Special Announcements

NSF Proposal & Award Policies & Procedures Guide (PAPPG) 2020

Reminder: Revised Guidelines Now Effective October 5, 2020

NSF PAPPG Summary of Changes:

https://www.nsf.gov/pubs/policydocs/pappg20_1/sigchanges.jsp

NSF Summary of PAPPG Changes Page on Research.Gov Website: [Click Here](#)

NSF Biosketch Webpage Link: <https://www.nsf.gov/bfa/dias/policy/biosketch.jsp>

NSF Current and Pending Link: <https://www.nsf.gov/bfa/dias/policy/cps.jsp>

Effective October 5, 2020, the National Science Foundation (NSF) will begin enforcing the [Proposal & Award Policies & Procedures Guide](#) (PAPPG) (NSF 20-1) requirement to use NSF-approved formats for

the preparation of the Biographical Sketch and Current and Pending Support proposal documents. The NSF-approved formats are [SciENcv: Science Experts Network Curriculum Vitae](#) and an NSF fillable PDF.

All other PAPPG (NSF 20-1) changes were effective on June 1, 2020. Please refer to the complete list of PAPPG (NSF 20-1) [significant changes and clarifications](#) which include the IT system changes and other policy-related changes. A set of [Frequently Asked Questions \(FAQs\) on proposal preparation and award administration](#) related to NSF [PAPPG](#) (NSF 20-1) is also available and includes Biographical Sketch and Current and Pending Support information.

Biographical Sketch and Current and Pending Support Websites

- The NSF [Biographical Sketch](#) and [Current and Pending Support](#) websites include links to the NSF-fillable PDF formats, updated FAQs, and instructions.
- For the fillable PDF formats, NSF recommends users download and save the blank PDF document prior to adding content. Populating content directly into a web browser (e.g., Chrome or Safari) may result in formatting inconsistencies. The completed and saved PDF can then be uploaded via FastLane, Research.gov, or Grants.gov.
- Beginning on October 5, 2020, links to the [Biographical Sketch](#) and [Current and Pending Support](#) websites will also be located in FastLane (on the Biographical Sketch and Current and Pending Support Personnel pages), in Research.gov (on the Biographical Sketch and Current and Pending Support Upload pages), and in Grants.gov (on the NSF Senior Key Person Profile form version 2.0).

Change of Principal Investigator (PI) and Add/Change Co-PI Requests

- Effective October 5, 2020, Biographical Sketch and Current and Pending Support documentation must also be in an NSF-approved format when uploaded with a Change of PI and an Add/Change co-PI request in FastLane.

Research Performance Progress Report (RPPR) Submissions with Active Other Support Changes

- Effective October 5, 2020, PIs and co-PIs must include an NSF-approved format for Current and Pending Support when notifying NSF that active other support has changed since the award was made, or since the most recent annual report.
- This new requirement serves as NSF's implementation of the revised RPPR, a uniform format for reporting performance progress on Federally-funded research projects and research-related activities.
- Further details about the RPPR can be found on the Research.gov [About Project Reports website](#).

Automated Compliance Checks for NSF-approved Formats

- Biographical Sketch and Current and Pending Support documents not in an NSF-approved format will trigger a compliance error and ultimately will prevent proposal submission or completion of the post-award action. This compliance check applies to proposals, Change of PI requests, Add/Change co-PI requests, and relevant RPPR submissions.
- The complete lists of FastLane and Research.gov automated proposal compliance checks effective October 5, 2020, are available on the [Automated Compliance Checking of NSF Proposals website](#).
- Note that automated compliance checks also apply when a proposal file update (PFU) is performed on a proposal. Proposers should be aware that if a proposal was previously submitted successfully, a PFU performed on the proposal will be prevented from submission if the proposal does not comply with the compliance checks in effect at the time.

NSF-approved Format Updates

Based on feedback from the research community, NSF has enhanced both approved formats, and users are encouraged to use the latest versions. Please see the system-related [FAQs on using SciENcv](#) and the system-related [FAQs on using the NSF fillable PDF](#) for a list of the improvements to each format. In particular, note the permitted use of “et al.” for publication citations in the Biographical Sketch when

listing multiple authors. Senior personnel who wish to include publications in the products section of the Biographical Sketch that include multiple authors may, at their discretion, choose to list one or more of the authors and then "et al." in lieu of including the complete listing of authors' names.

SciENcv Enhancements

The SciENcv module for creating NSF Biographical Sketch and Current and Pending Support documents will be updated prior to October 5, 2020; however, all SciENcv-generated Biographical Sketch and Current and Pending Support PDF documents created on or after April 1, 2020 remain compliant in NSF systems.

Prior to the October 5th requirement to use the NSF-approved format, SciENcv will make a number of enhancements that include:

- ability for users to reorder products and appointments in the Biographical Sketch
- ability for users to edit long author citations imported from ORCID on the Biographical Sketch and add “et al.”
- addition of a Current and Pending Support tool tip to provide clarification and guidance on how users should document support under a fiscal year calendar

Please see the system-related [FAQs on using SciENcv](#) for details.

As a reminder, the SciENcv tool integrates with ORCID, enabling users to populate the Biographical Sketch by importing data directly from ORCID records rather than having to manually enter all the required information. This helps reduce administrative burden associated with the Biographical Sketch preparation process. Additionally, SciENcv allows users to grant access to delegates to assist with maintaining and updating data. SciENcv also offers users a dynamic and more customized PDF. For example, users with fewer Current and Pending Support entries may elect to use SciENcv to generate their Current and Pending Support PDF document since SciENcv will produce a PDF without any blank pages. Conversely, the Current and Pending Support fillable PDF will always be 15 pages regardless of how much data is included.

Additional Training Resources

To learn more about the NSF-approved formats for Biographical Sketch and Current and Pending Support, please view the [NSF PAPPG \(NSF 20-1\) webinar](#) and [NSF-Approved Formats for the Biographical Sketch & Current and Pending Support Sections of NSF Proposals webinar](#).

SciENcv has created the following materials to guide NSF users through the preparation of the NSF documents available in SciENcv:

- [NSF Biographical Sketch Video Tutorial](#)
- [NSF Current and Pending Support Video Tutorial](#)
- [NSF-specific Bookshelf Resource](#) (includes screenshots and step-by-step instructions)

Fall 2020 NSF Virtual Grants Conference National Science Foundation

Save the Date! Join the National Science Foundation (NSF) for the very first NSF Virtual Grants Conference, to be held during the weeks of **November 16** and **November 30, 2020**.

This event is designed to give new faculty, researchers and administrators key insights into a wide range of current issues at NSF. NSF staff will be providing up-to-date information about the proposal and award process, specific funding opportunities and answering attendee questions.

Registration will be free of charge and opens on **Thursday, October 29 at 12 p.m. EST**. Each conference session will have its own Zoom registration page. Please sign up only for sessions that you

are able to attend. For those who cannot attend the live conference, **all recorded conference sessions will be available on-demand** shortly after the event. We anticipate the sessions will reach capacity very quickly, so we encourage you to register as soon as possible. We will send an email reminder to our listserv on **Wednesday, October 28**. In the meantime, please feel free to check nsfpolicyoutreach.com/ for the most up-to-date information, and view [recordings](#) of sessions from last year's event. You may also contact us via email at grants_conference@nsf.gov.

NJIT Pandemic Recovery Plan

Research Continuity and Phased Recovery Plan

<https://research.njit.edu/njit-pandemic-recovery-plan>

NJIT faculty, staff, and students at research facilities must follow the specific social distancing and safety protocols including the use of personnel protective equipment (PPE) as required by the institutional, state and federal guidelines in the respective phase of the research continuity plan. State and national information regarding current conditions can be found at:

- New Jersey's COVID-19 information hub: <https://covid19.nj.gov/index.html>
- CDC guidelines on "Symptoms of Coronavirus": <https://www.cdc.gov/coronavirus/2019-ncov/symptoms-testing/symptoms.html>
- CDC guidelines on "Use of Cloth Face Coverings to Help Slow the Spread of COVID-19": <https://www.cdc.gov/coronavirus/2019-ncov/prevent-getting-sick/diy-cloth-face-coverings.html>

The details on NJIT Research Continuity and Phased Recovery Plan and associated protocols are posted on the website <https://research.njit.edu/njit-pandemic-recovery-plan>

Grant Opportunity Alerts

Keywords and Areas Included in the Grant Opportunity Alert Section Below

NSF: Cybersecurity Innovation for Cyberinfrastructure (CICI); Accelerating Research through International Network-to-Network Collaborations (AccelNet); Partnerships for Research and Education in Materials (PREM); Division of Molecular and Cellular Biosciences: Investigator-initiated research projects (MCB); Transitions to Excellence in Molecular and Cellular Biosciences Research (Transitions); Plant Genome Research Program (PGRP); Division of Integrative Organismal Systems Core Programs; Mid-scale Research Infrastructure-1 (Mid-scale RI-1); Division of Environmental Biology (core programs) (DEB)); Sustaining Infrastructure for Biological Research (Sustaining); Infrastructure Innovation for Biological Research (Innovation); Infrastructure Capacity for Biological Research (Capacity); Secure and Trustworthy Cyberspace (SaTC); Dear Colleague Letter: Future of International Research Collaboration Post COVID-19; Formal Methods in the Field (FMitF); Research on Emerging Technologies for Teaching and Learning (RETTL)
NIH: BRAIN Initiative Fellows (F32); BRAIN Initiative: Pilot resources for brain cell type-specific access and manipulation across vertebrate species (U01); Genomic Data Analysis Network: Genomic Data Center (U24)

Department of Defense/US Army/DARPA/ONR: Long Range Broad Agency Announcement (BAA) for Navy and Marine Corps Science and Technology; Young Faculty Award (YFA); Verified Security and Performance Enhancement of Large Legacy Software (V-SPELLS); DoD Combat Readiness, Rapid Development and Translational Research Award; Defense Sciences Office Office-wide; C4ISR, Information Operations, Cyberspace Operations and Information Technology System Research

Department of Transportation: Advanced Transportation and Congestion Management Technologies Deployment Initiative

Department of Agriculture: TAT for Innovative Regional Wastewater Treatment Solutions Grant Pilot Program; Community Connect Grant Program; NRCS's Regional Conservation Partnership Program; Agriculture and Food Research Initiative - Foundational and Applied Science

Department of Labor: Supply Chains Tracing Project

Department of Commerce/EDA: FY2021 to FY2023 NOAA Broad Agency Announcement (BAA); FY2021 Marine Debris Research

EPA: Center for Early Lifestage Vulnerabilities to Environmental Stressors

Department of Energy: Buildings Energy Efficiency Frontiers & Innovation Technologies (BENEFIT)

NASA: University Student Research Challenge; Heliophysics Science Center (HSC); ROSES 2020: Science Team for the OCO Missions

National Endowment of Humanities: Collaborative Research; Digital Humanities Advancement Grants; Scholarly Editions and Scholarly Translations

Private Foundations: New Jersey Health Foundation: Innovation Grants Program; Bill and Malina Gates Foundation: Grand Challenge: Balance the Equation - A Grand Challenge for Algebra 1

Recent Research Grant and Contract Awards

Congratulations to faculty and staff on receiving research grant and contract awards!

PI: Treena Arinzeh (PI)

Department: Biomedical Engineering

Grant/Contract Project Title: Combination Treatment of Stem Cells with GAG Variants for Osteoarthritis

Funding Agency: Moseley Foundation

Duration: 09/25/20-09/24/21

PI: Vivek Kumar (PI)

Department: Biomedical Engineering

Grant/Contract Project Title: Bioactive Scaffold for TMJ Disc Regeneration by Endogenous Stem/Progenitor Cells **Funding Agency:** NIH

Duration: 18/01/20-07/31/21

[Back to Contents](#)

[In the News...](#)

(National and Federal News Related to Research Funding and Grant Opportunities)

The US Military to Launch Largest 5G Experiments: After months of expectation, planning, and consulting with the services and with industry, the Pentagon is finally ready to start testing new concepts for 5G communications at five bases across the country. The contracts to the various companies taking part in the tests, which defense officials announced on Thursday, are worth a total of \$600 million. By Pentagon standards, that sum isn't enormous. But the experiments offer companies a chance to refine 5G offerings that will be key to their businesses in the future, and will reveal how industry and the military will manage and share spectrum. That has huge implications for the future of the telecommunications industry and the way consumers use the Internet.

"These are really at-scale experiments. They aren't just little demonstrations in a small area, like a science experiment," Joseph Evans, the director for 5G in the Office of the Director of Research and Engineering, told reporters on Thursday. "These are at-scale deployments of 5G technology and an evaluation of DOD and industry dual-use" applications.

The test sites include:

- Joint Base Lewis-McChord in Washington, focusing on augmented and virtual reality training.
- Naval Base San Diego in California, focusing on smart warehousing.
- Marine Corps Logistics Base in Albany, Georgia, focusing 5G smart warehousing but for vehicles.
- Nellis Air Force Base in Nevada, focusing on distributed command and control.
- Hill Air Force Base in Utah, focusing on dynamic spectrum sharing.

More information is available on the website <https://www.govexec.com/technology/2020/10/us-military-about-launch-its-largest-5g-experiments-yet/169150/>

Chairs Johnson and Foster Express Disapproval of Proposed Rule to Restrict Visas for International Students: The Department of Homeland Security (DHS) issued a proposed rule aimed at restricting visas for international students. The proposed rule would place an expiration date on visas that had previously lasted the duration of a student's degree program. Now most international student visas would expire after four years. Increased restrictions will also be placed on individuals born in a few dozen countries with a visa overstay rate that exceeds 10 percent, with visas expiring after two years, severely restricting their ability to obtain any degree from a U.S. institution. Over the past several years, temporary visa holders have earned a disproportionately large share of bachelor's degrees and have earned either half or more than half of U.S. doctoral degrees in certain STEM fields according to statistics from the National Science Foundation.

Lawmakers Introduce Bipartisan Resolution Recognizing the 50th Anniversary Of The National Oceanic And Atmospheric Administration: House Science, Space, and Technology Committee Chairwoman Eddie Bernice Johnson (D-TX) and Ranking Member Frank Lucas (R-OK) along with House Natural Resources Committee Chairman Raúl Grijalva (D-AZ) introduced a [bipartisan resolution](#) to recognize the National Oceanic and Atmospheric Administration's (NOAA) 50th anniversary which falls on October 3. NOAA's history of environmental stewardship dates back to the 19th century, with the creation of the Survey of the Coast in 1807 by President Thomas Jefferson, followed by the Weather Bureau and the Commission on Fish and Fisheries, all of which came together under one roof when NOAA was established in 1970. "I am delighted to be introducing this bipartisan resolution with my colleagues to recognize NOAA for the integral role they have played to protect the health and safety of the American people over the last 50 years," said Chairwoman Johnson. "There has

never been a more important time for Congress to strengthen and support NOAA as we combat climate change, work to protect our most precious natural areas, and continue to uphold scientific integrity in our federal agencies.” A report is posted on the [website](#).

House Passes Legislation To Address Climate Change by Investing in Clean Energy Research And Development: The House of Representatives voted on and passed [H.R. 4447, the Clean Economy Jobs and Innovation Act](#). H.R. 4447 includes programs to develop and deploy clean energy resources; improve the efficiency of our homes and businesses; electrify our transportation sector; modernize the grid and enhance its resiliency; prioritize the needs of environmental justice communities; reduce carbon pollution from industrial and traditional sources; develop advanced nuclear energy technologies; and much more. This landmark bill contains over a dozen bipartisan pieces of legislation introduced by members of the Science, Space, and Technology Committee this Congress.

Webinar and Events

Event: National CSforAll Research-Practice Partnership Workshop

Sponsor: NSF

When: October 12, 2020 to October 16, 2020; 1.00 PM – 3.45 PM

Website: https://www.nsf.gov/events/event_summ.jsp?cntn_id=301136&org=NSF

Brief Description: This fall, The National Network of Education Research-Practice Partnerships (NNERPP) is excited to host a virtual RPP Development Workshop to support research-practice partnership teams applying for [NSF’s Computer Science for All \(CSforAll\) RPP solicitation](#).

Teams will develop a deeper understanding of what an RPP is, how to form and sustain one, and how to design an RPP project or proposal. In particular, this virtual workshop will emphasize how to identify and refine the problem of practice your partnership seeks to address, strategies for how to carry out partnership research in support of the identified problem, evaluation questions related to improving your partnership efforts, and the kinds of data you will need to collect to inform and improve your project in a timely way. You will leave the workshop with a plan or outline for a project or proposal that you can further develop as an established team.

Each day of the workshop includes two blocks of 75 minutes each. During Monday through Thursday, in the first block we will offer information sessions that will present critical information from the workshop curriculum and answer questions from the entire group. In the second block during those four days, we will offer the opportunity for one-on-one coaching with experienced coaches for additional customized support. ***This one-on-one coaching opportunity is open only to the first 36 teams who apply and get accepted.*** All subsequent teams who get accepted will be added to a waiting list for coaching. On Friday, the teams that have been selected for the additional coaching opportunity will sign up to meet individually with their coaches for a final feedback session.

To Join: For more detailed workshop information, please review the [workshop information on the NNERPP website](#). Note the times listed on the NNERPP website are in CST.

Event: POLITICO AI Summit: An AI-Powered World

Sponsor: POLITICO

When: October 15, 2020; 10.00 AM

Website: <https://www.politico.com/live-events/2020/10/15/politico-ai-summit-an-ai-powered-world-000985>

Brief Description: Artificial intelligence is changing the world we live in and how we live. The coronavirus pandemic has served as a testing ground for AI's potential with scientists incorporating AI into certain aspects of the public health response to the global crisis. But, while the spread of Covid-19 is providing more opportunities to experiment with AI, ongoing challenges remain around AI governance at the global level and how it is regulated at the federal and city levels in the U.S., its implications for the future of work, the economy, policing and law enforcement, and continued questions around data quality, privacy, ethics and racial equality.

On **Thursday, October 15**, join POLITICO as it virtually convenes its 3rd AI Summit in the U.S., bringing together policymakers, federal officials, technologists, private-sector executives, scientists and advocates to explore the future of AI as the world tries to recover from the pandemic and as the U.S. also deals with social unrest and a presidential election.

Featured Speakers to be announced.

To Join: Please register at the above URL.

Event: Deep Dive Into Deep Tech Incubation Workshop

Sponsor: NSF

When: September 25, 2020 12.30 PM – 1.30 PM

October 16, 2020 12.00 PM – 1.00 PM

November 18, 2020 12.00 PM – 1.00 PM

December 18, 2020 12.00 PM – 1.00 PM

Website: https://www.nsf.gov/events/event_summ.jsp?cntn_id=301160&org=NSF

Brief Description: Part I

Friday, September 25, 12 pm Eastern (90 min)

How COVID-19 Is Affecting The Deep Tech Startup Ecosystem

COVID-19 has been the most profound shock to the national research enterprise since World War II. The repercussions are still shaking out, but lost research output due to temporary closures of most state economies has wreaked havoc on the pace of innovation and commercialization in the U.S. It is expected that the financial and economic effects of the pandemic on capital markets will be a catastrophic event for many early-stage companies, especially those that are bringing deep technologies to market. The first part of the Deep Dive Into Deep Tech Incubation webinar series will feature thought leaders from government, academia, startups, and the investment community to discuss how deep tech entrepreneurs can try to weather COVID-19 and make it out on the other side of this ongoing crisis stronger and better prepared.

Part II

Friday, October 16, 12 pm Eastern (60 min)

Deep Tech Incubation Fundamentals and Best Practices

Deep tech innovators and entrepreneurs often need increasing levels of support due to the capital intensity and long lead times required to commercialize their innovations. Incubators and accelerators play a critical role in helping fill gaps and connect dots for aspiring deep tech startups, providing everything from mentorship to access to talent and matchmaking with various capital sources. This support is essential to an early-stage company's success, especially given the plethora of well-intentioned programs that can often confuse or misguide aspiring entrepreneurs and innovators who are almost always working with limited resources. The second part of the Deep Dive Into Deep Tech Incubation webinar series will feature leading experts from the nation's top deep tech incubators and accelerators who will share tips, lessons learned, and best practices for deep tech startups and venture development organizations.

Part III

Wednesday, November 18, 12 pm Eastern (60 min)

Deep Tech Incubation and Academia Nexus

Deep tech innovation is often born out of academic research at campuses across the nation. As a result, colleges and universities play a unique and critical role in fostering the development and commercialization of technologies that will transform our lives. The technology discovery and transfer processes can be especially risky for deep tech innovations given the complexity of scaling them from lab to market and understanding potential commercial applications. However, colleges and universities remain at the forefront of deep tech incubation. Their people and programs that support this research translation process directly impact the strength and competitiveness of technology innovation in the U.S. The third part of the Deep Dive Into Deep Tech Incubation webinar series will feature visionaries from leading academic institutions to discuss this research translation nexus and how they manage the deep tech commercialization process and instill strong entrepreneurial cultures at their respective campuses.

Part IV

Friday, December 18, 12 pm Eastern (60 min)

Deep Tech Venture Capital and Corporate Partnerships

Deep tech startups typically require significant capital and time to get their innovations into the market. More and more financial investors have entered this space as they view the outsize financial returns that are possibly worth the risk of supporting deep tech startups. In addition, more corporate and strategic partners are competing by investing in innovation, whether it is structured as direct investments in early-stage companies or other forms of support like joint ventures or non-recurring engineering. These venture capital and corporate partnerships provide highly valuable validation for deep tech startups, which enables them to raise follow-on capital and secure the partnerships that are critical to commercializing their technology. The fourth and final part of the Deep Dive Into Deep Tech Incubation webinar series will feature top investors and corporations who are actively partnering with deep tech startups as well as entrepreneurs who have benefited from this type of support.

To Join the Webinar: Register at <https://www.eventbrite.com/e/deep-dive-into-deep-tech-incubation-series-tickets-114163867200>

Event: BIO-wide Virtual Office Hours

Sponsor: NSF

When: October 19, 2020 11:00 AM to October 22, 2020 4:00 PM

Website: https://www.nsf.gov/events/event_summ.jsp?cntn_id=301092&org=NSF

Brief Description: As highlighted in [Important Notice No. 147](#) and detailed in a recent [Dear Colleague Letter \(NSF 20-129\)](#), in accordance with NSF's proposal submission modernization effort, the Directorate for Biological Sciences (BIO) will implement a requirement for submission of full proposals via Research.gov (or Grants.gov) for BIO solicitations that accept proposal submission at any time, i.e., have no deadlines. This is the first phase in an eventual shift to all proposals being submitted via Research.gov (or Grants.gov) instead of in FastLane.

To support the community through this migration, we are offering a series of BIO-wide virtual office hours during which high-level information about the process will be provided and as an opportunity for the community to ask questions of BIO program officers.

The virtual office hours will occur:

- **Mon, Oct 19, 2020, 11:00 AM – 12:00 PM EDT**
- **Tues, Oct 20, 2020, 10:00 AM – 11:00 AM EDT**
- **Wed, Oct 21, 2020, 1:00 PM – 2:00 PM EDT**
- **Thurs, Oct 22, 2020, 3:00 PM – 4:00 PM EDT**

To Register: please visit https://nsf.zoomgov.com/webinar/register/WN_-pXaabftTeiF2phfTaDxIw. Please only register to attend one session.

Event: BIO-wide Virtual Office Hours

Sponsor: NSF

When: October 19, 2020 11:00 AM to October 22, 2020 4:00 PM

Event: DEB Virtual Office Hour: PRFB

Sponsor: NSF

When: October 19, 2020 1.00 PM – 2.00 PM

Website: https://www.nsf.gov/events/event_summ.jsp?cntn_id=301305&org=NSF

Brief Description: Upcoming Virtual Office Hours: Postdoctoral Research Fellowships in Biology (PRFB): Join us Monday, October 19th from 1pm-2pm EDT for DEB's next Virtual Office Hour. Program Officers will provide an introduction to the Postdoctoral Research Fellowships in Biology (PRFB) Solicitation ([NSF 20-602](#)). Representatives from each of the four DEB core programs will be available for questions, which can be on any DEB or NSF topic.

To Register: Please use the registration link below to participate. Upcoming DEB Virtual Office Hours are announced ahead of time on DEBrief, so sign up for blog notifications for reminders.

[REGISTER HERE](#)

Event: DMS Virtual Office Hours

Sponsor: NSF

When: October 20, 2020 1.00 PM – 2.00 PM

Website: https://www.nsf.gov/events/event_summ.jsp?cntn_id=301375&org=NSF

Brief Description: The Division of Mathematical Sciences (DMS) is hosting virtual office hours to share information about NSF's current operations and provide guidance to the mathematical sciences community. This will also allow the community to ask questions, share concerns, or offer suggestions on how DMS can do more to address the impact of COVID-19 on the research community. All members of the mathematics research community interested in the work of DMS are welcome to attend.

Events are planned at roughly monthly intervals, and the topics will vary for each event. The event will be in the form of a webinar, starting with a brief presentation of a few selected current topics, with DMS program directors available to answer questions from the community.

To Join the Webinar: Participants should register (and may do so in advance) at the web page

https://nsf.zoomgov.com/webinar/register/WN_jE7BWegyQUGG5zguBZhWJQ

After registering, you will receive a confirmation email containing information about joining the webinar.

Event: Sustainable Regional Systems Research Networks Webinar

Sponsor: NSF

When: October 27, 2020 2.30 PM – 3.30 PM

Website: https://www.nsf.gov/events/event_summ.jsp?cntn_id=301383&org=NSF

Brief Description: NSF will hold an informational webinar on October 27, 2020, starting at 2:30 PM Eastern to discuss the Sustainable Regional Systems Research Networks (SRS RNs) solicitation and answer questions. The United States is made up of regional systems comprising interdependent urban and rural systems and every community category between urban and rural. Urban systems are dependent on rural systems for the provisioning of food, energy, water, and other materials and natural resources, while rural systems are dependent on urban systems for markets, manufactured goods, and medical resources. These systems are also connected by ecological processes that both influence and are influenced by human behavior. The vital interconnection of urban-rural systems underscores the critical need for the advancement of sustainable regional systems (SRS). The goal of the NSF SRS RNs solicitation is to fund convergent research and education that will advance sustainable regional systems science, engineering, and education to facilitate the transformation of current regional systems to enhance sustainability.

To Join the Webinar: Register in advance at

https://nsf.zoomgov.com/webinar/register/WN_nh16JLVfQ3qzYtRqLlxA7g

- **Prepare in advance** by testing your internet connection and devices with Zoom software: <https://zoom.us/test>. Learn more about participating in NSF meetings remotely at <https://beta.nsf.gov/about/participant..>

[Grant Opportunities](#)

[National Science Foundation](#)

Grant Program: Cybersecurity Innovation for Cyberinfrastructure (CICI)

Agency: National Science Foundation NSF 21-512

RFP Website: <https://www.nsf.gov/pubs/2021/nsf21512/nsf21512.htm>

Brief Description: The objective of the Cybersecurity Innovation for Cyberinfrastructure (CICI) program is to develop, deploy and integrate solutions that benefit the broader scientific community by securing science data, workflows, and infrastructure. CICI recognizes the unique nature of modern, rapid collaborative science and the breadth of security expertise, infrastructure and requirements among different practitioners, researchers, and scientific projects. CICI seeks projects in three program areas:

1. **Usable and Collaborative Security for Science (UCSS):** Projects in this program area should support novel and applied security and usability research that facilitates scientific collaboration, encourages the adoption of security into the scientific workflow, and helps create a holistic, integrated security environment that spans the entire scientific CI ecosystem.

2. **Reference Scientific Security Datasets (RSSD):** Projects in this program area should capture the unique properties of scientific workflows and workloads as reference data artifacts to support reproducible security research and protect the scientific process.
3. **Scientific Infrastructure Vulnerability Discovery (SIVD):** Projects in this program area should develop and apply techniques to proactively discover vulnerabilities and weaknesses in scientific infrastructure.

Awards: Standard Grant or Continuing Grant; **Anticipated Funding Amount:** \$5,000,000 to \$7,000,000

Letters of Intent: Not required

Proposal Submission Deadline: January 08, 2021

Contacts: Robert Beverly, Program Director, CISE/OAC, telephone: (703) 292-7068, email: rbeverly@nsf.gov

Grant Program: Accelerating Research through International Network-to-Network Collaborations (AccelNet)

Agency: National Science Foundation NSF 21-511

RFP Website: <https://www.nsf.gov/pubs/2021/nsf21511/nsf21511.htm>

Brief Description: The goals of the Accelerating Research through International Network-to-Network Collaborations (AccelNet) program are to accelerate the process of scientific discovery and prepare the next generation of U.S. researchers for multiteam international collaborations. The AccelNet program supports strategic linkages among U.S. research networks and complementary networks abroad that will leverage research and educational resources to tackle grand research challenges that require significant coordinated international efforts. The program seeks to foster high-impact science and engineering by providing opportunities to cooperatively identify and coordinate efforts to address knowledge gaps and research needs. This solicitation invites proposals for the creation of international networks of networks in research areas aligned with a grand challenge identified as a priority by the research community or NSF, such as the NSF Big Ideas or in an active program solicitation. AccelNet awards support the connections among research networks, rather than supporting fundamental research as the primary activity. Each network of networks is expected to engage in innovative collaborative activities that promote synergy of efforts across networks and provide professional development for U.S. students, postdoctoral scholars, and early-career researchers. Two proposal categories covered by this solicitation include: Design and Implementation.

It is strongly recommended that prospective PIs contact the AccelNet Program Officer(s) to ascertain that the focus and budget of their proposed activities are appropriate for this solicitation.

Awards: Standard Grant or Continuing Grant; **Anticipated Funding Amount:** \$10,000,000

Letters of Intent: Not required

Proposal Submission Deadline: January 04, 2021

Contacts: Claire A. Hemingway, OISE, telephone: (703) 292-7135, email: chemingw@nsf.gov

- Chris Schneider, BIO, telephone: (703) 292-7920, email: cjschnei@nsf.gov
- Ralph Wachter, CISE, telephone: (703) 292-8950, email: rwachter@nsf.gov

Grant Program: Partnerships for Research and Education in Materials (PREM)

Agency: National Science Foundation NSF 21-510

RFP Website: <https://www.nsf.gov/pubs/2021/nsf21510/nsf21510.htm>

Brief Description: The DMR Partnerships for Research and Education in Materials Research (PREM) program aims to enable, build, and grow partnerships between minority-serving institutions and DMR-supported centers and/or facilities to increase recruitment, retention and degree attainment (which defines the PREM pathway) by members of those groups most underrepresented in materials research, and at the same time support excellent research and education endeavors that strengthen such partnerships.

Awards: Continuing Grant **Anticipated Funding Amount:** \$3,000,000

Letters of Intent: Not required

Proposal Submission Deadline: February 05, 2021

Limit on Number of Proposals per Organization: 1 per lead institution

Contacts: Debasis Majumdar, Program Director, telephone: (703)292-4709, email: dmajumda@nsf.gov

Grant Program: Division of Molecular and Cellular Biosciences: Investigator-initiated research projects (MCB)

Agency: National Science Foundation NSF 21-509

RFP Website: <https://www.nsf.gov/pubs/2021/nsf21509/nsf21509.htm>

Brief Description: The Division of Molecular and Cellular Biosciences (MCB) supports quantitative, mechanistic, predictive, and theory-driven fundamental research designed to promote understanding of complex living systems at the molecular, subcellular, and cellular levels. While recognizing the need for thorough and accurate descriptions of biological complexes and pathways, the priority of the Division is to support work that advances the field by capturing the predictive power of mechanistic, quantitative, and evolutionary approaches.

Proposals are solicited to support research relevant to the four MCB core clusters:

- [Cellular Dynamics and Function](#)
- [Genetic Mechanisms](#)
- [Molecular Biophysics](#)
- [Systems and Synthetic Biology](#)

MCB gives high priority to research projects that use theory, methods, and technologies from life and physical sciences, mathematics, computational sciences, and engineering to address major biological questions that elucidate the rules governing subcellular and cellular processes. Research supported by MCB uses a range of experimental and computational approaches—including *in vivo*, *in vitro* and *in silico* strategies—and a broad spectrum of model and non-model organisms, including microbes and plants.

Awards: Standard Grant or Continuing Grant; **Anticipated Funding Amount:** \$100,000,000

Letters of Intent: Not required

Proposal Submission Deadline: Proposals Accepted Anytime

Grant Program: Transitions to Excellence in Molecular and Cellular Biosciences Research (Transitions)

Agency: National Science Foundation NSF 21-508

RFP Website: <https://www.nsf.gov/pubs/2021/nsf21508/nsf21508.htm>

Brief Description: The Division of Molecular and Cellular Biosciences (MCB) has developed a new opportunity to enable researchers with a strong track record of prior accomplishment to pursue a new avenue of research or inquiry. This funding mechanism is designed to facilitate and promote a PI's ability

to effectively adopt empowering technologies that might not be readily accessible in the PI's current research environment or collaboration network. Transformative research likely spans disciplines and minimizing the practical barriers to doing so will strengthen research programs poised to make significant contributions. The award is intended to allow mid-career or later-stage researchers (Associate or Full Professor, or equivalent) to expand or make a transition in their research programs via a sabbatical leave or similar mechanism of professional development and then develop that research program in their own lab. This award will also enable the PI to acquire new scientific or technical expertise, facilitate the investigator's competitiveness, and potentially lead to transformational impacts in molecular and cellular bioscience. The award would fund up to six months of PI salary during the first sabbatical or professional development year, followed by support for continued research for two subsequent years upon the PI's return to normal academic duties. Requests for flexibility in the timing of the sabbatical or professional development year will be considered with appropriate justification. Please contact the cognizant program director for the solicitation. Through this solicitation MCB and NSF hope to develop a novel mechanism that will encourage investigators to expand and/or transition to new research areas aligned with MCB priorities, to increase retention of investigators in science, and to ensure a diverse scientific workforce that remains engaged in active research.

Awards: Standard Grant or Continuing Grant; **Anticipated Funding Amount:** \$8,000,000

Letters of Intent: Not required

Proposal Submission Deadline: Proposals Accepted Anytime

Grant Program: Plant Genome Research Program (PGRP)

Agency: National Science Foundation NSF 21-507

RFP Website: <https://www.nsf.gov/pubs/2021/nsf21507/nsf21507.htm>

Brief Description: The Plant Genome Research Program (PGRP) supports genome-scale research that addresses challenging questions of biological, societal and economic importance. PGRP encourages the development of innovative tools, technologies and resources that empower a broad plant research community to answer scientific questions on a genome-wide scale. Emphasis is placed on the scale and depth of the question being addressed and the creativity of the approach. Data produced by plant genomics should be usable, accessible, integrated across scales and of high impact across biology. Training, broadening participation, and career development are essential to scientific progress and should be integrated in all PGRP-funded projects.

Two funding tracks are currently available:

1. **RESEARCH-PGR TRACK:** Genome-scale plant research to address fundamental questions in biology, including processes of economic and/or societal importance.
2. **TRTech-PGR TRACK:** Tools, resources and technology breakthroughs that further enable functional plant genomics.

Awards: Standard Grant or Continuing Grant; **Anticipated Funding Amount:** \$30,000,000

Letters of Intent: Not required

Grant Program: Division of Integrative Organismal Systems Core Programs**Agency: National Science Foundation NSF 21-506****RFP Website:** <https://www.nsf.gov/pubs/2021/nsf21506/nsf21506.htm>

Brief Description: The Division of Integrative Organismal Systems (IOS) Core Programs support research aimed at understanding why organisms are structured the way they are and function as they do. Proposals are welcomed in all of the core scientific program areas supported by the Division of Integrative Organismal Systems (IOS). Areas of inquiry include, but are not limited to, developmental biology and the evolution of developmental processes, nervous system development, structure, modification, function, and evolution; biomechanics and functional morphology, physiological processes, symbioses and microbial interactions, interactions of organisms with biotic and abiotic environments, plant and animal genomics, and animal behavior. Proposals should focus on organisms as a fundamental unit of biological organization. Principal Investigators are encouraged to apply systems approaches that will lead to conceptual and theoretical insights and predictions about emergent organismal properties.

Awards: Standard Grant or Continuing Grant; **Anticipated Funding Amount:** \$70,000,000**Letters of Intent:** Not required**Proposal Submission Deadline:** Proposals Accepted Anytime**Contacts:** Developmental Systems Program Directors, telephone: (703) 292-8417, email: IOSDSC@nsf.gov

Grant Program: Mid-scale Research Infrastructure-1 (Mid-scale RI-1)**Agency: National Science Foundation NSF 21-505****RFP Website:** <https://www.nsf.gov/pubs/2021/nsf21505/nsf21505.htm>

Brief Description: NSF defines Research Infrastructure (RI) as any combination of facilities, equipment, instrumentation, or computational hardware or software, and the necessary human capital in support of the same. Major facilities and mid-scale projects are subsets of research infrastructure. The NSF Mid-scale Research Infrastructure-1 Program (Mid-scale RI-1) supports the design or implementation of unique and compelling RI projects. Mid-scale RI-1 implementation projects may include any combination of equipment, instrumentation, cyberinfrastructure, broadly used large-scale datasets, and the commissioning and/or personnel needed to successfully complete the project, or the design efforts intended to lead to eventual implementation of a mid-scale class project. Mid-scale RI-1 design projects will include the design efforts intended to lead to eventual implementation of a mid-scale class RI project. Mid-scale RI-1 projects should fill a research community-defined scientific need or enable a national research priority to be met. Mid-scale RI-projects should also enable US researchers to remain competitive in a global research environment and involve the training of a diverse workforce engaged in the design and implementation of STEM infrastructure.

Mid-scale RI-1 emphasizes strong scientific merit, a response to an identified need of the research community or fulfillment of a national need to enable U.S. researchers to be competitive in a global research environment. Well-conceived technical and management plans are required for both design and implementation projects, as are well-developed plans for student training and the involvement of a diverse workforce in all aspects of mid-scale activities.

Within Mid-scale RI-1, proposers may submit two types of projects, “Implementation” (e.g., acquisition/construction) and “Design”. The “Design” track is intended to facilitate progress toward

readiness for a mid-scale range implementation project. Both Implementation and Design projects may involve new or upgraded research infrastructure. Mid-scale RI-1 "Implementation" projects may have a total project cost ranging from \$6 million up to but not including \$20 million. Only Mid-scale RI-1 "Design" projects may request less than \$6 million, with a minimum request of \$600,000 and a maximum request up to but not including \$20 million, as appropriate, to prepare for a future mid-scale range implementation project. (Note: Successful award of a Mid-scale RI-1 design project does not imply NSF commitment to the future implementation of the project being designed, nor is a Mid-scale RI-1 design award required for the submission of an implementation project.)

Mid-scale research infrastructure projects beyond the Mid-scale RI-1 program limit are separately solicited through the Mid-scale RI-2 program.

Awards: Standard Grant or Continuing Grant or Cooperative Agreement; **Anticipated Funding Amount:** \$70,000,000 to \$80,000,000

Letters of Intent: Not required

Proposal Submission Deadline:

- **Preliminary Proposal Due Date(s) (required)** (due by 5 p.m. submitter's local time):

January 07, 2021

- **Full Proposal Deadline(s)** (due by 5 p.m. submitter's local time):

April 23, 2021

By Invitation Only

Grant Program: Division of Environmental Biology (core programs) (DEB))

Agency: National Science Foundation NSF 21-504

RFP Website: <https://www.nsf.gov/pubs/2021/nsf21504/nsf21504.htm>

Brief Description: The Division of Environmental Biology (DEB) Core supports research and training on evolutionary and ecological processes acting at the level of populations, species, communities, and ecosystems. DEB encourages research that elucidates fundamental principles that identify and explain the unity and diversity of life and its interactions with the environment over space and time. Research may incorporate field, laboratory, or collection-based approaches; observational or manipulative studies; synthesis activities; phylogenetic discovery projects; or theoretical approaches involving analytical, statistical, or computational modeling. Proposals should be submitted to the core clusters (Ecosystem Sciences, Evolutionary Processes, Population and Community Ecology, and Systematics and Biodiversity Sciences). DEB also encourages interdisciplinary proposals that cross conceptual boundaries and integrate over levels of biological organization or across multiple spatial and temporal scales. Research addressing ecology and ecosystem science in the marine biome should be directed to the Biological Oceanography Program in the Division of Ocean Sciences; research addressing evolution and systematics in the marine biome should be directed to the Evolutionary Processes or Systematics and Biodiversity Science programs in DEB.

Awards: Standard Grant or Continuing Grant; **Anticipated Funding Amount:** \$100,000,000

Letters of Intent: Not required

Proposal Submission Deadline: Proposals Accepted Anytime

Contacts: Division of Environmental Biology, Phone: (703) 292-8480, email: debquestions@nsf.gov

Grant Program: Sustaining Infrastructure for Biological Research (Sustaining)

Agency: National Science Foundation NSF 21-503

RFP Website: <https://www.nsf.gov/pubs/2021/nsf21503/nsf21503.htm>

Brief Description: The Sustaining Infrastructure for Biological Research (Sustaining) Program supports the continued operation of existing research infrastructure that advances contemporary biology in any research area supported by the Directorate for Biological Sciences (BIO) at NSF. The Sustaining Program focuses primarily on sustaining critical research infrastructure that is cyberinfrastructure or biological living stocks and that is broadly applicable to a wide range of researchers. Projects are expected to ensure continued availability of existing, mature resources that will enable important science outcomes achieved by users representing a broad range of research supported by BIO and its collaborating organizations.

Awards: Standard Grant or Continuing Grant or Cooperative Agreement; **Anticipated Funding Amount:** \$5,000,000

Letters of Intent: Not required

Proposal Submission Deadline: Proposals Accepted Anytime

Contacts: Sustaining Program, telephone: (703) 292-8470, email: SustainingDBI@nsf.gov

Grant Program: Dear Colleague Letter: Non-Academic Research Internships for Graduate Students (INTERN) Supplemental Funding Opportunity

Agency: National Science Foundation NSF 21-013

RFP Website: <https://www.nsf.gov/pubs/2021/nsf21013/nsf21013.jsp>

Brief Description: Fostering the growth of a globally competitive and diverse research workforce and advancing the scientific and innovation skills of the U.S. is a [strategic objective of the National Science Foundation](#) (NSF). U.S. global competitiveness depends critically on the readiness of the Nation's Science, Technology, Engineering and Mathematics (STEM) workforce and NSF seeks to continue to invest in programs that directly advance this workforce. As part of this effort, a supplemental funding opportunity is available in fiscal years FY 2021 and beyond to provide graduate students with experiential learning opportunities through research internships to acquire core professional competencies and skills to support careers in any sector of the U.S. economy. NSF currently invests in a number of graduate student preparedness activities and has historically encouraged principal investigators (PIs) to include such activities in research proposals to NSF. This Dear Colleague Letter (DCL) describes funding opportunities at NSF to ensure graduate students are well prepared for the 21st-century STEM workforce. NSF will consider supplemental funding requests for up to an additional six months of graduate student support on active NSF grants with the following goals:

1. To provide graduate students with the opportunity to augment their research assistantships or NSF Graduate Research Fellowship Program (GRFP) fellowships with non-academic research internship activities and training opportunities that will complement their academic research training;
2. To allow graduate students to pursue new activities aimed at acquiring professional development experience that will enhance their preparation for multiple career pathways after graduation; and
3. To encourage the participation of graduate students from underrepresented groups such as women, persons with disabilities, underrepresented minorities in science, technology, engineering, and mathematics (STEM), veterans, and persons from economically disadvantaged backgrounds.

DESCRIPTION OF THE ACTIVITIES SUPPORTED

The PI/co-PI of an active NSF award may request supplemental funding for one or more graduate students to gain knowledge, skills and experiences that will augment their preparation for a successful long-term career through an internship in a non-academic setting, including the following:

- For-profit industry laboratories or industry research and development groups;

- Start-up businesses, such as (but not limited to) those funded through the NSF's Small Business Innovation Research (SBIR) program and Small Business Technology Transfer (STTR) program;
- Government agencies (all levels) and National Laboratories;
- Museums, science centers, and other informal learning settings;
- Policy think-tanks; and
- Non-profit organizations.

PIs are encouraged to discuss with the cognizant NSF program director activities that are synergistic with the NSF project scope. It is expected that the graduate student and the PI on the NSF grant will work together to identify innovative experiences that add the most educational value for the graduate student through activities that are not already available at the student's academic institution. Further, it is expected that the internship will be research-focused in a STEM field or in STEM education research and will be on-site at the host organization unless a specific exception to this is granted due to extenuating circumstances by the cognizant program officer.

ELIGIBILITY

To be eligible, graduate students must have completed at least one academic year in their graduate programs (master's or doctoral) and be making satisfactory progress towards the completion of their degrees.

Awards: Supplement Grants

Letters of Intent: Not required

Proposal Submission Deadline: Supplemental funding requests may be submitted at any time with a target date of April 15th for each Fiscal Year.

Contacts: BIO: Dr. Elizabeth Blood (eblood@nsf.gov) or Dr. Amanda Simcox (asimcox@nsf.gov)

- CISE/OAC: Dr. Alan Sussman (alassussm@nsf.gov)

Grant Program: Infrastructure Innovation for Biological Research (Innovation)

Agency: National Science Foundation NSF 21-502

RFP Website: <https://www.nsf.gov/pubs/2021/nsf21502/nsf21502.htm>

Brief Description: The Infrastructure Innovation for Biological Research Program (Innovation) supports research to design novel or greatly improved research tools and methods that advance contemporary biology in any research area supported by the Directorate for Biological Sciences at NSF. The Innovation Program focuses on research infrastructure that is broadly applicable to researchers in three programmatic areas: Bioinformatics, Instrumentation, and Research Methods. Infrastructure supported by this program is expected to advance biological understanding by improving scientists' abilities to manipulate, control, analyze, or measure critical aspects of biological systems, which can be essential for addressing important fundamental research questions. Proposals submitted to these programmatic areas can do one of three things to advance or transform research in biology: develop novel infrastructure, significantly redesign existing infrastructure, or adapt existing infrastructure in novel ways. Projects are expected to have a significant application to one or more biological science questions and have the potential to be used by a community of researchers beyond a single research team.

Awards: Standard Grant or Continuing Grant or Cooperative Agreement; **Anticipated Funding Amount:** \$18,000,000 to \$20,000,000

Letters of Intent: Not required

Proposal Submission Deadline: Proposals Accepted Anytime

Grant Program: Infrastructure Capacity for Biological Research (Capacity)

Agency: National Science Foundation NSF 21-501

RFP Website: <https://www.nsf.gov/pubs/2021/nsf21501/nsf21501.htm>

Brief Description: The Infrastructure Capacity for Biological Research (Capacity) Program supports the implementation of, scaling of, or major improvements to research tools, products, and services that advance contemporary biology in any research area supported by the Directorate for Biological Sciences at NSF. The Capacity Program focuses on building capacity in research infrastructure that is broadly applicable to a wide range of researchers in three programmatic areas: Cyberinfrastructure, Biological Collections, and Biological Field Stations and Marine Laboratories. This program will also accept proposals for planning activities or workshops to facilitate coordination that may be necessary in building capacity in infrastructure that meets the needs of a research community. Areas not included in this program are instrumentation (PIs should submit to the MRI program) and, projects that develop infrastructure for a specific research project, laboratory, or institution (PIs should be submitted to the relevant BIO programs that would normally support that research). Projects are expected to produce quality products, result in important science outcomes that will be achieved by the users of the resource, be openly accessible to a broad scientific and education community, and serve a community of researchers beyond a single research team.

Awards: Standard Grant or Continuing Grant or Cooperative Agreement; **Anticipated Funding**

Amount: \$18,000,000 to \$20,000,000

Letters of Intent: Not required

Proposal Submission Deadline: Proposals Accepted Anytime

-

Grant Program: Secure and Trustworthy Cyberspace (SaTC)

Agency: National Science Foundation NSF 21-500

RFP Website: <https://www.nsf.gov/pubs/2021/nsf21500/nsf21500.htm>

Brief Description: The goals of the SaTC program are aligned with the National Science and Technology Council's (NSTC) [Federal Cybersecurity Research and Development Strategic Plan \(RDSP\)](#) and [National Privacy Research Strategy \(NPRS\)](#) to protect and preserve the growing social and economic benefits of cyber systems while ensuring security and privacy. The RDSP identified six areas critical to successful cybersecurity research and development: (1) scientific foundations; (2) risk management; (3) human aspects; (4) transitioning successful research into practice; (5) workforce development; and (6) enhancing the research infrastructure. The NPRS, which complements the RDSP, identifies a framework for privacy research, anchored in characterizing privacy expectations, understanding privacy violations, engineering privacy-protecting systems, and recovering from privacy violations. In alignment with the objectives in both strategic plans, the SaTC program takes an interdisciplinary, comprehensive and holistic approach

to cybersecurity research, development, and education, and encourages the transition of promising research ideas into practice.

The SaTC program welcomes proposals that address cybersecurity and privacy, and draw on expertise in one or more of these areas: computing, communication and information sciences; engineering; education; mathematics; statistics; and social, behavioral, and economic sciences. Proposals that advance the field of cybersecurity and privacy within a single discipline or interdisciplinary efforts that span multiple disciplines are both welcome.

Proposals must be submitted pursuant to one of the following designations, each of which may have additional restrictions and administrative obligations as specified in this program solicitation.

- **CORE:** This designation is the main focus of the SaTC research program, spanning the interests of NSF's Directorates for Computer and Information Science and Engineering (CISE), Engineering (ENG), Mathematical and Physical Sciences (MPS), and Social, Behavioral and Economic Sciences (SBE).
- **EDU:** The Education (EDU) designation will be used to label proposals focusing entirely on cybersecurity education.
- **TTP:** The Transition to Practice (TTP) designation will be used to label proposals that are focused exclusively on transitioning existing research results to practice.

Awards: Standard Grants or Continuing Grant; **Anticipated Funding Amount:** \$69,000,000

CORE and TTP proposals may be submitted in one of the following project size classes:

- Small projects: up to \$500,000 in total budget, with durations of up to three years; and
- Medium projects: \$500,001 to \$1,200,000 in total budget, with durations of up to four years.

CORE proposals (but not TTP or EDU proposals) may also be submitted in the following project size class:

- Large projects: \$1,200,001 to \$3,000,000 in total budget, with durations of up to five years.

EDU proposals are limited to \$400,000 in total budget, with durations of up to three years. Proposals that demonstrate a collaboration, reflected in the PI, co-PI, and/or Senior Personnel composition, between a cybersecurity subject matter expert (researcher or practitioner) and an education researcher may request up to \$500,000 for three years.

Letters of Intent: Not required

Proposal Submission Deadline: Submission Window Date(s) (due by 5 p.m. submitter's local time):

January 21, 2021 - January 29, 2021

Grant Program: Dear Colleague Letter: Future of International Research Collaboration Post COVID-19

Agency: National Science Foundation NSF 20-132

RFP Website: <https://www.nsf.gov/pubs/2020/nsf20132/nsf20132.jsp?org=NSF>

Brief Description: International collaboration ensures the U.S. science and engineering (S&E) community enjoys access to expertise, facilities, data, and research sites across the globe. Keeping the U.S. engaged with global research is critical to the health of our S&E enterprise.

The COVID-19 pandemic has disrupted science and engineering research and education and the international collaborations that accompany them. With international travel currently curtailed and in-person collaborations uncertain for the foreseeable future, researchers are faced with new challenges and opportunities. Many collaborations have been hard hit by health and safety concerns, lab shutdowns, and unreliable internet access. Others have achieved new levels of productivity, taking advantage of technology to speed research advances, data sharing and dissemination of results.

The NSF Office of International Science and Engineering (OISE) seeks to understand the nature and scope of COVID-19 impacts on international collaboration in research and education. OISE further seeks to encourage creative efforts to leverage the unique moment to enable more robust, resilient and sustainable collaborations. OISE anticipates that documenting and sharing lessons will strengthen future international collaboration efforts.

OPPORTUNITY: This letter invites Rapid Response Research (RAPID) and EARly-concept Grants for Exploratory Research (EAGER) proposals for research to clarify lessons from the COVID-19 pandemic for international collaboration and research to strengthen international collaboration in the future. Proposals must focus on research topics unique to international engagement. Proposals should be submitted by institutions eligible to submit proposals to NSF and must include international collaboration as an integral part of the work. NSF encourages proposals from diverse teams. Proposals from early career investigators are especially welcome.

Awards: Standard Grants; **Anticipated Funding Amount:** \$19,000,000

Letters of Intent: Not required

Proposal Submission Deadline: PIs may request funding using either the RAPID or EAGER mechanism. The RAPID type of proposal is appropriate in cases of "severe urgency with regard to availability of, or access to, data, facilities or specialized equipment, including quick-response research on natural or anthropogenic disasters and similar unanticipated events." RAPID proposals may request funding of up to \$200,000 and an award duration of up to one year. The EAGER type of proposal is appropriate in the case of "exploratory work in its early stages on untested, but potentially transformative, research ideas or approaches." EAGERS provide up to \$300,000 in support for up to two years. OISE anticipates that the Type I proposals may be better suited to the RAPID mechanism while Type II proposals may conform better to EAGER requirements, though PIs should discuss the appropriate type of proposal with the cognizant program officer.

In addition to the standard PAPPG guidelines, proposals under this Dear Colleague Letter (DCL) should include the following:

- Proposal Title beginning with the type of proposal and International, Type I or II: e.g. "RAPID International Type I:" or "EAGER International Type II:".
- Budget should include funding for up to two project team members to attend a PI meeting at NSF in the fall of 2021.
- Email documentation from at least one DCL cognizant Program Officer confirming approval to submit a RAPID (or, as appropriate, EAGER) proposal must be uploaded as a Supplementary Document entitled "RAPID (EAGER) – small dash Program Officer Concurrence Email."

Complete guidance on submitting a RAPID proposal may be found in Chapter II.E.1 of the [NSF Proposal & Award Policies & Procedures Guide \(PAPPG\)](#). Guidance on EAGER proposals is available in Chapter II.E.2 of the PAPPG.

Grant Program: Formal Methods in the Field (FMitF)

Agency: National Science Foundation NSF 20-613

RFP Website: <https://www.nsf.gov/pubs/2020/nsf20613/nsf20613.htm>

Brief Description: The Formal Methods in the Field (FMitF) program aims to bring together researchers in formal methods with researchers in other areas of computer and information science and engineering to jointly develop rigorous and reproducible methodologies for designing and implementing correct-by-construction systems and applications with provable guarantees. FMitF encourages close collaboration between two groups of researchers. The first group consists of researchers in the area of formal methods, which, for the purposes of this solicitation, is broadly defined as principled approaches based on mathematics and logic to system modeling, specification, design, analysis, verification, and synthesis. The second group consists of researchers in the “field,” which, for the purposes of this solicitation, is defined as a subset of areas within computer and information science and engineering that currently do not benefit from having established communities already developing and applying formal methods in their research. This solicitation limits the field to the following areas that stand to directly benefit from a grounding in formal methods: computer networks, distributed/operating systems, embedded systems, human centered computing, and machine learning. A proposal pursuing a different field area must make a strong case for why the field area of interest is one that does not currently benefit from formal methods but would be a strong candidate for inclusion as a field area.

Awards: Standard Grant or Continuing Grant; **Anticipated Funding Amount:** \$10,000,000

Letters of Intent: Not required

Proposal Submission Deadline: February 16, 2021

Contacts: Nina Amla, Program Director, CISE/CCF, telephone: (703) 292-7991, email: namla@nsf.gov

- Anindya Banerjee, Program Director, CISE/CCF, telephone: (703) 292-7885, email: abanerje@nsf.gov
- Wei Ding, Program Director, CISE/IIS, telephone: (703) 292-8017, email: weiding@nsf.gov

Grant Program: Research on Emerging Technologies for Teaching and Learning (RETTL)

Agency: National Science Foundation NSF 20-612

RFP Website: <https://www.nsf.gov/pubs/2020/nsf20612/nsf20612.htm>

Brief Description: The purpose of the *Research on Emerging Technologies for Teaching and Learning (RETTL)* program is to fund exploratory and synergistic research in emerging technologies (to include, but not limited to, artificial intelligence (AI), robotics, and immersive or augmenting technologies) for teaching and learning in the future. The program accepts proposals that focus on learning, teaching, or a combination of both. The scope of the program is broad, with special interest in diverse learner/educator populations, contexts, and content, including teaching and learning in science, technology, engineering, and mathematics (STEM) and in foundational areas that enable STEM (e.g., self-regulation, literacy, communication, collaboration, creativity, and socio-emotional skills). Research in this program should be informed by the convergence (synthesis) of multiple disciplines: e.g., learning sciences; discipline-based education research; computer and information science and engineering; design; and cognitive, behavioral, and social sciences. Within this broad scope, the program also encourages projects that investigate teaching and learning related to futuristic and highly technological work environments.

Awards: Standard Grants; **Anticipated Funding Amount:** \$19,000,000

Letters of Intent: Not required

Proposal Submission Deadline: January 25, 2021 Deadline for FY 2021 competition

October 18, 2021 Deadline for FY 2022 competition

October 17, 2022 Deadline for FY 2023 competition

Contacts: Amy L. Baylor, co-lead EHR, EHR/DRL, telephone: (703) 292-5126, email: abaylor@nsf.gov

- Tatiana Korelsky, co-lead CISE, CISE/IIS, telephone: (703) 292-8930, email: tkorelsk@nsf.gov

National Institutes of Health

Grant Program: BRAIN Initiative Fellows: Ruth L. Kirschstein National Research Service Award (NRSA) Individual Postdoctoral Fellowship (F32)

Agency: National Institutes of Health RFA-MH-20-620

RFP Website: <https://grants.nih.gov/grants/guide/rfa-files/RFA-MH-20-620.html>

Brief Description: he integrated program of research and training supported by this FOA is intended for postdoctorates who are early in their postdoctoral training period in a given laboratory or research environment, rather than for advanced postdoctorates. Support for early postdoctoral training will maximize the training potential of this fellowship award. Given the interval when applications will be accepted (from 12 months prior to completing terminal degree requirements to 12 months after starting postdoctoral training), it is recognized that some applicants are unlikely to have had the opportunity to generate preliminary data for the proposed project. Accordingly, it is expected that there will be no preliminary data in the application, although inclusion of preliminary data is permissible. The proposed research and training plan should focus on a research area and/or skill set that clearly and strongly complements the applicant's existing research expertise and skills and that will markedly broaden the applicant's knowledge and skills. For example, an applicant with existing skills in molecular neuroscience might propose a research training plan that emphasizes circuit-level neuroscience approaches to brain function. An applicant with existing neuroscience training might propose a research training plan that emphasizes neuroethics. An applicant trained in physics or statistics might propose a research training plan that emphasizes data-intensive/computational approaches to neuroscience.

Awards: Individuals may receive up to 5 years of aggregate Kirschstein-NRSA support at the Award budgets are composed of stipends, tuition and fees, and institutional allowance.

Letter of Intent: November 9, 2020; July 10, 2021, March 11, 2022, November 9, 2022

Proposal Submission Deadline: December 9, 2020; August 10, 2021, April 11, 2022, December 9, 2022 by 5:00 PM local time of applicant organization. All [types of non-AIDS applications](#) allowed for this funding opportunity announcement are due on these dates. No late applications will be accepted for this Funding Opportunity Announcement. Applicants are encouraged to apply early to allow adequate time to make any corrections to errors found in the application during the submission process by the due date.

Contact: Ashlee Van't Veer, PhD; National Institute of Mental Health (NIMH); Telephone: 301-443-3107; Email: Brain.Initiative.Training@nih.gov

Grant Program: BRAIN Initiative: Pilot resources for brain cell type-specific access and manipulation across vertebrate species (U01 Clinical Trial Not Allowed)

Agency: National Institutes of Health RFA-MH-20-556

RFP Website: <https://grants.nih.gov/grants/guide/rfa-files/RFA-MH-20-556.html>

Brief Description: The purpose of this FOA is to evaluate molecular or genetic technologies and create pilot production and distribution resources for cell type-specific access and manipulation reagents for several vertebrate species. Applicants to this FOA should propose demonstration projects for reagent resource production, validation, and dissemination. The proposed projects should be scalable. The proposed projects should demonstrate the potential to achieve as many of the following goals as possible. Applicants are required to address goals 1, 2, and 3:

1. Reagents enable unique access to many molecularly defined neural cell types that are found in a complex brain region or significant brain network of a vertebrate and that could exhibit distinct cellular, circuit, or behavioral functions.
2. Reagents are easily produced, disseminated, utilized, and stored.
3. Collection of reagents are catalogued for users in a brain atlas and registered to cell types based on molecular, anatomical, or other properties that can be referenced.
4. Reagents are applicable to both genetically tractable and less tractable organisms in common use by neuroscientists.
5. Specificity and efficiency of targeting brain cell types are validated to be quantitatively high and reproducible.
6. Toxic or perturbative effects to cells, tissues, and organisms are quantitatively low.
7. Access technologies provide flexibility to deliver various reporter, sensor, and effector payloads and are compatible with other methods of access.
8. Technologies to access cell types are potentially usable in human *ex vivo* brain tissue or cells to target gene editors or other effectors to disease-relevant circuits for future therapies.

Awards: Application budgets are not limited but need to reflect the actual needs of the proposed project.

Letter of Intent: 30 days prior to the application due date

Proposal Submission Deadline: February 11, 2021; October 19, 2021, by 5:00 PM local time of applicant organization.

All applications are due by 5:00 PM local time of applicant organization. All [types of non-AIDS applications](#) allowed for this funding opportunity announcement are due on the listed date(s).

Applicants are encouraged to apply early to allow adequate time to make any corrections to errors found in the application during the submission process by the due date.

Contact: Douglas S. Kim, Ph.D., National Institute of Mental Health (NIMH), Telephone: 301-827-6463, Email: douglas.kim@nih.gov

Grant Program: Genomic Data Analysis Network: Genomic Data Center (U24 Clinical Trial Not Allowed)

Agency: National Institutes of Health RFA-CA-20-053

RFP Website: <https://grants.nih.gov/grants/guide/rfa-files/RFA-CA-20-053.html>

Brief Description: This funding opportunity announcement (FOA) is designed to support genomic programs managed by the Center for Cancer Genomics (CCG). The overall goal of all CCG programs is to help elucidate the mechanisms of cancer initiation and evolution, as well as resistance to therapy by means of genomic characterization of well-annotated, high quality tumor samples. These data could, in the future, be used to identify and accelerate the development of new diagnostic and prognostic markers, new targets for pharmaceutical interventions, and new cancer prevention and treatment strategies. It is not the intent of this FOA to fund follow-up translational and functional studies, but rather to enable the cancer research community to develop a new generation of studies that will leverage the genomic findings from NCI programs for the benefit of cancer patients. NCI project data, both ongoing and completed, will provide a unique reference resource on cancer-specific genomic aberrations for the cancer research community at large. *To serve the overarching goals of NCI, this FOA solicits applications for highly collaborative Genome Data Analysis Centers (GDACs) that will, in aggregate, form the Genomic Data Analysis Network (GDAN).*

Awards: Application budgets are limited to \$300,000/year in direct costs, but need to reflect the actual needs of the proposed project. The NCI intends to support up to 10 GDAC awards for a total of \$10 million (total costs). Future year amounts will depend on annual appropriations.

Letter of Intent: 30 days prior to the application due date

Proposal Submission Deadline: November 12, 2020;

No late applications will be accepted for this FOA.

All applications are due by 5:00 PM local time of applicant organization. All [types of non-AIDS applications](#) allowed for this funding opportunity announcement are due on the listed date(s).

Applicants are encouraged to apply early to allow adequate time to make any corrections to errors found in the application during the submission process by the due date.

Contact: Jean C. ZenKlusen, PhD, NCI, Phone: 301-451-2144, Email: jz44m@nih.gov

Department of Defense/US Army/DARPA/ONR/AFOSR

Grant Program: Long Range Broad Agency Announcement (BAA) for Navy and Marine Corps Science and Technology

Agency: Department of Defense Office of Naval Research N00014-21-S-B001

Website: https://beta.sam.gov/opp/7efeff4d16064fb7955dc80cdd7e8cff/view?index=opp&sort=-relevance&page=1&keywords=N00014-21-S-B001&date_filter_index=0&inactive_filter_values=false

Brief Description: ONR, ONRG, and MCWL are interested in receiving proposals for Long-Range S&T Projects which offer potential for advancement and improvement of Navy and Marine Corps operations. Readers should note that this is an announcement to declare ONR, ONRG and MCWLs broad role in competitive funding of meritorious research across a spectrum of science and engineering disciplines.

Technology areas that ONR is pursuing are provided at the ONR website at <https://www.onr.navy.mil/our-research/technology-areas>. Click on the technology area of interest for a brief description of that research area being pursued by ONR.

ONRG supports fundamental research seed grants, conferences, and workshops that foster collaboration between the U.S. Navy, and international scientists and technologists. To discuss your ideas for an international grant proposal, please contact a Science Director specializing in your field or located in your region by navigating to the ONRG website at <https://www.onr.navy.mil/en/Science-Technology/ONR-Global>. ONRG does not fund U.S. institutions or foreign Government entities.

The MCWL utilizes concept-based experimentation as a primary means to explore both material and non-material solutions enabling warfighting concepts. The concept-based experimentation process provides the unique opportunity to assess the utility of experimental technologies employed in operational scenarios and environments. MCWL leverages ONRs S&T efforts to inform and support the concept-based experimentation BAA-7 process. Technology initiatives that MCWL is pursuing are provided at the MCWL website at <https://www.mcwl.marines.mil/Divisions/Science-and-Technology/Future-TechnologyOffice/TechnologyInitiativeScreeningOfficer/>. Potential offerors are urged to check the above website throughout the year for updates to technology initiatives.

Awards: Multiple awards are anticipated.

Letter of Intent: Please contact the program director.

Proposal Deadline: Sep 30, 2021

Contact Information: Veronica Lacey Grants Officer [Grantor POC E-mail Address](#)

Grant Program: Young Faculty Award (YFA)

Agency: Department of Defense DARPA DARPA-RA-21-01

Website: <https://beta.sam.gov/opp/aabf37db17b949b88494684292eb854e/view>

Brief Description: The Defense Advanced Research Projects Agency (DARPA) Young Faculty Award (YFA) program aims to identify and engage rising stars in junior faculty positions in academia and equivalent positions at non-profit research institutions and expose them to Department of Defense (DoD) and National Security challenges and needs. In particular, YFA will provide high-impact funding to elite researchers early in their careers to develop innovative new research directions in the context of enabling transformative DoD capabilities. The long-term goal of the program is to develop the next generation of scientists and engineers in the research community who will focus a significant portion of their future careers on DoD and National Security issues. DARPA is particularly interested in identifying outstanding researchers who have previously not been performers on DARPA programs, but the program is open to all qualified applicants with innovative research ideas.

Awards: Multiple awards are anticipated. Anticipated Funding Available for Award: Each award will include a 24-month base period (a maximum of \$500,000) and a 12-month option period (a maximum of \$500,000).

Letter of Intent: Executive Summary Due Date: October 26, 2020, 4:00 p.m. o FAQ Submission Deadline: December 21, 2020, 4:00 p.m. See Section VIII.A.

Proposal Deadline: Full Proposal Due Date: January 8, 2021, 4:00 p.m.

Contact Information: BAA Coordinator DARPA-RA-21-01@darpa.mil

Grant Program: Verified Security and Performance Enhancement of Large Legacy Software (V-SPELLS)

Agency: Department of Defense DARPA - Information Innovation Office HR001120S0058

Website: <https://beta.sam.gov/opp/7dc5798bf5e74d8aa3df767edd3e0815/view>

Brief Description: The goal of the V-SPELLS program is to create a developer-accessible capability for piece-by-piece enhancement of software components with new verified code that is both correct-by-construction and compatible-by-construction, i.e., safely composable with the rest of the system. V-SPELLS will create practical tools for developers to gain benefits of formal software verification in incremental software (re)engineering rather than only in clean-slate introduction. V-SPELLS tools will enable developers to deliver assured incremental modernization of legacy systems in a manner that leverages verification technologies and reduces rather than raises risk. V-SPELLS aims to radically broaden adoption of software verification by enabling incremental introduction of superior technologies into systems that cannot be re-designed from scratch and replaced as a whole.

Awards: There are multiple technical areas for this solicitation. Currently, DARPA anticipates multiple awards in Technical Area 1, Technical Area 2 and Technical Area 3; and a single award for Technical Area 4. DARPA anticipates making multiple awards under this BAA, which has a total anticipated funding amount of approximately \$40 million.

Letter of Intent: Not Required

Proposal Deadline: September 9, 2020, 12:00 noon (ET)

Proposers Day: July 29, 2020

Contact Information: Dr. Sergey Bratus, Program Manager, DARPA/I2O

Grant Program: DoD Combat Readiness, Rapid Development and Translational Research Award

Agency: Department of Defense Dept. of the Army – USAMRAA W81XWH-20-S-CRRP

Website: <https://www.grants.gov/web/grants/view-opportunity.html?oppId=328340>

Brief Description: The CRRP vision is to deliver high-impact medical solutions throughout the continuum of care to increase survivability and readiness of the Warfighter in diverse operational settings. The program seeks to develop innovative solutions to increase medical readiness, mitigate fatalities,

optimally treat life-threatening injuries, and promote positive long-term outcomes. While the CRRP focuses on capability gaps in frontline care, the program also considers how chronic disorders typically associated with pre-deployment readiness (e.g., sleep, gastrointestinal conditions) may influence the delivery of care in deployed environments and contribute to injury susceptibility and recovery. Innovations developed by CRRP-supported research may be applied proactively as a way to establish medical readiness ahead of deployment, in-theater at the point of injury or during periods of prolonged care, or during transport/en route care within and from theater to hospital settings. These solutions will not only help to minimize the morbidity and mortality of combat-related injuries sustained by the Warfighter, they will also often translate to civilian care.

Awards: The anticipated total costs budgeted for the entire period of performance for an FY20 CRRP RDTRA will not exceed \$2M.

Letter of Intent: Pre-Proposal Required

Proposal Deadline: Pre-Proposal/Pre-Application Submission Deadline: 5:00 p.m. Eastern time (ET), September 10, 2020 • Invitation to Submit an Application: October 16, 2020 • Proposal/Application Submission Deadline: 11:59 p.m. ET, December 3, 2020

Contact Information: CDMRP Help Desk Phone: 301-682-5507 Email: Help@eBRAP.org

Grant Program: Defense Sciences Office Office-wide

Agency: Department of Defense DARPA - Defense Sciences Office HR001120S0048

Website: <https://beta.sam.gov/opp/36d6bc789b364142a0f7a267017b06d9/view>

Brief Description: The mission of the Defense Advanced Research Projects Agency (DARPA) Defense Sciences Office (DSO) is to identify and create the next generation of scientific discovery by pursuing high-risk, high-payoff research initiatives across a broad spectrum of science and engineering disciplines and transforming these initiatives into disruptive technologies for U.S. national security. In support of this mission, the DSO Office-wide BAA invites proposers to submit innovative basic or applied research concepts or studies and analysis proposals that address one or more of the following technical thrust areas: (1) Frontiers in Math, Computation and Design, (2) Limits of Sensing and Sensors, (3) Complex Social Systems, and (4) Anticipating Surprise. Each of these thrust areas is described below and includes a list of example research topics that highlight several (but not all) potential areas of interest. Proposals must investigate innovative approaches that enable revolutionary advances. DSO is explicitly not interested in approaches or technologies that primarily result in evolutionary improvements to the existing state of practice.

Awards: Multiple awards are anticipated; however, the level of funding for individual awards made under this solicitation has not been predetermined and will depend on the scope and quality of the proposals received, as well as the availability of funds.

Proposal Deadline: Executive Summary Due Date and Time: June 11, 2021, 4:00 p.m. o Proposal Abstract Due Date and Time: Abstracts may be submitted on a rolling basis until June 11, 2021, 4:00 p.m. o FAQ Submission Deadline: June 2, 2021, 4:00 p.m. Proposals may be submitted on a rolling basis until June 11, 2021, 4:00 p.m

Contact Information: Phil Root, Deputy Director, DARPA/DSO o BAA Email: HR001120S0048@darpa.mil

Grant Program: C4ISR, Information Operations, Cyberspace Operations and Information Technology System Research

Agency: Department of Defense Naval Information Warfare Center Pacific N66001-20-S-4702

Website: <https://www.grants.gov/web/grants/search-grants.html>

Brief Description: Naval Information Warfare Center, Pacific (NIWC Pacific), is soliciting proposals in accordance with FAR 35.016, DoDGARS 22.315(a), and DoD Other Transactions (OT) Guide for Prototype Projects for research in areas relating to the advancement of C4ISR capabilities, enabling technologies for Information Operations and Cyberspace Operations, and Information Technology systems. Submissions in response to this announcement shall be for areas relating to the advancement of Command, Control, Communications, Computers, Intelligence, Surveillance, and Reconnaissance (C4ISR) capabilities, enabling technologies for Information Operations and Cyberspace Operations, and Information Technology systems. Proposed research should investigate unique and innovative approaches for defining and developing next generation integratable C4ISR capabilities and command suites. The area topics reflect the interest of the NIWC Pacific, but interest from other Team NAVWAR components could be generated and selections could be made for funding by other than NIWC Pacific. Only offers that are in the areas of basic research, applied research, advanced technology development, and advanced component development and prototypes will be considered (see Appendix A). Testing and optimizing of concepts or prototypes may be necessary. This may involve virtual simulation and/or laboratory as well as at sea measurements.

Awards: Multiple awards are anticipated

Proposal Deadline: Closing date; June 03, 2021 Any white papers received during that time shall only be considered for award of a contract, other transaction, grant, or cooperative agreement.

Contact Information: David Roden (Primary) Contract Specialist Telephone: (619) 553-2087 Email: David.Roden@navy.mil NIWC Pacific Code 22710 53560 Hull Street San Diego, CA 92152-5001

Department of Transportation

Grant Program: Pilot Program for Transit-Oriented Development (TOD) Planning 2020 Notice of Funding

Agency: Department of Transportation FTA-2020-014-TPE

Website: <https://www.fhwa.dot.gov/fastact/factsheets/advtranscongmgmtfs.cfm>

Brief Description: The Pilot Program for TOD Planning is intended to fund comprehensive planning that supports economic development, ridership, multimodal connectivity and accessibility, increased transit access for pedestrian and bicycle traffic, and mixed-use development near transit stations. The program also encourages identification of infrastructure needs and engagement with the private sector. Consistent with statutory direction, FTA is seeking comprehensive planning projects covering an entire transit capital project corridor, rather than proposals that involve planning for individual station areas or only a small section of the corridor. To ensure any proposed planning work reflects the needs and aspirations of the local community and results in concrete, specific deliverables and outcomes, transit project sponsors must partner with entities with land use planning authority in the transit project corridor to conduct the planning work.

The Pilot Program for TOD Planning helps support FTA's mission of improving public transportation for America's communities by providing funding to local communities to integrate land use and transportation planning around a new fixed guideway or core capacity improvement project. Per statute, any comprehensive planning funded through the program must examine ways to improve economic development and ridership, foster multimodal connectivity and accessibility, improve transit access for pedestrian and bicycle traffic, engage the private sector, identify infrastructure needs, and enable mixed-use development near transit stations.

FTA will hold a webinar on this funding opportunity at a date and time to be announced. The webinar will provide an overview of the program, describe eligible applicants and projects, and offer an opportunity for attendees to obtain answers to other questions.

Award: The Federal Transit Administration (FTA) announces the availability of approximately \$6.2 million in Pilot Program. FTA may award amounts ranging from \$250,000 to \$2,000,000.

Letter of Intent: Not Required

Proposal Deadline: An applicant must submit a proposal electronically by **11:59 p.m. Eastern Daylight Time on October 26, 2020.**

Grant Program: Community Connect Grant Program

Agency: Department of Agriculture RDRUS-CC-2021

Website: <https://www.rd.usda.gov/sites/default/files/CCFOAFY21.pdf>

Brief Description: The Agency encourages applications that will help improve life in Rural America. See information on the Interagency Task Force on Agriculture and Rural Prosperity found at www.usda.gov/ruralprosperity. Applicants are encouraged to consider projects that provide measurable results in helping rural communities build robust and sustainable economies through strategic investments in infrastructure, partnerships and innovation. Key strategies include: • Achieving e-Connectivity for Rural America • Developing the Rural Economy • Harnessing Technological Innovation • Supporting a Rural Workforce • Improving Quality of Life

Awards: Grant from \$100,000 to \$3,000,000 will be applied to this grant opportunity

Proposal Deadline: December 23, 2020

Grant Program: NRCS's Regional Conservation Partnership Program

Agency: Department of Agriculture USDA-NRCS-NHQ-RCPPC-21-NOFO0001033

Website: <https://www.nrcs.usda.gov/wps/portal/nrcs/main/national/programs/financial/rcpp/>

Brief Description: The Regional Conservation Partnership Program (RCPP) promotes coordination of NRCS conservation activities with partners that offer value-added contributions to expand our collective ability to address on-farm, watershed, and regional natural resource concerns. Through RCPP, NRCS seeks to co-invest with partners to implement projects that demonstrate innovative solutions to conservation challenges and provide measurable improvements and outcomes tied to the resource concerns they seek to address. Successful RCPP projects embody the following core principles:

- **Impact**—RCPP applications must propose effective and compelling solutions that address one or more natural resource priorities to help solve natural resource challenges. Partners are responsible for evaluating a project's impact and results.
- **Partner Contributions**—Partners are responsible for identifying any combination of cash and in-kind value-added contributions to leverage NRCS's RCPP investments. It is NRCS's goal that partner contributions at least equal the NRCS investment in an RCPP project. Substantive partner contributions are given priority consideration as part of the RCPP application evaluation criteria.
- **Innovation**—NRCS seeks projects that integrate multiple conservation approaches, implement innovative conservation approaches or technologies, build new partnerships, and effectively take advantage of program flexibilities to deliver conservation solutions.
- **Partnerships and Management**—Partners must have experience, expertise, and capacity to manage the partnership and project, provide outreach to producers, and quantify the environmental outcomes of an RCPP project. RCPP ranking criteria give preference to applicants that meaningfully engage historically underserved farmers and ranchers.

Awards: Up to \$10,000,000; Anticipated available funding: \$360,000,000

Proposal Deadline: RCPP Classic Application Period Open through November 4, 2020

Grant Program: Agriculture and Food Research Initiative - Foundational and Applied Science

Agency: Department of Agriculture USDA-NIFA-AFRI-007692

Website: <https://nifa.usda.gov/funding-opportunity/agriculture-and-food-research-initiative-foundational-applied-science-program>

Brief Description: The AFRI Foundational and Applied Science Program supports grants in six AFRI priority areas to advance knowledge in both fundamental and applied sciences important to agriculture. The six priority areas are: Plant Health and Production and Plant Products; Animal Health and Production and Animal Products; Food Safety, Nutrition, and Health; Bioenergy, Natural Resources, and Environment; Agriculture Systems and Technology; and Agriculture Economics and Rural Communities. Research-only, extension-only, and integrated research, education and/or extension projects are solicited in this Request for Applications (RFA). See Foundational and Applied Science RFA for specific details.

Letter of Intent: Required.

Awards: Up to \$15,000,000; Anticipated available funding: \$290,000,000

Proposal Deadline: Thursday, July 29, 2021

Contact Information: [AFRI Coordination Team](#)

[Back to Contents](#)

[Department of Labor](#)

Grant Program: H-1B One Workforce Grant Program

Agency: Department of Labor FOA-ETA-20-13

Website: <https://www.grants.gov/web/grants/view-opportunity.html?oppId=329075>

Brief Description: The Employment and Training Administration (ETA), U.S. Department of Labor (DOL, or the Department, or we), announces the availability of up to \$150 million in grant funds authorized under section 414(c) of the American Competitiveness and Workforce Improvement Act of 1998 (ACWIA), as amended (codified at 29 USC 3224a) for the H-1B One Workforce grant program. We expect to fund approximately 15–30 grants, with individual grant amounts ranging from \$500,000 to \$10 million. The purpose of this grant program is to fill critical shortages in economic regions by encouraging states and economic regions to work with industry stakeholders to develop dynamic workforce strategies that train workers and jobseekers for middle- to high-skilled H-1B occupations in key industry sectors, such as Information Technology (IT), advanced manufacturing, and transportation that are being transformed by technological advancements and automation, as well as other industries of the future that include artificial intelligence (AI), quantum information sciences (QIS), 5G/advanced communications, and biotechnology.

These grants will build proof of concepts of innovative training models that can be replicated by the broader workforce system. Applicants must build support for a common vision for responding to the workforce challenges within their state and economic regions, ensuring that their projects complement and leverage, but do not duplicate existing programs. By forging public-private partnerships—H-1B One Workforce Partnerships—applicants will bring together industry and employers, education and training providers, the workforce system, state and local government, and other entities that will work collaboratively to align resources in response to employer demand and to offer novel education and job training solutions that generate positive outcomes and results.

Awards: Awards up to \$10,000,000; Anticipated available funding: \$150,000,000.

Proposal Deadline: Nov 12, 2020 The closing date for receipt of applications under this announcement is November 12, 2020. Applications must be received no later than 4:00:00 p.m. Eastern Time.

[Department of Commerce/EDA](#)

Grant Program: FY2021 to FY2023 NOAA Broad Agency Announcement (BAA)

Agency: U.S. Department of Commerce NOAA-NFA-NFAPO-2021-2006626

Website: <https://www.grants.gov/web/grants/view-opportunity.html?oppId=329261>

Brief Description: This Broad Agency Announcement is a mechanism to encourage research, education and outreach, innovative projects, or sponsorships that are not addressed through NOAA's competitive discretionary programs. This announcement is not soliciting goods or services for the direct benefit of NOAA. Funding for activities described in this notice is contingent upon the availability of Fiscal Year 2021, Fiscal Year 2022, and Fiscal Year 2023 appropriations. Applicants are hereby given notice that funds have not yet been appropriated for any activities described in this notice. Publication of this announcement does not oblige NOAA to review an application beyond an initial administrative review, or to award any specific project, or to obligate any available funds. As an agency with responsibilities for

maintaining and improving the viability of marine and coastal ecosystems, for delivering valuable weather, climate, and water information and services, for understanding the science and consequences of climate change, and for supporting the global commerce and transportation upon which we all depend, NOAA must remain current and responsive in an ever-changing world.

Awards: Contingent to the availability of funds.

Letter of Intent: Contact the program director.

Proposal Deadline: Applications can be submitted on a rolling basis starting from the publication date of this Broad Agency Announcement up to 11:59:59 p.m., Eastern Daylight Time on September 30, 2023.

Contact Information: Mr. Lamar Dwayne Revis, 301-628-1308, lamar.revis@noaa.gov

Grant Program: FY2021 Marine Debris Research

Agency: U.S. Department of Commerce NOAA-NOS-ORR-2021-2006620

Website: <https://www.grants.gov/web/grants/view-opportunity.html?oppId=329047>

Brief Description: The NOAA Marine Debris Program (MDP), authorized in the Marine Debris Act (33 U.S.C. 1951-1958), provides funding to support eligible organizations to conduct research directly related to marine debris through field, laboratory, and modeling experiments. NOAA MDP invites applications for research that investigates and identifies the critical input pathways for marine debris introduction into the coastal zone (shoreline or nearshore), including evaluation of appropriate simultaneous pathways of riverine transport downstream, surface runoff, stormwater discharge, and wind-driven transport, and degradation and fragmentation of debris during transport. Projects should be original, hypothesis-driven projects that have not previously been addressed to scientific standards. Successful proposals through this solicitation will be funded through cooperative agreements. Funding of up to \$2,000,000 is expected to be available for Marine Debris Research grants in Fiscal Year 2021 (FY21). Funding for this grant competition comes through the NOAA Marine Debris Program as annual or supplemental appropriations to the Office of Response and Restoration, National Ocean Service.

Awards: Typical awards will range from \$150,000 - \$300,000.

Letter of Intent: Applicants must submit a Letter of Intent (LOI) and receive an invitation from the NOAA MDP before submitting a full proposal. LOIs must be submitted as an email attachment to grants.marinedebris@noaa.gov by 11:59 pm Eastern Time on November 5, 2020.

Proposal Deadline: Full applications must be received by 11:59 p.m. Eastern Time, February 8, 2021.

EPA

Grant Program: Center for Early Lifestage Vulnerabilities to Environmental Stressors

Agency: Environmental Protection Agency EPA-G2020-STAR-E1

Website: <https://www.epa.gov/research-grants/center-early-lifestage-vulnerabilities-environmental-stressors>

Brief Description: The U.S. Environmental Protection Agency (EPA), as part of its Science to Achieve Results (STAR) program, is seeking applications to support a Center for Early Lifestage Vulnerabilities to Environmental Stressors. EPA is interested in supporting a transdisciplinary research center to better understand potential causal relationships among cumulative exposures to chemicals and non-chemical environmental stressors during early lifestages and modifying factors that result in adverse developmental health effects. Developmental health outcomes may include attention deficit/hyperactivity disorder

(ADHD), reduced IQ, obesity, lessened self-regulatory capacities, anxiety, depression, attention problems, lower memory function, or structural changes to the brain. The application should include the development and demonstration of novel and revolutionary quantitative methods and approaches to integrate multidisciplinary data (epidemiology, toxicology, exposure science, risk assessment, public health, social science, and environmental science)

Award: Estimated Total Program Funding: \$1,900,000

Submission Deadline: November 12, 2020 : 11:59:59 pm Eastern Time

Contact: Technical Contact: Intaek Hahn, 202-564-4377;

[Department of Energy](#)

Grant Program: Buildings Energy Efficiency Frontiers & Innovation Technologies (BENEFIT) – 2020

Agency: Department of Energy DE-FOA-0002196

Website: <https://eere-exchange.energy.gov/#FoaIdaff0bc6d-95b0-4aa6-901b-2ef0a53e8f7e>

Brief Description: This FOA is being issued by the U.S. Department of Energy's (DOE) Office of Energy Efficiency and Renewable Energy (EERE) Building Technologies Office (BTO). This section describes the overall goals of BTO and the type of projects that are being solicited for funding support through this FOA. BTO's overall goal is to improve the energy productivity of buildings without sacrificing occupant comfort or product performance. Progress towards achieving this goal will make building energy costs more affordable to the benefit of American families and businesses. The objective of this Funding Opportunity Announcement (FOA) is to research and develop next-generation building technologies that have the potential for significant energy savings and improved demand flexibility, affordability, and occupant comfort. An additional goal is to advance building construction, remodeling, and retrofit practices, and associated workforces.

Awards: EERE expects to make a total of approximately \$80 million of federal funding available for new awards under this FOA, subject to the availability of appropriated funds.

Letter of Intent: Concept Paper Submission Deadline: 11/5/2020 5:00 PM ET

Submission Deadline: Full Application Submission Deadline: 1/20/2021 5:00 PM ET

[NASA](#)

Grant Program: University Student Research Challenge

Agency: NASA NNH20ZEA001N-USRC

Website: <https://nspires.nasaprs.com/external/solicitations/summary.do?solId=%7BC9CC1B80-9F50-7B37-2A9B-33CC623FA556%7D&path=&method=init>

Brief Description: USRC seeks to challenge students to propose new aeronautics ideas/concepts that are relevant to ARMD. Apart from this, the students also have the challenge of raising cost share funds through crowdfunding¹ platform. The process of creating and preparing a crowdfunding campaign acts as a teaching accelerator - requiring students to act like entrepreneurs and taking action. Understanding the market, fundraising and execution are major skills for a future entrepreneur. Crowdfunding also raises awareness in the general public about students' research. Finally, crowdfunding is being used to excite and bring in non-traditional communities in relationship with ARMD. USRC's strategic goals are: • Provide broad opportunities for students at different levels, including undergraduate and graduate, to participate in aeronautics research; • Assist in achieving aviation outcomes defined in the ARMD Strategic Implementation Plan ("Strategic Plan") [1] through NASA-complementary research.

Awards: About 5 awards; Available Funding: \$80,000

Notice of Intent: Not required.

Proposal Deadline: Three-page proposals for the next USRC cycle are due November 12, 2020. Proposals can also be submitted later and will be evaluated in two additional cycles with due dates: February 25, 2021 and June 24, 2021.

Contact: Quickest way to resolve questions about this NRA is to email questions to: HQ-USRC@mail.nasa.gov

Grant Program: ROSES 2020: Science Team for the OCO Missions

Agency: NASA NNH20ZDA001N-OCOST

Website: <https://nspires.nasaprs.com/external/solicitations/summary.do?solId=%7B7B9745C4-04AD-74F8-59B7-3CF0C8EF15E3%7D&path=&method=init>

Brief Description: Proposals are solicited for participation in the Science Team for the Orbiting Carbon Observatory-2 (OCO-2) and Orbiting Carbon Observatory-3 (OCO-3) missions. NASA launched the OCO-2 mission in July 2014. OCO-2 has been operating on orbit, producing precise column average CO₂ concentration data globally with validated precision and accuracy of better than 0.25% , since September 2014. The OCO-3 mission, with a near-replica instrument to OCO-2, has been operating on the International Space Station (ISS) since June of 2019 and is now returning data with similar precisions as OCO-2. The primary differences in the data sets are the spatial and temporal sampling as a result of the different orbits of the observations (especially inclination) and the available observational modes of the instruments.

Awards: Funding anticipated: \$3,500,000

Notice of Intent: November 13, 2020

Proposal Deadline: January 13, 2021

Contact: Kenneth W. Jucks, Earth Science Division, Science Mission Directorate, NASA Headquarters Washington, DC 20546-0001 Telephone: 202-358-0476 Email: kenneth.w.jucks@nasa.gov

National Endowment of Humanities

Grant Program: Collaborative Research

Agency: National Endowment for the Humanities 20201202-RZ

Website: <https://www.neh.gov/grants/research/collaborative-research-grants>

Brief Description: Debate, exchange of ideas, and working together—all are basic activities that advance humanities knowledge and foster rich scholarship that would not be possible by researchers working on

their own. The Collaborative Research program aims to advance humanistic knowledge through sustained collaboration between two or more scholars. Collaborators may be drawn from a single institution or several institutions across the United States; up to half of the collaborators may be based outside of the U.S. The program encourages projects that propose diverse approaches to topics, incorporate multiple points of view, and explore new avenues of inquiry in the humanities.

The program allows projects that propose research in a single field of study, as well as interdisciplinary work. Projects that include partnerships with researchers from the natural and social sciences are encouraged but must employ a humanistic research agenda. Partnerships among different types of institutions are welcome as well as new collaborations with international partners.

Proposed projects must aim to result in tangible and sustainable outcomes, for example, co-authored or multi-authored books; born-digital publications; themed issues of peer-reviewed journals; a series of peer-reviewed articles; and open-access scholarly digital resources. All project outcomes must incorporate interpretive work and collaboration to address significant humanities research questions.

Award: Maximum award amount: Up to \$250,000 (depending on funding category).

Proposal Deadline: Optional Draft due October 15, 2020; Application due December 2, 2020

Contact: Contact the Division of Research Programs Team; 202-606-8200; collaborative@neh.gov

Grant Program: Digital Humanities Advancement Grants

Agency: National Endowment for the Humanities 20210115-HAA

Website: <https://www.neh.gov/grants/odh/digital-humanities-advancement-grants>

Brief Description: Digital Humanities Advancement Grants (DHAG) support innovative, experimental, and/or computationally challenging projects at different stages throughout their lifecycles, from early start-up phases through implementation and sustainability. Experimentation, reuse, and extensibility are hallmarks of this program, leading to innovative work that can scale to enhance scholarly research, teaching, and public programming in the humanities. This program is offered twice per year. Proposals are welcome for digital initiatives in any area of the humanities.

In support of its efforts to advance digital infrastructures and initiatives in libraries and archives, and subject to the availability of funds and IMLS discretion, the [Institute of Museum and Library Services](#) (IMLS) anticipates providing funding through this program. These funds may support some DHAG projects that further the IMLS mission to advance, support, and empower America's museums, libraries, and related organizations. IMLS funding will encourage innovative collaborations between library and archives professionals, humanities professionals, and relevant public communities that advance preservation of, access to, and public engagement with digital collections and services to empower community learning, foster civic cohesion, and strengthen knowledge networks. This could include collaborations with community-based archives, community-driven efforts, and institutions or initiatives representing the traditionally underserved. Interested applicants should also refer to the current [IMLS Strategic Plan](#) for additional context.

Award: Maximum award amount: Level I: \$50,000; Level II: \$100,000; Level III: \$325,000 in outright funds, with an additional \$50,000 in matching funds

Proposal Deadline: Optional Draft due: December 1, 2020: Application due: January 15, 2021

Contact: Contact the Office of Digital Humanities Team odh@neh.gov

Grant Program: Scholarly Editions and Scholarly Translations

Agency: National Endowment for the Humanities 20201202-RQ

Website: <https://www.neh.gov/grants/research/scholarly-editions-and-translations-grants>

Brief Description: The Scholarly Editions and Scholarly Translations program provides grants to organizations to support collaborative teams who are editing, annotating, and translating foundational humanities texts that are vital to learning and research but are currently inaccessible or are available only in inadequate editions or translations. Typically, the texts are significant literary, philosophical, and historical materials, but other types of work, such as musical notation, may also be the subject of an edition.

The program supports continuous full-time or part-time activities during the periods of performance of one to three years. Projects must be undertaken by at least two scholars working collaboratively. While international collaboration is permitted, projects must maintain an equitable balance between scholars at U.S. institutions and scholars at non-U.S. institutions. In addition to supporting long-term editorial projects, the program also encourages applications for short-term projects and for projects that are at a planning stage.

Award: Maximum award amount \$300,000; up to \$450,000 may be available for projects.

Proposal Deadline: Application due December 2, 2020

Contact: Contact the Division of Research Programs Team; 202-606-8200; editions@neh.gov

[Private Foundations](#)

New Jersey Health Foundation

Grant Program: Innovation Grants Program

Agency: New Jersey Health Foundation

Website: <https://www.njhealthfoundation.org/>

Brief Description: The Innovation Grants Program helps researchers and students at our affiliated organizations -- Kessler Foundation, New Jersey Institute of Technology, Princeton University, Rowan University, Rutgers University and Stevens Institute of Technology -- continue to advance their research by providing grants of up to \$50,000 to support further development of their work. Grants must be used to fund only direct program costs. Grants cannot be used to fund overhead, tuition or any other indirect costs. We created the Innovation Grants Program to help address an important need of researchers in the middle stage of our funding continuum – in between very early research ideas and those ready to form companies.

Many of the researchers who receive Innovation Grants have great ideas but lack access to funding and other resources to further their research. Most do not have an understanding of the business processes required to achieve their goal – proof of concept and commercialization of their work to make their device or treatment available to those who need it. Our commitment to the researchers and students goes beyond the grant funding we provide. Our team provides mentoring and direction to researchers. Recently supported projects hold the promise of creating tremendous benefits for society. Researchers are investigating ways to detect the early onset of dementia, investigating novel treatments for alcohol use disorder, combating diabetes, treating intraocular diseases, developing insect repellents to improve global health, and researching approaches to combat cancers and allergic inflammation. To obtain more information, please click [here](#).

Awards: Full-time faculty members, staff and other personnel at these organizations are eligible to apply for grants of up to \$35,000 each under the Research Grant Program and grants up to \$25,000 each under the Community Health and Social Service Grant Program to fund health-related community and social service projects.

Proposal Deadline: Applications will be accepted from September 21, 2020 through November 13, 2020. We have committed at least \$1,000,000 in the current cycle of our Research and Community Health and Social Service Grants Programs.

Contact: If you have any questions, please don't hesitate to send an e-mail to researchgrant@njhf.org.

Bill and Malina Gates Foundation

Grant Program: Grand Challenge: Balance the Equation - A Grand Challenge for Algebra 1

Agency: Bill and Malina Gates Foundation

Website: <https://gcgh.grandchallenges.org/challenge/balance-equation-grand-challenge-algebra-1>

Brief Description: Grand Challenges is a family of initiatives fostering innovation that historically solve key problems in global health and development for those most in need. These initiatives use challenges to focus attention and effort on specific problems. They can be traced back to over a century ago when a mathematician named David Hilbert defined a set of unsolved problems to spark progress in the field of mathematics. Each initiative is an experiment in the use of challenges to focus innovation on having an effect.

Balance the Equation is the first-ever Grand Challenge focused on U.S. education.

The Bill & Melinda Gates Foundation is seeking to disrupt the deeply imbalanced system against this generation – and previous generations – of Black, Latino, English Learners (ELs), and students experiencing poverty in the United States, who we will refer to as priority students, as it relates to their Algebra 1 experience in 7th, 8th, or 9th grade, in-class or online.

Awards: Phase 1: Planning and Prototyping grant for US\$100,000 to develop a pilot study plan alongside our external learning partner, American Institute for Research ([AIR](#)).

Proposal Deadline: Nov 06, 2020, 12:00 pm PST

Contact: [For questions, please contact the Balance the Equation Grand Challenge Team at: balancetheequation@gatesfoundation.org](#)

Streamlyne Question of the Week

Question: Can I generate budgets for multiple years from the Year-1 budget in Streamlyne?

Answer: Yes! You only need to input the Year-1 budget and then click on the “generate all periods” button. Streamlyne will create budget sheets for the remaining periods. You can then go to “summary” under the budget tab to review budget sheets for all periods. You can also change specific budget items that you allocated in Year-1 but you do not want to continue them in the following periods.

More FAQs on Streamlyne: Please visit <http://www.njit.edu/research/streamlyne/>

[Back to Contents](#)

Proposal Submission and Streamlyne Information **Internal Timeline for Successful and Timely Proposal Submission**

Due to the COVID-19 outbreak, PIs are strongly advised to prepare proposals well in advance of agency deadlines. Every effort will be made to meet agency deadlines following the NJIT Research Continuity Plan (<https://research.njit.edu/njit-research-continuity-plan>).

The NJIT Proposal Submission Guidelines and Policy posted on the website <https://research.njit.edu/proposal-submission-guidelines> provides the expected institutional timeline for proposal submission. Streamlyne User Manuals are posted on <https://research.njit.edu/streamlyne>. For contact information on proposal submission, pre-award services and post-award grant management, please visit research website <https://research.njit.edu/researchers> and <https://research.njit.edu/contact>.
