military-relevant trauma may include, but are not limited to: ○ Blast, blunt, thermal, or chemical trauma

○Trauma caused by directed energy weapons such as laser, microwaves, and particle beams • Diagnosis and treatment of eye injuries in austere environments and prolonged field care settings.

The FY19 VRP IIRA is intended to support studies that will yield highly impactful discoveries or major advancements in the research and/or patient care of eye injury and/or visual dysfunction as related to military-relevant trauma. Research projects may focus on any phase of research (e.g., basic, translational, applied, clinical, observational), excluding clinical trials. The research idea or solution should be innovative or novel, or a significant advancement over existing ideas or solutions, as applicable.

**Awards:** Funding Level 1 supports exploratory, innovative, high-risk/high-reward research that is in the earliest stages of idea development.

Funding Level 2 supports the advancement of more mature research toward clinical translation. The proposed research must be innovative or novel or offer significant refinements, improvements, or new applications of existing ideas or solutions.

Estimated Total Program Funding: \$6,080,000

**Proposal Deadline:** Pre-Application Submission Deadline: 5:00 p.m. Eastern time (ET), August 6, 2019

• Invitation to Submit an Application: September 2019 • Application Submission Deadline: 11:59 p.m. ET, December 6, 2019

**Contact Information:** CDMRP Help Desk Phone: 301-682-5507 Email: [help@eBRAP.org](mailto:help@eBRAP.org)

### **Grant Program: DoD Duchenne Muscular Dystrophy, Idea Development Award**

**Agency:** Department of Defense Dept. of the Army – USAMRAA W81XWH-19-DMDRP-IDA

**Website:** <https://ebrap.org/eBRAP/public/index.htm>

**Brief Description:** All applications for the FY19 DMDRP Idea Development Award must address opportunities and challenges in the development of safe and effective macromolecular and cellular therapies that address primary pathology of DMD. Eligible therapeutic strategies include: gene therapy, genome editing, oligonucleotide therapies, exon skipping, protein therapeutics, and cell therapies. Studies proposed under this award may include: • Delivery to skeletal muscle and heart (e.g., ligand assisted, nanoparticles, identification of biological barriers to delivery, and alternative vectors) • Immunosuppression, vector modification, and other strategies to facilitate repeat administration of biologic therapies • Targeting muscle stem cells • Cell-based therapies, including but not limited to: selection of novel cell types, expansion, cell delivery and homing, differentiation, and integration

The DMDRP Idea Development Award supports the development of innovative, high-risk/high-reward research that could lead to critical discoveries or major advancements that will accelerate progress in improving outcomes for individuals with DMD. This award mechanism is designed to support innovative ideas with the potential to yield impactful data and new avenues of investigation.

**Awards:** The anticipated direct costs budgeted for the entire period of performance for an FY19 DMDRP Idea Development Award will not exceed \$350,000.

The FY19 appropriation is \$2.8M.

**Proposal Deadline:** Pre-Application Submission Deadline: 5:00 p.m. Eastern time (ET), August 21, 2019

• Invitation to Submit an Application: September 27, 2019 • Application Submission Deadline: 11:59 p.m. ET, December 4, 2019

**Contact Information:** CDMRP Help Desk Phone: 301-682-5507 Email: [help@eBRAP.org](mailto:help@eBRAP.org)

### **Department of Education**

**Grant Program: Fulbright-Hays Group Projects Abroad (GPA) Short-Term Project**

**Agency:** Department of Education CFDA Number 84.021A

**Website:** <https://www.govinfo.gov/content/pkg/FR-2019-01-24/pdf/2019-00107.pdf>

**Brief Description:** The purpose of the Fulbright-Hays GPA Program is to promote, improve, and develop modern foreign languages and area studies at varying levels of education. The program provides opportunities for faculty, teachers, and undergraduate and graduate students to conduct individual and group projects overseas to carry out research and study in the fields of modern foreign languages and area studies. This notice relates to the approved information collection under OMB control number 1840-0792.

This competition invites applicants to submit an application to request support for either a Fulbright-Hays GPA short-term project (GPA short-term projects 84.021A) or a Fulbright-Hays GPA long-term project (GPA long-term projects 84.021B). Applicants must clearly indicate on the SF 424, Application for Federal Assistance cover sheet whether they are applying for a GPA short-term project (84.021A) or a GPA long-term project (84.021B). Additional submission details are included in the application package.

There are three types of GPA short-term projects: (1) Short-term seminar projects of four to six weeks in length designed to help integrate international studies into an institution's or school system's general curriculum by focusing on a particular aspect of area study, such as the culture of an area or country of study (34 CFR 664.11); (2) curriculum development projects of four to eight weeks in length that provide participants an opportunity to acquire resource materials for curriculum development in modern foreign language and area studies for use and dissemination in the United States (34 CFR 664.12); and (3) group research or study projects of three to twelve months in duration designed to give participants the opportunity to undertake research or study in a foreign country (34 CFR 664.13).

**Awards:** Up to \$100,000. Estimated total funding: \$1,000,000

**Proposal Deadline:** March 25, 2019; Applications available: January 24, 2019. Deadline for transmittal of applications: March 25, 2019.

**Contact Information:** Julius C Cotton ED Grants.gov FIND Systems Admin. Phone 202-245-6288 [julius.cotton@ed.gov](mailto:julius.cotton@ed.gov)

## **EPA**

**Grant Program: Green Infrastructure to Reduce Stormwater Runoff**

**Early Career: Chemical Mechanisms to Address New Challenges in Air Quality Modeling**

**Agency: Environmental Protection Agency EPA-G2019-STAR-C1 EPA-G2019-STAR-C2**

**Website:** <https://www.epa.gov/great-lakes-funding/great-lakes-restoration-initiative-2019-request-applications>

**Brief Description:** This Request for Applications (RFA) solicits applications from eligible entities for grants and/or cooperative agreements to be awarded pursuant to the Great Lakes Restoration Initiative Action Plan II (<https://www.glri.us/documents>). This RFA is EPA's major competitive grant funding opportunity under the Great Lakes Restoration Initiative ("GLRI" or "Initiative") for FY 2019 and FY 2020 and is one of several funding opportunities available through federal agencies and their funding recipients under the GLRI. EPA is seeking applications for funding to implement projects within five funding opportunities, each of which has a separate Funding Opportunity Number (FON) and is separately posted on [www.grants.gov](http://www.grants.gov). Applicants must apply for the specific funding opportunity they are interested in. This funding opportunity is for Green Infrastructure to Reduce Stormwater Runoff.

**Awards:** Under this RFA, EPA expects to award a total of approximately \$14 million for about 30 nonpoint source projects in 5 categories addressing agricultural nutrients and stormwater runoff. Specifically, EPA is requesting grant applications under the following funding opportunities:

**Submission Deadline: Thursday, June 6, 2019** - Webinar to discuss the RFA.

1-3 pm Central / 2-4 pm Eastern

[Register for the webinar](#) (webinar ID: 722-964-899)

Audio - Participants can use their telephone or computer mic & speakers (VoIP)

United States: 914-614-3221 , access code: 835-127-044

- **Friday, July 12, 2019** - Application deadline. Applications must be submitted to EPA through [grants.gov](https://www.epa.gov/grants) by 10:59 pm Central / 11:59 pm, Eastern.

**Contact:** Technical Contact: Serena Chung; phone: 202-564-6069; email: [chung.serena@epa.gov](mailto:chung.serena@epa.gov)

**Grant Program: Chemical Mechanisms to Address New Challenges in Air Quality Modeling**

**Early Career: Chemical Mechanisms to Address New Challenges in Air Quality Modeling**

**Agency: Environmental Protection Agency EPA-G2019-STAR-C1 EPA-G2019-STAR-C2**

**Website:** <https://www.epa.gov/research-grants/chemical-mechanisms-address-new-challenges-air-quality-modeling>

**Brief Description:** The U.S. Environmental Protection Agency (EPA), as part of its Science to Achieve Results (STAR) program, is seeking applications proposing research to improve air quality models relevant to ozone, particulate matter (PM), regional haze, air toxics, and emerging pollutants. Specifically, this Request for Applications (RFA) is seeking research on the development of the component of an air quality model that represents the relevant atmospheric chemical reactions, which is known in this field of modeling as “the chemical mechanism.” The RFA seeks research on:

1. Development of data, methods, and software tools for generating explicit chemical mechanisms that a) have a coherent and integrated treatment of gas, aerosol, aqueous, and heterogenous chemistry, b) can be easily updated to reflect evolving kinetic, mechanistic, and theoretical knowledge and understanding, and c) are applicable to a wide range of atmospheric concentration regimes and environmental conditions;
2. Development and evaluation of algorithms, numerical techniques and software tools to reduce (i.e., simplify) detailed, integrated chemical mechanisms into application-specific condensed mechanisms appropriate for use in global and regional air quality models; and
3. Applications of new condensed mechanisms generated for broad applications or for specific conditions in global and regional air quality models to investigate air quality research topics relevant to air quality management in the United States.

The focus of this solicitation is on the development of chemical mechanisms relevant over multiple regimes (a wide range of concentrations, oxidant ratios, and temperatures, and multiple phases) and spatiotemporal scales within a framework that can generate mechanisms for current air quality assessments and have the flexibility to generate updated mechanisms as understanding of atmospheric chemistry evolves and new concerns emerge.

**Awards:** Potential Funding per Award: Up to a total of \$800,000 for regular awards, and up to a total of \$400,000 for early career awards, including direct and indirect costs, with a maximum duration of three years.

**Submission Deadline:** June 24, 2019: 11:59:59 pm Eastern Time

**Contact:** Technical Contact: Serena Chung; phone: 202-564-6069; email: [chung.serena@epa.gov](mailto:chung.serena@epa.gov)

Eligibility Contact: Ron Josephson; phone: 202-564-7823; email: [josephson.ron@epa.gov](mailto:josephson.ron@epa.gov) Electronic

**Grant Program: 2019 Healthy Communities Grant Program**

**Agency: Environmental Protection Agency EPA-R1-HC-2019**

**Website:** <https://www3.epa.gov/region1/eco/uep/pdfs/2019-hcgp-rfa.pdf>

**Brief Description:** The Healthy Communities Grant Program is the U.S. Environmental Protection Agency, Region 1's (EPA New England) main competitive grant program to work directly with communities to support EPA's "Back-to-Basics" agenda to reduce environmental risks, protect and improve human health and improve the quality of life. The Healthy Communities Grant Program will achieve these goals through identifying and funding projects that:

- Target resources to benefit communities at risk [areas needing to create community resilience, environmental justice areas of potential concern, sensitive populations (e.g., children, elderly, tribes, urban and rural residents, and others at increased risk)].
- Assess, understand, and reduce environmental and human health risks.
- Increase collaboration through partnerships and community-based projects.
- Build institutional and community capacity to understand and solve environmental and human health problems.
- Advance emergency preparedness and ecosystem resilience.
- Achieve measurable environmental and human health benefits.

To qualify as eligible projects under the Healthy Communities Grant Program, proposed projects must: (1) be located in and/or directly benefit one or more of the Target Investment Areas; and (2) identify how the proposed project will achieve measurable environmental and/or public health results in one or more of the Target Program Areas. Please see Section III for further information on eligibility requirements.

**Awards:** Proposals may be submitted for amounts up to \$25,000. The project period will start no earlier than October 1, 2019 and can last for a one or two-year period.

**Letter of Intent Deadline:** Your organization's AOR must submit your complete application package electronically to EPA through Grants.gov no later than May 28, 2019, 11:59 PM ET.

**Contact:** Katie Marrese EPA New England 5 Post Office Square, Suite 100 (OEP06-2) Boston, MA 02109-3912 Phone: 617-918-1658 Fax: 617-918-0658

## **Grant Program: 16th Annual P3 Awards: A National Student Design Competition Focusing on People, Prosperity and the Planet - Safe and Sustainable Water Resources**

**EPA-G2019-P3-Q1 – Air Quality**

**EPA-G2019-P3-Q2 – Safe and Sustainable Water Resources**

**EPA-G2019-P3-Q3 – Sustainable and Healthy Communities**

**EPA-G2019-P3-Q4 – Chemical Safety**

**Agency: Environmental Protection Agency**

**Website:** <https://www.epa.gov/research-grants/16th-annual-p3-awards-national-student-design-competition-focusing-people-prosperity>

**Brief Description:** The U.S. Environmental Protection Agency (EPA) – as part of its People, Prosperity and the Planet (P3) Award Program – is seeking applications proposing to research, develop, design, and demonstrate solutions to real world challenges. The P3 competition highlights the use of scientific principles in creating innovative technology-based projects that achieve the mutual goals of improved quality of life, economic prosperity, and protection of the planet – people, prosperity, and the planet. The EPA offers the P3 competition to respond to the needs of people in the United States (U.S.)—e.g., those in small, rural, tribal, and disadvantaged communities. Please see the People, Prosperity and the Planet (P3) Student Design Competition website for more details about this program. Proposed projects must embody the P3 approach, which is that they have the intention and capability to simultaneously improve the quality of people's lives, provide economic benefits, and protect the environment.

This solicitation provides the opportunity for the submission of applications for projects that may involve human subjects research. Human subjects research supported by the EPA is governed by EPA Regulation 40 CFR Part 26 (Protection of Human Subjects). This includes the Common Rule at subpart A and prohibitions and additional protections for pregnant women and fetuses, nursing women, and children at subparts B, C, and D. Research meeting the regulatory definition of intentional exposure

research found in subpart B is prohibited by that subpart in pregnant women, nursing women, and children. Research meeting the regulatory definition of observational research found in subparts C and D is subject to the additional protections found in those subparts for pregnant women and fetuses (subpart C) and children (subpart D). All applications must include a Human Subjects Research Statement (HSRS, as described in Section IV.C.5.b of this solicitation), and if the project involves human subjects research, it will be subject to an additional level of review prior to funding decisions being made as described in Sections V.C and V.D of this solicitation.

**Awards;** The first phase is a competition for one-year grants of up to \$25,000 to test, research, and develop innovative scientific projects or engineering designs that use the P3 approach. In the spring of 2020, the Phase I grantees awarded from this solicitation are required to present their projects/designs at the National Student Design Expo. EPA will provide teams with information about the Expo during the award year. At the end of Phase I, teams will submit a *Project Report* that will serve as an application for a Phase II grant award of up to \$100,000. The Phase II grant awards are intended to support the further development and demonstration of the projects/designs created in Phase I. The competitors for 2020 P3 Phase II grants are limited to recipients of Phase I grant awards from this solicitation.

**Submission Deadline:** December 11, 2018, 11:59:59 pm Eastern Time

**Contact Information:** Technical Contact: Angela Page (page.angelad@epa.gov), Phone: 202-564-7957; Eligibility Contact: Ron Josephson (josephson.ron@epa.gov), Phone: 202-564-7823; Electronic Submissions: Debra M. Jones (jones.debram@epa.gov), Phone: 202-564-7839

## **Department of Energy**

### **Grant Program: Electric Grid of Things**

**Agency: Department of Energy DE-FOA-0002092**

**Website:** <https://www.fedconnect.net/FedConnect/default.htm>

**Brief Description:** The objective of this FOA is to conceive and develop scenarios, approaches, methodologies, tools, techniques and systems that maximize the bi-directional exchange of grid services while optimizing connectivity and information exchange at the grid edge to Internet of Things (IoT) interface that leads to enhanced system resilience and reliability. These advancements must be applicable to the scenario of maintaining energy surety to defense installations, where coordination between defense facilities, the utility, and surrounding Distributed Energy Resources(DER) can extend the functioning of those facilities through abnormal events.

**Awards:** Up to \$2,000,000

**Proposal Submission Deadline:** September 09, 2019

**Contact:** Sheldon E. Funk 304-285-0204 [sheldon.funk@netl.doe.gov](mailto:sheldon.funk@netl.doe.gov)

### **Grant Program: Request for Information (RFI): Marine Sciences Laboratory**

**Agency: Department of Energy DE-FOA-0002123**

**Website:** <https://eere-exchange.energy.gov/>

**Brief Description:** The purpose of this RFI is to solicit feedback from industry, academia, research laboratories, government agencies, and other stakeholders on issues related to the growing Research and Development (R&D) interest in the use of the Pacific Northwest National Laboratory's (PNNL's) Marine Sciences Laboratory (MSL) facilities for renewable energy, maritime markets, and energy storage research, technology development and testing. This information will help DOE and PNNL prioritize resources and investments. This is solely a request for information and not a Funding Opportunity Announcement (FOA). EERE is not accepting applications.

Responses to this RFI must be submitted electronically to [WPTORFI@ee.doe.gov](mailto:WPTORFI@ee.doe.gov) no later than 5:00 p.m. on August 8, 2019. Responses must be provided as attachments to an email. Only electronic responses will be accepted.

This is a Request for Information (RFI) only. EERE will not pay for information provided under this RFI and no project will be supported as a result of this RFI. This RFI is not accepting applications for financial assistance or financial incentives.

**Awards:** TBD

**Proposal Submission Deadline:** [WPTORFI@ee.doe.gov](mailto:WPTORFI@ee.doe.gov)

Responses to this RFI must be submitted electronically to this inbox

**Contact:** [EERE\\_ExchangeSupport@hq.doe.gov](mailto:EERE_ExchangeSupport@hq.doe.gov) Contact information for technical issues

## **Grant Program: Low Cost, Efficient Treatment Technologies for Produced Water**

**Agency:** Department of Energy DE-FOA-0002004

**Website:**

[https://www.fedconnect.net/FedConnect/PublicPages/PublicSearch/Public\\_OpportunitySummary.aspx](https://www.fedconnect.net/FedConnect/PublicPages/PublicSearch/Public_OpportunitySummary.aspx)

**Brief Description:** There are a number of water treatment technologies that include chemical, electrostatic, flotation, filtration and thermal methods. Often, combinations of these methods are incorporated into a range of proprietary commercial systems. Such systems typically produce an output stream of relatively clean water suitable for reuse, plus a second lower volume output stream of highly concentrated brine that cannot be reused and that must be disposed.

DOE understands that produced water characteristics reflect the chemistry of the geologic formation in which it resides. **Accordingly, DOE expects applications in response to this FOA to be basin-specific, reflecting produced water constituents, volumes, and the supply/ demand water-balance of the region.** DOE recognizes that the techno-economic relationship among these variables will determine the potential for a technology application's economic success in any specific location.

Developing such efficiency improvements and technologies would serve to reduce the need for deep well injection and help to support the water supply needs of both oilfield and non-oilfield industries, while simultaneously advancing the economic benefits of continued conventional and unconventional oil and natural gas development activities and U.S. energy independence.

The objective of this Oil and Gas FOA is to accelerate the development of potential process modifications, combinations or enhancements, or altogether new alternative processes and technologies-- including techno-economic analyses--that could achieve significant reduction in the quantity of produced water going to deep, underground injection well facilities. Commercialization of treatment technologies that reduce waste water and, create fit for purpose water supplies support the Produced Water Research and Development program, is another objective of this work. DOE's objective is to publish these detailed process enhancement design analyses to encourage private funding of their development and to stimulate additional public and private research which includes a university or nonprofit performer / subperformer. In addition, DOE seeks to accelerate technology advancement of these technology solutions through funding continued laboratory scale research and development. This FOA solicits applications for the completion of such analytical products and continued technology development at the laboratory scale.

**Awards:** 4 awards; Available funding: \$5,000,000

**Proposal Submission Deadline:** July 10, 2019

**Contact:** [Jodi.Collins@netl.doe.gov](mailto:Jodi.Collins@netl.doe.gov)

## **Grant Program: Buildings Energy Efficiency Frontiers & Innovation Technologies (BENEFIT) – 2019**

**Agency:** Department of Energy DE-FOA-0002090

**Website:** <https://eere-exchange.energy.gov/#FoaId621e495c-6186-48da-8308-3f8f3841ba37>

**Brief Description:** This Funding Opportunity Announcement (FOA) is being issued by the U.S. Department of Energy's (DOE) Office of Energy Efficiency and Renewable Energy (EERE) Building Technologies Office (BTO). BTO's overall goal is to improve the energy productivity of buildings without sacrificing occupant comfort or product performance. The goal is to use energy more productively and efficiently, not simply to use less energy. Progress towards achieving this goal will make building energy costs more affordable to the benefit of American families and businesses.

BTO research is focused on reducing energy intensity for major segments of the sector with the most opportunity for energy savings, while balancing the need to maintain occupant comfort and productivity, and product performance. This includes both new and existing buildings, both residential and commercial, including their energy-consuming and labor-saving equipment. The development of next-generation building technologies, including building materials, components, equipment, energy models and systems, is critical to increasing energy productivity in a cost-effective manner.

BTO's Emerging Technologies (ET) program invests in the research and development to create the next-generation building technologies, tools and systems to enhance energy efficiency. The program focuses on the most energy-intensive technologies for residential buildings and in commercial buildings, where the opportunity for cost-effective energy savings is greatest. These technologies include air conditioning, space heating, water heating, lighting and sensors & controls, all of which are addressed in this FOA. Achieving BTO's priorities across the building technology landscape requires sustained, multifaceted innovation. With this FOA, BTO intends to fund high-impact, early-stage research in the following areas:

Topic 1: Flexible Building Technologies

Topic 2: Heating, Ventilation and Air Conditioning (HVAC) Technologies

Topic 3: Solid-State Lighting (SSL) Technologies

**Awards:** Available Funding \$47,000,000

**Proposal Submission Deadline:** Concept Paper Submission Deadline: 5/21/2019 5:00 PM ET

- Full Application Submission Deadline: 7/15/2019 5:00 PM ET

**Contact:** [EERE-ExchangeSupport@hq.doe.gov](mailto:EERE-ExchangeSupport@hq.doe.gov) EERE eXCHANGE

## **NASA**

**Grant Program: ROSES 2019: Living With a Star Science**

**Agency:** NASA NNH19ZDA001N-LWS

**Website:** <https://nspires.nasaprs.com/external/solicitations/summary.do?sollId=%7B922F3674-F02A-FB17-DD75-0230277DDD&path=&method=init>

**Brief Description:** The Living With a Star (LWS) Program emphasizes the science necessary to understand those aspects of the Sun and Earth's space environment that affect life and society. The ultimate goal of the LWS Program is to provide a scientific understanding of the system that leads to predictive capability of the space environment conditions at Earth, other planetary systems, and in the interplanetary medium. The LWS program objectives are as follows: 1. Understand how the Sun varies and what drives solar variability. 2. Understand how the Earth and planetary systems respond to dynamic external and internal drivers. 3. Understand how and in what ways dynamic space environments affect human and robotic exploration activities. The LWS Program seeks to make progress in understanding the complex Heliophysics system, focusing on the fundamental science of the most critical interconnections.

Further information on the LWS Program can be found at the LWS website (<http://lwstrt.gsfc.nasa.gov/>). The LWS Science program maintains a strategy with three components, namely, Strategic Capabilities, Targeted Investigations, and CrossDisciplinary Infrastructure Building programs. Only the Targeted Investigations will be competed in this announcement. Proposers interested in Strategic Capabilities should see Program Element B.10 Living With a Star Strategic Capabilities. Cross-Disciplinary Infrastructure Building may be competed in ROSES-2020.

**Awards:** Available funding: \$4,900,000

**Notice of Intent:** Contact the program officer

**Proposal Deadline:** Step 1 Proposals Due December 05, 2019

**Contact:** Simon Plunkett Heliophysics Division Science Mission Directorate National Aeronautics and Space Administration Washington, DC 20546-0001 Telephone: (202) 358-2034 Email:

**Grant Program: University Leadership Initiative (ULI2)**

**Agency:** NASA NNH18ZEA001N-ULI2

**Website:** <https://nspires.nasaprs.com/external/solicitations/summary.do?solId=%7B0C9DAA3D-D086-0E16-55FD-E73B0015E0B9%7D&path=open&method=init>

**Brief Description:** ARMD created ULI for universities to take the lead, build their own teams, and set their own research path. ULI seeks new, innovative ideas that can complement the NASA ARMD portfolio and support the U.S. aviation community. ULI's strategic goals are: • Assist in achieving aviation outcomes defined in the ARMD Strategic Implementation Plan ("Strategic Plan") [1] through NASA-complementary research; • Transition research results to an appropriate range of stakeholders that leads to a continuation of the research. Transition can occur in a number of ways, including the following: o Creates a new product line in U.S. industry or a new ARMD project, o Whole ULI concept is transitioned to U.S. industry/ARMD project, o Part of the ULI concept is transitioned to U.S. industry/ARMD project, o ULI findings impact direction of U.S. industry/ARMD. • Provide broad opportunities for students at different levels, including undergraduate and graduate, to participate in aeronautics research; • Promote greater diversity in aeronautics through increased participation of minority-serving institutions and underrepresented university faculties in ULI activities. ULI provides the opportunity for university teams to exercise technical and organizational leadership in proposing unique technical challenges, defining interdisciplinary solutions, establishing peer review mechanisms, and applying innovative teaming strategies to strengthen the research impact.

**Awards:** Various

**Notice of Intent:** August 27, 2019

**Proposal Deadline:** Step 1 Proposals Due Aug 27, 2019

**Grant Program: ROSES 2019: B.7 Space Weather Science Applications Operations 2 Research**

**Agency:** NASA NNH19ZDA001N-SWO2R

**Website:** <https://nspires.nasaprs.com/external/solicitations/summary.do?solId={BD18A167-6DE8-1A35-A0ED-96F16AC6DE49}&path=&method=init>

**Brief Description:** In October 2015, the National Science and Technology Council (NSTC) in the Executive Office of the President released the National Space Weather Strategy and the National Space Weather Action Plan (SWAP). In March 2019, these were updated with the release of the National Space Weather Strategy and Action Plan (NSW-SAP). The objectives of the actions described in the SWAP and NSW-SAP are to improve the understanding of, forecasting of, and preparedness for space weather

events, recognizing the need for close cooperation among the federal agencies. The SWAP and NSW-SAP call for NASA, National Science Foundation (NSF), and Department of Defense (DOD) to identify and support basic research on space weather. They also direct NASA, Department of Commerce (DOC), and DOD to identify and support research opportunities that address targeted operational space-weather needs. Furthermore, they direct NASA, NSF, DOC, and DOD to facilitate the transition of space weather information and prediction capabilities to the Nation's space weather service providers (research-to-operations and operations-to-research). In response to the need to advance and coordinate the Nation's space weather research and operations capabilities, NASA has established the Heliophysics Space Weather Science Applications program, of which this operations-to-research (O2R) call is a part. NASA is supporting this funding opportunity in coordination with DOC/National Oceanic and Atmospheric Administration (NOAA) to promote O2R activities. For this call, the objective of O2R efforts is broadly defined as the joint pursuit of improvements of operational capabilities and advancements in related fundamental research.

The primary goal of this funding is to support research by the grant recipient to improve numerical models and/or data utilization techniques that could advance specification and/or forecasting capabilities and which could also lead to improved scientific understanding. Effective utilization of available data is encouraged. Employing data assimilation and/or machine-learning techniques is also encouraged.

**Awards:** Various

**Proposal Deadline:** Step-1 Proposal: December 16, 2019

**Contact:** James Spann Heliophysics Division Science mission Directorate NASA Headquarters Washington, DC 20546-0001 Telephone: 202-358-0574 Email: [jim.spann@nasa.gov](mailto:jim.spann@nasa.gov)

**Grant Program: Heliophysics Theory, Modeling, and Simulations: due dates TBD**

**Agency:** NASA NNH19ZDA001N-HTMS

**Website:** <https://nspires.nasaprs.com/external/solicitations/summary.do?solId=%7B97F8C4AD-A0D1-7593-92DD-0418FE347186%7D&path=&method=init>

**Brief Description:** The Heliophysics Theory, Modeling, Simulations (H-TMS) program is a component of the Heliophysics Research Program. Proposers interested in this program element are encouraged to see the overview of the Heliophysics Research Program in Appendix B.1 of this ROSES NRA. The H-TMS program was previously one element of the Heliophysics Grand Challenges Research (H-GCR) program (H-GCR-TMS, last competed in ROSES-2016 as program element B.5). Before that it was called "Heliophysics Theory Program" (HTP, last competed in ROSES-2013). For simplification, this program is now referred to as the Theory, Modeling, and Simulations (TMS) element in the Heliophysics program. The former Heliophysics Theory Program provides the foundation of the TMS element. Increasingly, as computing power becomes more affordable and more available, numerical simulations and modeling become tools that can and have been used synergistically with data analyses and rigorous theory development to solve the fundamental problems of Heliophysics. They lead the way to new understanding and drive science concepts for future strategic missions. The ultimate goal of TMS investigations is to provide a complete chain of reasoning extending from the basic laws of nature to comparison with observation to the identification of future quantitative tests of the behavior of the environment. NASA acknowledges this and renames the element "Theory, Modeling, and Simulations."

**Awards:** Various

**Notice of Intent:** Not Required

**Proposal Deadline:** TBD; Program Close date: Feb 14, 2020

**Contact:** Ekaterina Verner Heliophysics Division Science Mission Directorate NASA Headquarters Washington, DC 20546-0001 Telephone: (202) 358-1213 Email: [ekaterina.m.verner@nasa.gov](mailto:ekaterina.m.verner@nasa.gov)

**Grant Program: Astrophysics Research and Analysis: due dates TBD****Agency:** NASA NNH19ZDA001N-APRA**Website:** <https://nspires.nasaprs.com/external/solicitations/summary.do?solId=%7B90F8A275-496D-A0FA-82A0-0BF6E9ABBA67%7D&path=&method=init>

**Brief Description:** The Astrophysics Research and Analysis Program (APRA) program solicits basic research proposals for investigations that are relevant to NASA's programs in astronomy and astrophysics and includes research over the entire range of photons, gravitational waves, and particle astrophysics. Awards may be for up to four years' duration (up to five years for suborbital investigations), but shorter-term proposals are typical; four-year or five-year proposals must be well justified. Proposals for suborbital investigations are particularly encouraged. APRA investigations may advance technologies anywhere along the full line of readiness levels, from Technology Readiness Level (TRL) 1 through TRL 9. The emphasis of this program element is on technologies and investigations that advance NASA astrophysics missions and goals.

**Awards:** Various**Notice of Intent:** Not Required**Proposal Deadline:** TBD; Program Close date: Feb 14, 2020**Contact:** Dominic J. Benford Astrophysics Division Science Mission Directorate NASA Headquarters Washington, DC 20546-0001 Telephone: (202) 358-1261 Email: [Dominic.Benford@nasa.gov](mailto:Dominic.Benford@nasa.gov)**Grant Program: Heliophysics Data Environment Emphasis****Agency:** NASA NNH19ZDA001N-HDEE**Website:** <https://nspires.nasaprs.com/external/solicitations/summary.do?solId=%7BC2FBD0C9-081B-8A0E-B883-CF137C591C5D%7D&path=&method=init>

**Brief Description:** The Heliophysics Data Environment Enhancements (HDEE) program is a component of the Heliophysics Research Program and proposers interested in this program element are encouraged to see the overview of the Heliophysics Research Program in B.1 of this ROSES NRA. The work carried out for this program should be in support of the Heliophysics strategic goals and objectives in NASA's 2018 Strategic Plan and Chapter 4.1 of the NASA 2014 Science Plan (both at <https://science.nasa.gov/about-us/science-strategy>). The recommended priorities of the Heliophysics community are also discussed in the National Research Council Decadal Strategy for Solar and Space Physics report, Solar and Space Physics: A Science for a Technological Society (<http://www.nap.edu/catalog/13060/solar-and-space-physics-a-science-for-a-technological-society>). Note particularly the sections of the Decadal report dealing with the "DRIVE" initiative, more specifically "R" and "I," and the discussion in Appendix B. The specific context of this call is provided by the NASA Heliophysics Science Data Management Policy ([https://hpde.gsfc.nasa.gov/Heliophysics\\_Data\\_Policy\\_v1.2\\_2016Oct04.html](https://hpde.gsfc.nasa.gov/Heliophysics_Data_Policy_v1.2_2016Oct04.html)).

**Awards:** Various**Notice of Intent:** Not Required**Proposal Deadline:** TBD; Program Close date: Feb 14, 2020**Contact:** Jeffrey J. E. Hayes Heliophysics Division Science Mission Directorate NASA Headquarters Washington, DC 20546-0001 Telephone: (202) 358-0353 Email: [jhayes@nasa.gov](mailto:jhayes@nasa.gov)**National Endowment of Humanities****Grant Program: Summer Stipends****Agency:** National Endowment for the Humanities 20190925-FT**Website:** <https://www.neh.gov/grants/research/summer-stipends>

**Brief Description:** The National Endowment for the Humanities' Summer Stipends program aims to stimulate new research in the humanities and its publication. The program works to accomplish this goal by:

- Providing small awards to individuals pursuing advanced research that is of value to humanities scholars, general audiences, or both.
- Supporting projects at any stage of development, but most especially early-stage research and late-stage writing in which small awards are most effective
- Furthering the NEH's commitment to diversity and inclusion in the humanities by encouraging applications from independent scholars and faculty at Hispanic Serving Institutions, Historically Black Colleges and Universities, tribal colleges and universities, and community colleges

Summer Stipends support continuous full-time work on a humanities project for a period of two consecutive months. NEH funds may support recipients' compensation, travel, and other costs related to the proposed scholarly research.

Summer Stipends are awarded to individual scholars. Organizations are not eligible to apply.

**Awards:** Up to \$6,000

**Deadlines:** Application due: September 25, 2019

**Contact:** If you have questions about the program, Contact the Division of Research Programs Team 202-606-8200 [fpiri@neh.gov](mailto:fpiri@neh.gov)

---

### **Grant Program: Fellowship Programs at Independent Research Institutions**

**Agency:** National Endowment for the Humanities

**Website:** <https://www.neh.gov/grants/research/fellowship-programs-independent-research-institutions>

**Brief Description:** The Fellowship Programs at Independent Research Institutions (FPRI) program supports institutions that provide fellowships for advanced humanities research in the United States and abroad, foster communities of intellectual exchange among participating scholars, and provide access to resources that might otherwise not be available to the participating scholars.

Fellowship programs may be administered by independent centers for advanced study, libraries, and museums in the United States; American overseas research centers; and American organizations that have expertise in promoting humanities research in foreign countries. Individual scholars apply directly to the institutions for fellowships. In evaluating applications, consideration is given to the library holdings, archives, special collections, and other resources—either on site or nearby—that institutions make available to fellows.

**Awards:** Up to \$375,000

**Deadlines:**

Optional Draft due: July 10, 2019

Application due: August 21, 2019

**Contact:** If you have questions about the program, Contact the Division of Research Programs Team 202-606-8200 [fpiri@neh.gov](mailto:fpiri@neh.gov)

---

### **Grant Program: Digital Humanities Advancement Grants**

**Agency:** National Endowment for the Humanities

**Website:** <https://www.neh.gov/grants/odh/digital-humanities-advancement-grants>

**Brief Description:** Digital Humanities Advancement Grants (DHAG) support digital projects at different stages throughout their lifecycles, from early start-up phases through implementation and sustainability. Experimentation, reuse, and extensibility are hallmarks of this program, leading to innovative work that can scale to enhance scholarly research, teaching, and public programming in the humanities. This program is offered twice per year. Proposals are welcome for digital initiatives in any area of the

humanities. Through a special partnership with NEH and pending the availability of appropriated funds, the Institute of Museum and Library Services (IMLS) anticipates providing additional funding to this program to encourage innovative collaborations between museum or library professionals and humanities professionals to advance preservation of, access to, use of, and engagement with digital collections and services. IMLS and NEH may jointly fund some DHAG projects that involve collaborations with museums and/or libraries. Digital Humanities Advancement Grants may involve • creating or enhancing experimental, computationally-based methods, techniques, or infrastructure that contribute to the humanities; • pursuing scholarship that examines the history, criticism, and philosophy of digital culture and its impact on society; or • conducting evaluative studies that investigate the practices and the impact of digital scholarship on research, pedagogy, scholarly communication, and public engagement.

**Awards:** Up to \$375,000

**Deadlines:** Optional Draft due: May 8, 2019; Application due: June 19, 2019

**Contact:** If you have questions about the program, contact the Office of Digital Humanities staff at [odh@neh.gov](mailto:odh@neh.gov). Applicants wishing to speak to a staff member by telephone should provide in an e-mail message a telephone number and a preferred time to call. [odh@neh.gov](mailto:odh@neh.gov)

---

### **Grant Program: Research and Development Program**

**Agency: National Endowment for the Humanities**

**Website:** <https://www.neh.gov/grants/preservation/research-and-development>

**Brief Description:** The Research and Development program supports projects that address major challenges in preserving or providing access to humanities collections and resources. These challenges include the need to find better ways to preserve materials of critical importance to the nation's cultural heritage—from fragile artifacts and manuscripts to analog recordings and digital assets subject to technological obsolescence—and to develop advanced modes of organizing, searching, discovering, and using such materials.

This program recognizes that finding solutions to complex problems often requires forming interdisciplinary project teams, bringing together participants with expertise in the humanities; in preservation; and in information, computer, and natural science. The exact mix of specialists will depend on the particular nature of the project. Your project team should embody a well-defined humanities perspective that can frame your objectives and guide the project to successful completion. Such a perspective may be provided by members of an advisory committee, consultant(s), a project co-director, or another participant.

**Awards:** Maximum award amount: Tier I: \$75,000 Tier II provides awards up to \$350,000

**Deadlines:** Optional Draft due: April 3, 2019

Application due: May 15, 2019

**Contact:** 202-606-8570 [preservation@neh.gov](mailto:preservation@neh.gov)

---

### **Robert Wood Johnson Foundation**

**Grant Program: Equity-Focused Policy Research**

**Agency: Robert Wood Johnson Foundation**

**Website:** <https://www.rwjf.org/content/rwjf/en/library/funding-opportunities/2019/equity-focused-policy-research-building-evidence-on-early-care-and-education.html>

**Brief Description:** The purpose of this funding opportunity is to support action-oriented research that advances health equity, builds the knowledge base, and informs policymaking to increase **access to early care and education (ECE)** for low-income families. We define ECE as formal and informal nonparental

care for children birth to age 5. Families have access to ECE when they are able to find affordable ECE that supports their child's development and meets the families' needs.

Eligible applicant organizations include academic institutions, public entities and private nonprofit organizations, state and local government agencies, and for-profit organizations. All organizations must be based in the United States or its territories. Applicants also may represent partnerships between service providers or practitioners and researchers.

**Proposal Deadline:** July 25, 2019; 3.00 PM

---

## **Simon Foundation**

**Grant Program: Autism Research**

**Agency: Simon Foundation**

**Website:** <https://www.sfari.org/grant/bridge-to-independence-award-request-for-applications/?tab=overview>

**Brief Description:** The foundation is inviting applications to its annual Bridge to Independence Award Program. Created in 2015, the program promotes talented early-career scientists by facilitating their transition to research independence and providing grant funding at the start of their professorships. Through the program, grants of \$495,000 over three years will be awarded to senior postdoctoral fellows who intend to seek a tenure-track faculty position during the upcoming academic year. The award will be activated upon assumption of a tenure-track professorship at a U.S. or Canadian research institution.

Although eligible applicants currently must be in a postdoc training position, the award itself is not a training fellowship but instead is a research grant to newly appointed faculty. The program's selection process is uniquely designed to enhance a BTI awardee's job prospects by providing a letter that specifies SFARI financial commitment to the research project once the awardee has secured a suitable faculty position. Applications are encouraged from postdoctoral fellows working on autism-related projects, but the award is also open to researchers who are not currently working on autism but are interested in starting research projects in this area and who have expertise that could positively impact research on this complex disorder.

**Proposal Deadline:** Letters of Intent and recommendation are due August 8. Upon review, selected applicants will be invited to submit a full proposal on a rolling basis between December 1, 2019, and December 1, 2020.

---

## **Mozilla**

**Grant Program: Mozilla Open Source Support (MOSS) Awards**

**Agency: Mozilla**

**Website:** <https://www.mozilla.org/en-US/moss/>

**Brief Description:** Mozilla was born out of and remains part of the open source and free software movement. Through the Mozilla Open Source Support (MOSS) awards program, we recognize, celebrate, and support open source projects that contribute to Mozilla's work and to the health of the Internet. MOSS awards are available in the following tracks: Foundational Technology; Global Mission Partners; Secure Open Source Fund.

**Track I: Foundational Technology**

The Foundational Technology track supports open source projects that Mozilla relies on, either as an embedded part of our products or as part of our everyday work.

**Tracks II & IV: Global Mission Partners**

The Mission Partners track supports open source projects that significantly advance Mozilla's mission.

### **Track III: Secure Open Source Fund**

The Secure Open Source (“SOS”) track supports security audits for widely used open source software projects as well as the remedial work needed to rectify the problems found.

**Proposal Deadline:** MOSS applications are accepted on a rolling basis and are reviewed monthly by an expert selection panel. Reviewers include current Mozilla staff, senior Mozilla alumni, and other respected open source experts.

**Contact:** If interested, please send an email to Atam Dhawan ([dhawan@njit.edu](mailto:dhawan@njit.edu)) or Richard Rosenberg at [rnr@njit.edu](mailto:rnr@njit.edu)

---

### **John D. And Catherine T. MacArthur Foundation**

#### **Grant Program: 2020 Scientific Innovation Award**

**Agency:** John D. And Catherine T. MacArthur Foundation

**Website:** <https://www.100andchange.org/#home>

**Brief Description:** Through its 100&Change competition, the John D. And Catherine T. MacArthur Foundation awards a single \$100 million grant in support of a bold proposal that will deliver measurable progress toward solving a significant critical problem of our time. Proposals from any sector are encouraged, and any organization or legal entity (with the exception of government agencies) may apply. Individuals are ineligible to apply. The foundation suggests that applicants use an organizational readiness tool to investigate how well-suited both the organization and its proposal are for the competition prior to applying.

**Awards:** \$100 million grant

**Proposal Deadline:** To be eligible, applicants must register by July 16, 2019. Applications will be accepted through August 6, 2019, with the top hundred proposals to be selected in February 2020 and finalists selected in the spring of 2020.

---

### **Streamlyne Question of the Week**

**Question:** How can I update my eRA Commons ID for all future NIH proposals?

**Answer:** Go to Main Menu>Setting>Person Extended Attributes, click "Edit", enter it under "eRA Commons User Name" and submit the change/update.

More FAQs on Streamlyne: Please visit <http://www.njit.edu/research/streamlyne/>

---

### **Streamlyne Information**

Streamlyne User Manuals: <http://www.njit.edu/research/streamlyne/>

**Streamlyne\_NewUserManual\_CommonElements.docx** : This manual provides a reference to all the common elements of Streamlyne Research. This user manual is a good document to review each module’s functionality.

**Streamlyne\_NewUserManual\_PD&PDBudget.docx**: This is a user manual on proposal and budget development in Streamlyne. The content herein explain the use and functionality of this module. This is the most useful Streamlyne document for PIs and users new to Streamlyne.

New “How to Do” videos have been posted on the research website <http://www5.njit.edu/research/streamlyne/>.

Faculty and staff having any questions on proposal submission, may contact their college representatives, and also follow up with **Justin Samolewicz, Associate Director (Pre Award)** 973-596-3145; [justin.m.samolewicz@njit.edu](mailto:justin.m.samolewicz@njit.edu); and **Eric Hetherington, Director, Sponsored Research Programs Administration** 973-596-3631; [eric.d.hetherington@njit.edu](mailto:eric.d.hetherington@njit.edu). The college representatives to help PIs on proposal submissions are

**John McCarthy**, NCE Director of Research; (973) 596-3247; [john.p.mccarthy@njit.edu](mailto:john.p.mccarthy@njit.edu)  
**Cristo Leon**, CSLA Director of Research; (973) 596-6426; [cristo.e.yanezleon@njit.edu](mailto:cristo.e.yanezleon@njit.edu)  
**Sean Andrews**, YWCC Director of Research; (973) 596-5352; [sean.t.andrews@njit.edu](mailto:sean.t.andrews@njit.edu)

## Need Information about Funding?

### **Finding Research Opportunities and Collaborations (FROC)** **Walk-In Open-Hour Discussion with SVPR Over Tea**

Every Thursday: 3.00 PM-4.00 PM; 340 Fenster Hall

The Office of Research has started a new service to help all faculty and staff explore collaborative research opportunities and currently active RFPs (Request for Proposals) for potential proposal development and submission. Faculty and research staff members are welcome to meet with Senior Vice Provost for Research Atam Dhawan at the open-hour every Thursday from 3.00 PM to 4.00 PM to discuss research opportunities related issues including the following but not limited to:

- Research opportunities and potential collaborations
- Currently active RFPs and developing collaborative teams for proposal submission
- Proposal review criterion for specific RFP/program/agency
- Proposal concept and draft review in the context of review criterion
- Future plans for proposal development and submission
- Invention disclosures, patent applications and processing of intellectual property
- External faculty research awards including fellowships

Though *walk-ins* are welcome during the open-hour, faculty members are encouraged to email SVPR Atam Dhawan ([dhawan@njit.edu](mailto:dhawan@njit.edu)) about specific questions on research opportunities and needs to be discussed in advance for more detailed discussion.

The open-hour session with individuals or small groups of faculty and research staff members is expected to focus on finding research opportunities, developing collaborative teams, exploring the review criterion and reviewing program requirements. Specific proposal submission and grant management issues can be discussed with Office of Research staff separately.

Enjoy coffee/tea and cookies with SVPR over the discussion.

For any questions and additional information, please send an email to SVPR at [dhawan@njit.edu](mailto:dhawan@njit.edu).

---
